DevOps & Cloud Engineering Leader

Transforming Infrastructure with Automation, Scalability, and Security

Professional Summary

Innovative DevOps and Cloud Engineer with 5+ years of expertise in designing, automating, and optimizing cloud-native infrastructures. Proven track record of driving 40%+ efficiency gains in CI/CD pipelines, Kubernetes orchestration, and infrastructure-as-code (IaC) deployments. Adept at bridging development and operations to deliver scalable, secure, and high-performance solutions on AWS, Azure, and hybrid environments.

Core Competencies:

- CI/CD Pipeline Automation (Jenkins, GitLab, GitHub Actions, Azure DevOps)
- Cloud Architecture (AWS, Azure, GCP) | Kubernetes & OpenShift Management
- Infrastructure as Code (Terraform, Ansible, CloudFormation)
- Observability & Monitoring (Grafana, Dynatrace, Prometheus, ELK Stack, CloudWatch, DataDog, New Relic)
- Microservices, Containerization (Docker, Docker Compose, Helm, ArgoCD)
- Security & Compliance (IAM, SIEM, DevSecOps)
- Networking (VPNs, DNS, SSL certificates, Firewalls, TCP etc)
- Scripting & APIs (Python, Golang, Bash, PowerShell)
- Linux (Ubuntu, CentOS, RHEL, Debian)
- Salesforce
- AI tools/ML

Key Achievements

- ✓ **40% Faster Deployments:** Redesigned CI/CD pipelines, slashing release cycles from 2 weeks to 1 week.
- ✓ **70% Infrastructure Automation:** Eliminated manual errors via Terraform/Ansible, ensuring consistency across 5+ environments.
- ✓ **99.9% Uptime:** Scaled Kubernetes clusters to handle 200% load spikes while maintaining reliability.
- ✓ **Cost & Resource Optimization:** Reduced cloud spend by 25% through right-sizing and auto-scaling strategies.

Professional Experience

HCA Healthcare | Software Engineer DevOps *Sep 2023 – Present*

- **Azure Cloud & CI/CD:** Spearheaded Jenkins-based pipelines, cutting deployment time by 40% and enabling weekly releases.
- **Kubernetes Optimization:** Managed OpenShift clusters and ArgoCD, boosting uptime by 25% and resource efficiency.
- **Observability:** Built **Dynatrace dashboards** for real-time monitoring of microservices and hybrid cloud environments. Design and implement a comprehensive monitoring solution using **Prometheus** and **Grafana Cloud**, enabling real-time visibility into applications and infrastructure performance.
- **MS SQL:** Perform databases defragmentation while optimizing the entire SQL, queries, improving database performance and loading speed by 70%.
- **DevSecOps:** Partnered with security teams to enforce compliance (SOC2, HIPAA) in CI/CD workflows.
- Deploy and manage **Python, Golang applications** on cloud platforms (**AWS, GCP, Azure**)

EK Tech Software Solutions | DevOps Cloud Engineer *Nov 2020 – Sep 2023*

- **Infrastructure as Code:** Automated 50+ servers via Terraform/Ansible, reducing manual errors by 30%.
- **AWS/Azure Scalability:** Deployed EC2, S3, RDS, and Lambda architectures, supporting 200% traffic growth.
- **CI/CD with Harness:** Design, build, and maintain Harness pipelines for Salesforce services
- **Containerization:** Streamlined Docker/Helm deployments, achieving 3x/week release frequency.
- Collaborate with architects, developers, QA, and release managers to unblock teams and ship faster.

Site Reliability Engineer | *Feb 2019 – Nov 2020*

- **Monitoring:** Designed CloudWatch alerts and SNS workflows, reducing incident response time by 50%. Developed custom Grafana dashboard and alerts to monitor key performance indicators (KPIs) and proactively identify issues, leading to reduce mean time to resolution (MTTR).
- **Disaster Recovery:** Automated AWS backups and snapshots, ensuring 100% data integrity.
- **Integrate Databricks with keys AWS services** including S3, Redshift, and Lake Formation for comprehensive data lake solutions and use AWS CloudFormation for infrastructure as code to deploy and manage Databricks and AWS resources.

Certifications

- AWS Certified Solutions Architect | Azure Fundamentals (AZ-900)
- Red Hat Certified Engineer (Ansible) | CompTIA Security+
- Google Data Analytics | Microsoft Azure Kubernetes (AKS)

Technical Skills

Cloud: AWS (EC2, S3, RDS, Lambda, Security Groups, IAM), Azure (AKS, DevOps), GCP

DevOps: Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD, Terraform, Ansible, Docker, Kubernetes

Monitoring: Dynatrace, Prometheus, Grafana, DataDog, ELK, Splunk, New Relic

Languages: Python, Golang, Bash, PowerShell, Java, JavaScript, Node.js

Education

MS in Business Analytics | Texas A&M University-Commerce (2022)
