PROFILE

Graduate Computer Science student at Oregon State University seeking **Software Engineer internships and entry-level roles** with a focus on full-stack web development and cloud-based applications. Hands-on experience building and deploying scalable web apps, RESTful services, and AI-powered features. Currently expanding cloud skills with AWS through certification and projects.

EDUCATION

Oregon State University | Corvallis, Oregon, United States

Master of Engineering - Computer Science, CGPA: 3.91/4.0

Sep 2024 - Present

Relevant Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, DBMS, Programming Languages, Parallel Programming, Human-Computer Interaction, Computer Graphics, Cyber Security

Vellore Institute of Technology | Chennai, Tamil Nadu, India

B.Tech - Computer Science and Engineering, CGPA: 3.54/4.0

Aug 2020 - May 2024

EXPERIENCE

Software Developer Intern — SKYBRISK | Remote

Nov 2025 - Jan 2026

- Developed ERP modules with React, routing, and JWT authentication to support CRUD operations on business data
- Implemented CRM features with a React frontend and Spring Boot + MySQL APIs for managing customer and lead information securely
- Collaborated on a remote Git-based codebase through ticket workflows and peer code reviews, helping teammates unblock issues and maintain code quality during feature development

SKILLS

Programming Languages — Python, Java, JavaScript, TypeScript, C, C++, R, MATLAB

Web & Frameworks — React, Next.js, Angular, Vue, Node.js, Express, Django, Flask, MERN stack, PHP, Bootstrap, Tailwind CSS, jQuery, AJAX

AI-ML — GenAI, LLMs, Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch, scikit-learn

Databases & Cloud — MySQL, PostgreSQL, Oracle, MongoDB, NoSQL, SQL, Dynamo DB, S3, AWS, Firebase, Docker

Design & Tools — Figma, Git, REST APIs, API integration, Linux, VS Code, CI/CD, Agile/Scrum, version control

PROJECTS

NextGen, Serverless Portfolio CMS | Next.js, Node.js, AWS(Amplify, API Gateway, Lambda, DynamoDB, S3)

- Architected a serverless backend on AWS to serve portfolio content via REST endpoints, enabling updates directly from the database
- Implemented data validation, structured logging, and resilient error handling in Lambda, making failures traceable in CloudWatch and improving API reliability
- Automated frontend deployments with AWS Amplify + GitHub CI/CD, deploying on every commit and integrating the UI with live API data through CORS-safe configuration

TODO, Task Management Application | Angular, TypeScript, Firebase, Firestore, Vercel

- Implemented CRUD operations for tasks (create, read, update, delete) to allow users to efficiently handle daily tasks directly in the browser
- Integrated authentication and cloud storage to ensure user's data is isolated and persists across sessions and devices
- Enhanced the user interface by incorporating clear empty states, and basic error handling, all aimed at maintaining simplicity and usability for non-technical users

VEHERE, Tour Management System | HTML, CSS, Bootstrap, JS, Node.js, Express.js, MongoDB

- Built a tour management system with JWT authentication and role-based access, securing user sessions and protected routes
- Integrated Razorpay payments, Mapbox map views, and Nodemailer email service for a seamless booking workflow
- Deployed a full-stack application with MVC architecture, with responsive UI, improving maintainability and cross-device usability

Med-Vision, Multi-modal RAG for Medical Learning | Python, BLIP-2, FAISS, FLAN-T5

- Built a multimodal RAG system over 1,000 IU X-ray image-report pairs to provide clear explanatory reports
- Structured a pipeline to encode each image, retrieve the top-5 similar studies, and fuse the retrieved reports into a single prompt for a report generator, making retrieval depth and prompts easy to tune
- Achieved a BLEU score of 23.45, with performance comparable to larger models reported on a test dataset

Other Projects

- **TRIPVUE**, *360° Tour Gallery*
- **VIEAT**, *Online Food Ordering and Delivery Platform*
- **SRGAN**, *Super Resolution Generative Adversarial Network*
- **RESUMEAI**, *LLM-based resume generator*

CERTIFICATIONS

- **AWS Certified** Solutions Architect - Associate | **AWS Certified** Cloud Practitioner
- **Microsoft Certified:** Security, Compliance & Identity Fundamentals
- **LinkedIn Certified:** Deep Learning Model Optimization & Tuning, NLP
- **Udemy Certified:** Node.js, Express, MongoDB Bootcamp; Mastering Data Structures & Algorithms using C/C++
- **Others:** Agentic AI Hands-on; Power BI for Beginners (Simplilearn - **Microsoft**)
- Led a 3-member team to a Top 50 finish in a national competitive coding hackathon among participants from NITs, IIITs, and industry professionals
