PROFILE

Full Stack Developer specializing in rapid, 0-to-1 greenfield development. I architect and build production-ready Web2 and Web3 applications, with deep expertise in the Rust, TypeScript, and Node.js ecosystems.

EDUCATION

Bsc. Computer Science | University of Nigeria Nsukka

TECHNICAL SKILLS

- **Languages:** Rust, TypeScript, JavaScript, Python
- **Rust Ecosystem:** Actix, Rocket, Dioxus, Tauri
- **JS/TS Ecosystem:** React, NextJS, NodeJS, NestJS, Express, React Native, SolidJS, Redux
- **Databases & Protocols:** MongoDB, PostgreSQL, Redis, MySQL, Internet Computer Protocol (ICP)
- **Tools & DevOps:** Git, GitHub Actions, CI/CD, NGINX, PM2, Docker, Cypress, Figma, GCP

PROFESSIONAL EXPERIENCE (Greenfield Focus)

Software Engineer - Contractor | Jul 2025 - Oct 2025

- Designed and built an MVP IDE from scratch using the Rust Dioxus framework, enabling text-based coding capabilities for future multi-language expansion.
- Pioneered a custom React Flow alternative within the Rust ecosystem, ensuring full compatibility with Dioxus to facilitate visual programming interfaces.
- Delivered the initial webpage, optimizing the Rust/Dioxus application for peak performance and responsive design.

Fullstack Developer | Minerva | Mar 2025 - Jul 2025

- Designed the greenfield data models and core backend architecture for a new fintech solution,

accelerating the initial product roadmap.

- Engineered the complete O-to-1 application suite, delivering 3 distinct portals (customer, merchant, admin) using React and Next.js.
- Improved an existing enterprise telecom monitoring admin dashboard, enhancing performance and usability for administrative teams.

Rust Full Stack Developer (4-Month Contract) | Tech Shark | Nov 2024 - Feb 2025

- Architected and delivered a complete Web3 service MVP on the Internet Computer Protocol (ICP) in 4 months, enabling a successful Q1 product launch.
- Maintained 100% ownership of the entire backend stack, building a robust Rust-based canister with integrated Internet Identity for decentralized auth.
- Engineered the critical payment infrastructure, successfully bridging Web2 (Paystack via NestJS) and Web3 (ICP) systems for seamless transactions.

Frontend Developer (Contract) | Portixel | Jul 2024 - Nov 2024

- Engineered the complete user-facing Web3 platform (landing page, marketplace, dashboard) using Next.js, TypeScript, and Redux.
- Built a polished, scalable UI using Next.js, TypeScript, and Redux, resulting in a successful waitlist and onboarding launch.
- Implemented a seamless Web3 user experience by integrating the Solflare Wallet for decentralized onboarding.

Backend Developer (Contract) | Design Xcel | May 2024 - Aug 2024

- Led the greenfield development of all scalable APIs and data management services for a public registry system using Node.js and MongoDB.

SIWES Intern | United Nations Educational, Scientific and Cultural Organization | Jan 2024 - May 2024

- Developed a high-performance desktop application from scratch using Rust, React, TypeScript, and Tauri for native delivery.
- Delivered a production-ready tool that streamlined proximate analysis for researchers, reducing manual data processing time by an estimated 75%.

Fullstack Developer (3-Month Contract) | Orbs Technologies | Jan 2024 - Mar 2024

- Delivered a full-featured internal fintech platform from concept to launch in just 8 weeks, beating the 3-month contract deadline.

- Owned 100% of the end-to-end development, building the frontend (React), backend APIs (NodeJS/PostgreSQL), and infrastructure.
- Automated key financial workflows, improving internal operational efficiency by 30% and centralizing documentation.

Full Stack Engineer | Idurar | Jul 2023 - Sep 2023

- Joined the core team of a startup and contributed to the successful MVP launch of their open source CRM/ERP system.
- Developed 3+ core modules (MERN stack) and implemented crucial sub-systems, including mailing services and URL-based navigation.

Mobile Developer (Contract) | GoViral | Sep 2022 - Oct 2022

- Owned 100% of the mobile frontend development for a new campaign-focused app.
- Built and delivered a high-fidelity, cross-platform (iOS/Android) prototype using React Native .

Frontend Developer (Contract) | DeLegend | Jul 2022 - Sep 2022

- Developed a new internal operations dashboard from scratch, building 4+ core admin modules (bookings, staff, products, CMS) with React and SASS.
- Delivered a flexible, modular design that empowered non-technical staff to manage operations independently, reducing admin overhead by 50%.

PROJECTS

Headless Appointment Scheduling Engine | <https://github.com/onfranciis/booking-headless>

- Architected a high-performance, client-agnostic booking API using Rust and Actix Web, ensuring atomic data consistency and global timezone support.
- Slashed availability lookup latency by 99.5% (from 1.38s to 7ms) by implementing a strategic Redis caching layer for complex time-slot calculations.
- Engineered a robust ecosystem featuring two-way Google Calendar synchronization (OAuth2) and serverless file uploads via Google Cloud (GCS) Signed URLs.

Linkly RS (URL Shortener) | <https://github.com/onfranciis/linkly-rs>

- Architected and built a high-performance, self-hostable URL shortener from scratch to create an open-source Bitly alternative using Rust with Rocket, PostgreSQL, and Redis for scalable, low-latency link redirection.

VOLUNTEER & COMMUNITY LEADERSHIP

Lead | Google Developer Groups On Campus | Jul 2024 - Aug 2025

- Selected as Lead to organize all student tech engagement ; hosted workshops and mentorship sessions that grew the dev community.

Backend Developer | Eth Enugu (Nigeria's First Ethereum Builder Residency & Conference) | Mar 2025 - Aug 2025

- Built and maintained the event platform's backend system ; configured Linux servers (NGINX, PM2) and automated CI/CD deployment pipelines.

Fullstack Team Lead | Sustainobles | Oct 2023 - Present

- Leading the 0-to-1 build of a greenfield donation platform using NextJS, NodeJS, and MongoDB. Deployed a live system with donation tracking and PDF generation.

CERTIFICATES

- Fundamentals of Deep Learning (NVIDIA)
- Google Cloud Computing Foundations: Networking & Security in Google Cloud
- Google Cloud Computing Foundations: Infrastructure in Google Cloud
- Google Cloud Computing Foundations: Cloud Computing Fundamentals
- Advanced Google Analytics (Google)
- Director Of Software (Nigeria Association of Computing Students, University of Nigeria)
