EDUCATION

Bachelor of Science, Computer Science

May 2025

University of Minnesota - Twin Cities, College of Science and Engineering

- **GPA:** 3.4
- **Related Coursework:** Software Engineering, Database Systems, Algorithms & Data Structures, Artificial Intelligence, Machine Learning, Networking, Interactive Web Development, Machine Architecture, Operating Systems

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript/TypeScript, SQL, C#

Frameworks: React.js, Node.js, JUnit, Apache Spark, NumPy, Flask, Express.js

Tools/Platform: Git, PostgreSQL, MySQL, Jira, Visual Studio, Microsoft Excel, Docker, AWS, WordPress

EXPERIENCE

Engineering Data Analyst II

Apr 2025 - Sep 2025

Hennepin County

Medina, MN

- Collected, validated, and maintained geospatial infrastructure datasets from culverts and county assets using ArcGIS-based systems such as ICON and ATOM, ensuring data integrity and compliance with MnDOT standards.
- Produced and reviewed CAD plan sheets and technical documentation, translating field and asset requirements into accurate, standards-aligned digital deliverables and verifying consistency across designs, drawings, and datasets.
- Collaborated with engineering staff to clarify requirements, prioritize tasks, and deliver accurate outputs on deadline.
- Streamlined data entry and reporting by standardizing templates and naming conventions, reducing turnaround time.

Full-Stack Software Engineer

May 2024 - Apr 2025

Engaze Media

Bloomington, MN

- Deployed interactive dashboards with React, Flask, and JSON APIs, improving visibility into ad engagement trends.
- Automated ETL workflows with Python and NumPy, reducing reporting time by 35% while increasing data accuracy.
- Integrated PostgreSQL and Apache Spark to optimize large-scale analytics pipelines, improving insight delivery by 20%.
- Collaborated with cross-functional teams to discuss technical solutions that align with business and client needs.

Software Developer Intern

Sep 2023 - May 2024

University of Minnesota (CSE), Rocket Team

Minneapolis, MN

- Engineered a flight-data playback system with Python and MySQL to enable import/export for post-launch analysis.
- Improved real-time updates with WebSockets and database tuning, reducing latency in live telemetry updates by 40%.
- Built a flexible UI framework with TypeScript and CSS to allow seamless integration of new radio interfaces.

Computer Science Teaching Assistant

Sep 2022 - Dec 2024

UMN Department of Computer Science and Engineering

Minneapolis, MN

- Led weekly lab sessions for 50+ students, explaining complex topics and providing hands-on coding exercises.
- Mentored students 1-on-1 to write reliable code and optimize solutions with stronger data structures and algorithms.
- Taught multiple core courses, including Intro to Programming in Python, Algorithms & Data Structures in Java, and Machine Architecture in C/C++, supporting students in building strong foundations across languages and paradigms.

PROJECTS

Schedule Manager - <https://github.com/curtiskokuloku/Schedule-Manager>

Mar 2024 - May 2024

- Built a full-stack scheduling system that allows creating, editing, and deleting events using Node.js/Express with a MySQL backend for persistent data storage; a seamlessly responsive UI using HTML/CSS, and JavaScript, secured accounts with bcrypt password hashing and Express-Session authentication to protect user data and session state.

Drone-Based Package Delivery Simulation - https://hub.docker.com/r/mekon033/final_drone_sim

Sep 2023 - Dec 2023

- Built an autonomous drone-based package delivery simulation using C++, Python, and UML, integrating search/route algorithms, real-time notifications, and battery management with SOLID principles in an Agile workflow.
