

Surya Sivakumar

+1 (602) 617-2616 · Dallas, TX · surya040401@gmail.com · linkedin.com/in/suryassivakumar · github.com/surya-441

TL;DR Full-stack software engineer with experience in building scalable web and mobile apps using React, Node.js, and AWS. Proven track record of improving performance, usability, and reliability across systems impacting 50k+ users.

Education

Master of Science in Computer Science, Arizona State University **Aug 2022 – May 2024**

Data Mining, Statistical Machine Learning, Network Security, Software Security **GPA: 4.0 / 4.0**

Bachelor of Engineering in Computer Science, MIT, Anna University **Aug 2018 – Jun 2022**

Application Development Practices, Cloud Computing, Object Oriented Analysis & Design **GPA: 3.52 / 4.00**

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL

Frontend: React, React Native, Next.js, Redux, Tailwind, HTML5, CSS3, Figma, WCAG 2.0

Backend: Node.js, Express, Spring Boot, PostgreSQL, NeonDB, PrismaORM, RESTful APIs, MVC Pattern

Cloud & Tools: Amazon Web Services (EC2, S3, RDS), Docker, Git, CI/CD, Sanity Studio, Unit Testing, Debugging, Agile, Linux, Windows, macOS, Claude Code, Cursor, Antigravity

Work Experience

Full Stack Engineer, Nova Astro (novaastro.io) **Sep 2025 – Jan 2026**

Tech Stack: React, TypeScript, Next.js, Tailwind, Figma, WCAG 2.0, NeonDB, PrismaORM, Claude Code, Vercel, AWS

- Built puzzle games based on figma wireframes designed to keep kids engaged on the platform.
- Setup the database schema and SQL queries for the assignment system. Connected it with our online learning platform to seamlessly connect assignments with lessons.
- Built a Stripe-powered subscription system with integrated DB tracking, supporting multiple price tiers, and bundles.

Software Engineer, Best Life (getbestlife.app) **Feb 2025 – Jun 2025**

Tech Stack: React Native, FastAPI, TypeScript, Jest, Sanity Studio, Redux, WCAG 2.0, Agile, AWS

- Consolidated multiple graph views into a single tabbed interface, streamlined navigation for 50k+ users and introduced color-coded warnings that boosted issue detection speed.
- Implemented GPS detection and Google Places autofill within the address entry process, decreasing average address input time by 30% and resulting in a faster, more intuitive user experience.
- Built a CMS system that tailors content based on whether the user is on iOS or Android.

Backend Developer, Self Justice (selfjustice.ca) **Jul 2024 – Feb 2025**

Tech Stack: Express, Node.js, MongoDB, WordPress, Python, Google Cloud Platform (GCP)

- Mitigated a cross-site scripting vulnerability threatening more than 2k user accounts, reinforcing platform security.
- Built a Python web scraper with BeautifulSoup to extract and structure data from 150+ web pages into a JSON database, enabling a Retrieval-Augmented Generation (RAG) AI chatbot backend.
- Developed a secure and scalable RESTful API backend to handle user reviews, enabling users to seamlessly add, view, and manage reviews for courthouses, judges, and lawyers.

Backend Developer Intern, BNY Mellon (bny.com) **Jun 2021 – Aug 2021**

Tech Stack: Java, Spring Boot, Maven, MySQL, Agile

- Replaced an inefficient Robotic Process Automation (RPA) workflow with custom bot cutting retrieval time by 80%.
- Engineered a customizable retry mechanism for cron jobs, reducing transient job failures by 30%.
- Automated the retrieval of tax rates from an external API and integrated the data into form generation workflows.

Projects

Geotrack (React, deck.gl, Scala, Apache Sedona, ArcGIS, Spark SQL, Finagle)

- Created a full-stack GIS application to analyze and visualize vehicle trajectory data from the Tempe Taxi dataset.
- Implemented spatial, spatiotemporal, and KNN queries at scale, delivering insights 10x faster than traditional methods.

DailyNews (Node.js, Express, Graph API, AWS EC2, AWS RDS, PostgreSQL, ngrok)

- Engineered a news chatbot to deliver curated, summarized news reports to subscribed users via WhatsApp.
- Implemented a webhook to manage user interactions enabling seamless two-way communication.
