EDUCATION

Rice University

Aug 2024- Dec 2025

Master of Computer Science, Specialization in AI, GPA: 3.96/4.0.

Houston, TX

Relevant courses: Data Structures and Algorithms, Artificial Intelligence, Deep Learning for Vision and Language.

JSS Science and Technology University

Aug 2018 - Jun 2022

Bachelor of Engineering in Electronics and Communication Engineering, GPA: 9.01/10.

Mysuru, India

WORK EXPERIENCE

Affekta LLC

Houston, TX

Software Engineer Intern

Oct 2025 - Dec 2025

- Architected and built a unified evaluation framework to benchmark 6 models across 12 datasets, improving reproducibility and cross-experiment comparability.
- Built tooling to generate tiered-difficulty unknown-unknown datasets via parameterized noise augmentation for robustness testing.
- Delivered PEFT/LoRA fine-tuning pipelines for LLM adaptation, reducing fine-tuning time by ~30% while maintaining performance.
- Built an end-to-end full-stack app to collect human feedback and route it into the evaluation pipeline (React + REST APIs + database).
- Evaluated DSL and program-synthesis approaches for structured reasoning; shared recommendations to guide technical direction.

Paycom

Grapevine, TX

Software Engineer Intern

May 2025 - Aug 2025

- Developed and deployed backend services for model inference and data integration using RESTful APIs; collaborated with a team of five interns.
- Built a full-stack recommendation system using a dual encoder with vector embeddings and ML, achieving 80% top-k match accuracy.
- Leveraged LLMs to enrich training data with contextual signals, improving embedding quality, vector search, and retrieval relevance.
- Enabled single-click deployment of the system using Docker, improving developer efficiency and automating release cycles.

Aurigo Software Technologies

Bengaluru, India

Software Engineer 2

Jul 2022 - May 2024

- Delivered scalable full-stack features (.NET, React/TypeScript, SQL) with emphasis on functional quality and maintainability.
- Designed and integrated advanced features into the logging functionality, enabling comprehensive tracking of page activities, XML forms, and proof of concepts, which bolstered monitoring and accountability.
- Transitioned into a front-end-focused role to support the launch of a new product with improved UI/UX. Played a key role in project success by supporting a team new to front-end development.
- Streamlined testing and documentation processes by implementing Jest and React Testing Library, ensuring robust quality assurance.

RELEVANT PROJECTS

Adaptive Face Creation through Iterative Feedback

Feb 2025 - April 2025

- Developed a system that generates realistic faces using combinations of stable diffusion models.
- Used GLIGEN to control the individual facial features, and ControlNet++, which preserves the overall facial structure.
- Optimized prompts by extracting the features specified by the user and enhancing them to produce the most accurate images.

CS Student Helper – RAG Chatbot (NLP + Search)

Feb 2025 - April 2025

- Built a dynamic RAG chatbot integrating a large language model with FAISS for context-aware responses.
- Created a custom retrieval module using SentenceTransformers for large-scale semantic lookups, integrating a Gradio interface for real-time user interaction.

AWARDS AND RECOGNITIONS

- Spot Award for meeting the tight timeline for the Essential 2.0 release.
- Spot Award for outstanding performance and willingness to go above and beyond.

Feb 2024

Feb 2023

PROFESSIONAL SKILLS

Programming Languages: C++, Python, TypeScript, C#

Web Technologies: HTML, CSS, JavaScript, PHP, React, Redux, Next.js, JQuery, FastAPI, RESTful API

Databases: SQL Server/MySQL (relational), MongoDB (NoSQL)

NLP/ML: Embeddings, Vector search (FAISS), SentenceTransformers, scikit-learn, PyTorch, RAG pipelines, Hugging Face, XGBoost

Tools: Git, Docker, AWS/Azure, JIRA, Jest, React Testing Library

Development Tools: Visual Studio, Visual Studio Code, SQL Server Management Studio, GitHub Copilot, Codex, Cursor
