Work Experience

Software Engineer

Simourg, Europe, Dec 2023 – Present

Global business process management system on the market since 2003, serving government agencies in 17 countries with 200+ institutional clients, supported by an 10-member team

- Accelerated launch of a new product version by resolving bugs and implementing client feedback, achieving a **21.56% faster release** and ensuring timely market entry.
- Developed custom components in Vue.js, Pinia that **reduced final frontend bundle size by 9.8%**, enhanced functionality, and introduced new customization options, becoming the dedicated specialist for ongoing support.
- Designed and implemented a custom page loader using Canvas API, seamlessly integrating with the product's style, reducing resource consumption, and supporting RESTful, GraphQL, and WebSocket requests. The loader could be effortlessly embedded into other components such as modals, menus, and chat interfaces.
- Support the user authentication platform built with React.js and Zustand, ensuring seamless login and registration processes, optimizing UI performance, and implementing new features based on user feedback.

Software Engineer

Pitcher Agency, Europe, Dec 2021 – Dec 2023

Full-cycle digital product agency founded in 2001, delivering SaaS solutions from idea to launch, with a 27-member team

- Led migration of a legacy project to Vue.js, Pinia and Vite, which reduced codebase size and improved maintainability and performance.
- Developed award-winning websites (CSS Design Awards, Tagline Awards) that boosted client acquisition by showcasing innovative design and functionality.
- Created a CLI tool in Python for version control and implemented a design system, which **increased team efficiency by 27.4% and reduced code redundancy by 32.56%.**

Software Engineer

Meta Studio, Europe, Feb 2019 – Dec 2021

Digital agency founded in 2001, specializing in product design and development, with a 14-member team

- Led rapid adaptation of a restaurant chain's bonus system during COVID-19 using React.js and WebSocket, which increased client engagement.
- Designed and built interfaces in React.js, Redux for service and corporate websites, and developed custom client solutions with optimized UX.
- Led client meetings, coordinated project plans, estimated workloads, and managed a team of 3 professionals to ensure successful project delivery.

Education

- **Master's Degree, Applied computer science.** Siberian State University of Science and Technology, Russia
- **Bachelor's Degree, PR and advertising.** Siberian State University of Science and Technology, Russia
