

# Deepak Kumar Yuvaneesh Pradeepkumar

San Jose, CA | <https://www.linkedin.com/in/deepak-kumar-y> | 669-340-6269 | [deepakramesh1000@gmail.com](mailto:deepakramesh1000@gmail.com) | Github

## EDUCATION

### San Jose State University

M.S., in Software Engineering (GPA: 3.81)

San Jose, CA

Graduation Date: May 2026

- Relevant Coursework: Enterprise Distributed Systems, Enterprise Application Development, Cloud Computing, Data Mining, Machine Learning, Deep Learning, Software Systems Engineering.

### Anna University

B.Tech., in Information Technology (GPA: 3.64)

Chennai, India

Graduation Date: Apr 2022

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Object- Oriented Programming, Operating Systems, Big Data Analytics, Artificial Intelligence.

## WORK EXPERIENCE

### Interlinked

Frontend Engineer Intern

San Jose, CA

May 2025 - Aug 2025

- Delivered faster disaster response for **5,000+** users daily by deploying **real-time alerts** using **Google Maps API** and geospatial datasets, allowing emergency teams to visualize high-risk zones instantly.
- Designed robust and user-friendly **login and registration modules** with **React.js**, **JavaScript**, and **RESTful APIs**, improving onboarding success rates by **40%** and reducing authentication issues.
- Elevated frontend performance by **30%** by implementing **lazy loading**, batching API calls, and refining state management using **React hooks** and **Context API**, resulting in a faster and smoother user experience.
- Partnered with backend engineers and data scientists to incorporate **real-time** environmental data into the dashboard, facilitating **AI-driven** risk predictions and improving disaster response accuracy by **20%**.

### Eurofins

Associate Software Engineer

Chennai, India

Jul 2022 - Jul 2024

- Developed scalable **RESTful APIs** using **Spring Boot** and **PostgreSQL**, boosting data retrieval efficiency by **35%** and enabling seamless integration across enterprise laboratory information systems.
- Enhanced backend performance by **40%** by refining SQL queries, introducing indexing strategies, and reducing API response times, resulting in a scalable and high-performing backend.
- Built **React-based** dashboards to visualize laboratory data and operational metrics, improving usability and allowing stakeholders to track samples, test statuses, and reports in real time.
- Collaborated with **cross-functional** teams to deliver compliant, and scalable laboratory management features, minimizing production defects by **25%** and elevating overall release quality and delivery timelines.

## TECHNICAL SKILLS

- Programming & Databases** — Java, JavaScript, Python, Golang, C++, SQL, MySQL, PostgreSQL, MongoDB.
- Full-Stack Development** — React.js, Redux, Next.js, Angular, TypeScript, Spring Boot, Node.js, Express.js, Django, GraphQL, HTML5, CSS3, Bootstrap, Tailwind CSS, Material-UI, Jest, JUnit, Mocha, TestNG.
- Cloud, DevOps & Tools** — Azure, GCP, Azure DevOps (CI/CD), Kubernetes, Docker, Terraform, Jenkins, SonarQube, Git, GitHub, Maven, Postman, Figma, Jira, Confluence.
- Data Engineering & Machine Learning** — Apache Kafka, Apache Spark, PySpark, Elasticsearch, TensorFlow, PyTorch, Scikit-learn, YOLOv8, OpenCV, TextBlob, NLP, Recommendation Systems, Information Retrieval.

## ACADEMIC PROJECTS

### Sentilytics (Real-Time Twitter Streaming & Sentiment Analysis — Kafka, Spark, Flask)

Jan 2025 - May 2025

- Architected a real-time data streaming platform using **Apache Kafka** and **Apache Spark** to ingest and process live tweets from **Twitter API**, achieving **<2s latency** from data collection to visualization.
- Performed **sentiment analysis** leveraging **TextBlob** and exposed processed insights via a **Flask** REST API, powering interactive dashboards with **Chart.js** and **Leaflet.js** for geographic sentiment mapping and trending.
- Designed a scalable distributed architecture capable of handling thousands of tweets per minute, architecting fault- tolerant **Kafka message queues** and **real-time analytics** for sentiment trends and hashtag insights.

### DineScope (Full-Stack Restaurant Platform — React.js, Spring Boot, MySQL, Azure)

Aug 2024 - Dec 2024

- Engineered a full-stack restaurant discovery platform using **React.js**, **Spring Boot**, and **MySQL**, enabling users to search, filter, review, and manage restaurants with a seamless and responsive interface.
- Implemented secure authentication and **role-based access control** using **JWT** and **Spring Security**, ensuring data privacy and optimized access for users, business owners, and administrators.
- Deployed the application on **Azure Cloud** using **Docker** and **Terraform**, incorporated **Google Maps API** for geolocation-based restaurant discovery, and automated **CI/CD pipelines** with **Azure DevOps**.

## ACHIEVEMENTS

- Star Performer Award (Q3 2023, Eurofins)** — For exceeding delivery goals and boosting software quality.
- Bright Beginner Award (Q3 2022, Eurofins)** — For impactful project contributions from the outset.
- Coding Club Coordinator (Anna University)** — Mentored juniors, growing membership by 25% and supporting placement preparation.
