EDUCATION

Northeastern University Sep. 2022 - Dec. 2025

M.S. in Computer Science, GPA: 3.91/4.00

Zhongnan University of Economics and Law Sep. 2016 - Jun. 2020

B.S. in Economics (Taxation), GPA: 3.59/4.00

EXPERIENCE

TikTok May. 2025 – Aug. 2025

Software Engineer Intern

San Jose, CA, USA

Tech Stack: TypeScript, React, Tux-web, Tailwind, JSBridge, Sentry, Rush, Git

- Owned the redevelopment of Parental Control Linking features for **1M+** users, contributing to a unified **cross-platform** codebase in **React/TypeScript** to eliminate redundant engineering efforts across app and web.
- Targeted and optimized the feature's entry/login flow, resulting in a **20%+** boost in user conversion and a **30%** reduction in related user-reported issues.
- Facilitated **native-web** communication by integrating **JSBridge** modules for user authentication and device APIs, ensuring feature parity across the hybrid app.
- Strengthened the development lifecycle by implementing **Sentry** for proactive monitoring and standardizing team collaboration in a large monorepo with **Rush** and **Git**.

Bosch Sep. 2024 - Dec. 2024

Software Engineer Intern

Chengdu, China

Tech Stack: React, Redux, Django, JavaScript, MySQL, JWT, Webpack, Postman

- Developed a tax management platform for the finance team, reducing manual data processing time by **40%**.
- Built a responsive UI with **React & Redux**, using **React Lazy** to cut initial page load time by **50%**.
- Created 20+ secure RESTful APIs with Django & JWT, enabling robust user authentication and secure handling of critical financial files for the tax management platform.
- Optimized the build process with Webpack, reducing build times by **50%** and accelerating development cycles.

NIO Jul. 2024 - Sep. 2024

Software Engineer Intern

Shanghai, China

Tech Stack: JavaScript, Vue.js, Java, Spring Boot, Redis, MyBatis, Kafka

- In an SOA environment, built a full-stack code quality module **Spring Boot/Vue.js** for the developer portal, saving **5** hours/week of manual review time.
- Reduced critical API latency by 40% (500ms to 300ms) by implementing a Redis caching layer.
- Developed **10+** reusable **Vue.js** components for a shared library, accelerating UI development by **20%**.
- Developed a Kafka consumer for the Vehicle Data Service, contributing to a 3x increase in pipeline throughput.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, C++, Java
- **Web Development:** HTML/CSS, React, Vue, Bootstrap, Material UI, Node.js, Spring Boot, Django, jQuery,
- **Databases & Technologies:** MongoDB, MySQL, Redis, MyBatis, Git, Docker, AWS, Selenium, NumPy

PROJECTS

CloudEase: Comprehensive Cloud Storage Solution

- Built a cloud storage system using **React** (frontend) and **Spring Boot** with **MyBatis** (backend).
- Supported bulk uploads, resumable transfers, file previews, and file management (CRUD).
- Leveraged **MySQL** for storage, **Redis** for caching, and **FFmpeg** for media processing.
- Enabled secure, resumable uploads using **SparkMD5** and **Promises** for concurrent handling.
- Deployed on **AWS (EC2, S3)** with **Docker** for horizontal scaling and high availability.
