

Rugved Redkar

Chicago, IL – 60607 | +1 (414)-855-7057 | rugvedredkar02@gmail.com | [linkedin.com/in/rugvedredkar02](https://www.linkedin.com/in/rugvedredkar02)

EDUCATION

University of Illinois Chicago (UIC), Chicago, IL — Master of Science in Management Information Systems (May 2026) **GPA: 4.0/4.0**
Coursework: Enterprise Application Development, Advanced Database Management, Data Science and Analytics, Business Data Visualization, Project Management, Vendor Management, Marketing, Operations Management, Supply Chain Management

Mumbai University, Mumbai, India — Bachelor of Engineering in Electronics and Telecommunication (Jun 2022) **GPA: 3.25/4.0**
Coursework: Data Structures and Algorithms, Computer Networking, Database Management Systems, Object-oriented Programming Labs (Java), Mobile Networking, Satellite Communications, Signals and Systems, Statistics and Mathematics.

TECHNICAL SKILLS

- **Backend Development:** Java, Python, C++, Node.js, Express.js, Microservices Architecture, MVC Architecture, JSON, XML, Unit Testing
- **Frontend Development:** React, JavaScript, HTML, CSS, Material UI, Responsive Design.
- **Database & Data Engineering:** MS SQL Server, SQLite3, SQL, ETL Pipeline Design, Data Modeling, Database Optimization, API Testing
- **Data Science & Analytics:** Python, R, Jupyter Notebook, Statistical Analysis, Machine Learning, Data Visualization (Tableau).
- **Cloud & DevOps:** AWS, Azure, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, Cloud Architecture.

WORK EXPERIENCE

C2I Biz Solutions Private Limited

Full Stack Software Developer | Java, Eclipse, Microsoft SQL Server Management Studio Nov 2022 – Aug 2024

- Built Java modules using JSP, Servlets, and Oracle DB, improving performance by 25% through optimized logic and OOP-based algorithms.
- improved SQL performance routines by enhancing extraction logic for complex datasets, improving data processing efficiency, and reducing query runtime.
- Resolved 80% of client issues in Jira through detailed testing and SQL-based validation, improving issue turnaround speed and client satisfaction.
- Delivered data to DMS databases ahead of deadlines using stored procedures and Java batch processes, supporting on-time release cycles.
- Led three developers to design and implement the data migration process and deployed Drop 1 to streamline data transition.

Awaiting Adventures Tours and Travels

Web Developer Intern | ReactJS, Microsoft SQL Server Management Studio Feb 2022 – Mar 2022

- Developed responsive React.js interfaces that improved user experience, reduced page load times by 30%, and ensured seamless interaction across all major devices and browsers.
- Designed and managed structured databases by writing refined SQL query logic for CRUD operations, indexing, and data validation, improving retrieval speed and overall system performance.
- **Collaborated in Agile sprints**, participating in code reviews, stand-ups, and delivering features ahead of deadlines.

Wise Trader Academy

Web Developer Intern | HTML-CSS, JavaScript, SQLite3 Oct 2021 – Dec 2021

- Developed responsive and accessible web pages using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and device responsiveness. Built and optimized SQL queries in SQLite3 to manage, validate, and retrieve data from relational databases.
- Collaborated with designers and backend developers to integrate REST APIs and deliver scalable end-to-end web solutions.
- Debugged and resolved UI and UX issues using browser dev tools, reducing user-reported problems by 40% and improving front-end stability.

PROJECTS

Meeting Scheduling Application (IDS 517 Enterprise Application Development) — React.js, Flask (Python), SQLite3, Amazon Web Services

- Led design and development of a cross-platform meeting scheduler using React.js, Flask, and SQLite, enabling real-time meeting creation, scheduling, and conflict detection.
- Hosted on AWS (S3 frontend, EC2 backend) to ensure scalability, reliability, and high availability, achieving 99% uptime in test deployments.
- Developed functional modules including Google OAuth login, meeting creation, RSVP management, and analytics dashboards (poll-based charts), improving decision-making efficiency by 30%.
- Integrated a prototype AI chatbot to automate scheduling support, increasing feature completeness, and enhancing user assistance.

Data Migration — Java, Eclipse, Microsoft SQL Server Management Studio

- Updated backend Java logic to fetch client-provided data and load it into DMS tables during batch execution via a URL-triggered workflow.
- **Enhanced Java processing pipelines** by integrating dataset automation, improving data refresh reliability, and reducing manual intervention.
- Conducted comprehensive health checks on DMS and client databases (1M+ records), delivering actionable insights that improved data quality and reduced inconsistencies by 15%.
- Developed and optimized stored procedures to load data into Distribution Management Systems, streamlining policy re-migration for testing and improving data flow efficiency by 20%.

One Portal (Portal for data of Insurance agents for INCOME) — Java, Eclipse, Microsoft SQL Server Management Studio

- Developed extraction logic and stored procedures across two databases, validating 200K+ records with 100% accuracy and ensuring data integrity.
- Optimized system processing flows and implemented coding best practices, reducing recurring bugs by 70% and enabling the successful deployment of Drop 1 for 50+ client users, with Drop 2 in development.
- Collaborated with business analysts to turn client requirements into scalable database solutions that improved migration and reduced defects.
