

Alec Dulan

Senior Software Engineer Pueblo, CO | 585-355-8708 | alec@dulan.net

PROFESSIONAL SUMMARY

Senior Software Engineer with 12+ years of experience designing, developing, and maintaining scalable backend and full-stack systems. Proven expertise in Java, Python, C#, REST APIs, and cloud-native architectures on AWS. Strong background in CI/CD, system performance optimization, and production support. Proven record succeeding in remote first environments. Adept at owning the full SDLC, mentoring engineers, and collaborating cross-functionally to deliver high-impact software solutions.

CORE SKILLS

Programming Languages: Java, Python, C#, PHP, JavaScript, ASP.NET

Web Technologies: REST APIs, HTML, CSS, XML, JSON

Databases: SQL Server, PostgreSQL, MySQL

Cloud & DevOps: AWS (ECS, Lambda), Docker, CI/CD Pipelines

Messaging & Monitoring: Kafka, New Relic, Datadog

Tools: Git, GitHub, SVN, Jira, Confluence, Claude

Practices: SDLC Ownership, Agile/Scrum, Software Troubleshooting, Performance Optimization, System Scalability

PROFESSIONAL EXPERIENCE

Lead Software Engineer

eSchedule | Remote | November 2018 – Present

- Owned end-to-end SDLC for multiple backend services, designing and delivering RESTful APIs to support a mobile application used by production customers.
- Designed, developed, and maintained scalable APIs using ASP.NET, PHP, JavaScript, and SQL-based databases.
- Led CI/CD pipeline improvements, increasing deployment reliability and reducing release friction.
- Optimized existing applications to improve performance, scalability, and system stability.

- Provided Tier 3 production support, troubleshooting complex backend issues and resolving customer-impacting defects.
- Mentored junior developers through code reviews, technical guidance, and best-practice adoption.

Senior Software Engineer

Capital One | Remote | March 2015 – October 2018

- Developed, enhanced, and maintained Java and Python REST APIs deployed on AWS ECS and AWS Lambda.
- Collaborated closely with product managers and stakeholders to translate business requirements into technical solutions.
- Led security initiative to encrypt a legacy SOAP API in coordination with a third-party vendor, improving data protection and compliance.
- Supported production systems, diagnosing issues, implementing fixes, and improving system resilience.
- Partnered with upstream and downstream engineering teams to define integration requirements and API contracts.

Software Engineer

Harris Corporation | Rochester, NY | January 2012 – January 2014

- Developed and maintained automated test solutions using C# for Department of Defense waveform applications.
- Implemented bug fixes and new features across three applications in a collaborative team environment.
- Provided programming support for custom Android OS maintenance and defect resolution.

Software Test Engineer – Intern

Harris Corporation | Rochester, NY | January 2010 – January 2011

- Developed five Android applications for internal testing and validation purposes.
- Executed manual and automated tests on Falcon III radio software.
- Documented and tracked over 100 defects in Jira, supporting quality assurance and release readiness.

Computer Science Lab Instructor (Teaching Assistant)

Marist College | Poughkeepsie, NY | September 2009 – December 2011

- Assisted instruction for Introductory Computer Science courses.
- Created and delivered lab lesson plans focused on Java and JavaScript fundamentals.

- Supported students with debugging, problem solving, and core programming concepts.
-

EDUCATION

Marist College, Poughkeepsie, NY

Master of Science – Software Development, May 2012

Bachelor of Science – Computer Science, May 2011

WEAKNESS

- Being able to format a PDF with optimal page break locations
