

Ashwini Biradar

Boston, Massachusetts | +1 774-526-5470 | abiradar@umassd.edu

Education

University of Massachusetts Dartmouth

Sep 2024 - Present

Master of Science, Computer Science

- **Coursework:** Paradigmatic Software Development, Adv. Computer System, Artificial Intelligence, Adv. Data Mining, Database Design, Large Language Model, Big Data Analytics

Savitribai Phule Pune University

Jun 2018 - Jun 2022

Bachelor of Engineering, Computer Science

- **Coursework:** Software Engineering & Project Management, Design & Analysis of Algorithm, Computer Organization & Architecture, Database Management Systems, Embedded System & IOT, Data Mining & Warehousing, Web Technology, Information & Cyber Security

Skills

- **Languages & Framework:** Java, Python, C, C++, JavaScript, SQL, HTML, CSS, Spring, Spring MVC, SpringBoot, Programming Skills, Software Development Frameworks
- **Backend & Database:** MySQL, PostgreSQL, MongoDB
- **Development Tools:** Eclipse, Visual Studio Code, PyCharm, Android Studio, JUnit, Postman, SoapUI, Git, GitHub, Bitbucket, Jenkins, Version Control Systems
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, Athena, DynamoDB, Quicksight, IAM), Docker, Kubernetes
- **Project Management & Agile Tools:** Jira, Rally, Microsoft Project, KanbanFlow, PowerPoint, MS Excel, Teams, Analytical Skills

Work Experience

Datsura

Jun 2025 - Sep 2025

Cloud Integration Intern

Virginia, USA

- Developed and deployed scalable RESTful APIs and microservices using Python (Flask, FastAPI) on Microsoft Azure, contributing to robust backend performance and setting the stage for distributed system enhancements.
- Implemented OAuth 2.0 and token-based authentication, bolstering API security and reducing unauthorized access incidents by 40% in integrations with Fiserv (DNA, Premier) and FIS (Horizon, IBS).
- Streamlined data mapping and transformation between internal models and external banking platforms, leveraging analytical skills to accelerate partner onboarding by 25% and aligning with industry standards for technical excellence.
- Authored detailed technical documentation and test plans using Git for version control, contributing to 100% audit-readiness and ensuring compliance with industry standards; collaborated with cross-functional teams to align technical solutions with business goals.

Fidelity Information Services India Private Ltd

Jun 2022 - Jul 2024

Software Engineer

Bangalore, India

- Designed and deployed scalable backend solutions using Java, Spring Boot, and Microservices, enhancing system performance and modularity.
- Engineered and integrated RESTful APIs for internal and external systems; designed efficient MySQL schemas using Object-Relational Mapping for optimal data flow.
- Conducted thorough unit and integration testing with JUnit and Postman, increasing code coverage and reliability by 25%, reducing production issues.
- Identified and mitigated security vulnerabilities in the Profile Banking system, aligning with compliance standards and reducing security risk exposure.
- Collaborated within Agile/Scrum teams using Git for version control and Jira for workflow management to continuously refine the design and functionality of software features.

Xenstack Solutions India Pvt Ltd

Oct 2020 - Jul 2021

Devops Engineer Intern

Pune, India

- Deployed and managed containerized applications using Docker and Kubernetes, reducing environment setup time by 40%.
- Monitored and optimized CI/CD pipelines using tools like Jenkins, significantly improving build reliability and deployment speed.
- Collaborated with cross-functional teams to streamline the Software Development Life Cycle (SDLC) and align with DevOps best practices.
- Gained hands-on experience with cloud infrastructure provisioning, log monitoring, and version control using GitHub.

Projects

Smart Medication Tracker (SMT)

- Built a medication tracking app with real-time reminders, dose calendar, and refill alerts using React Native and Firebase.
- Integrated LLM-based assistant for side-effect analysis and implemented backend services in Node.js..

Serverless BI Dashboard with Amazon QuickSight

- Built an end-to-end business intelligence pipeline using AWS services to simulate real-time analytics for inventory and sales data.
- Designed a serverless architecture integrating DynamoDB (data source), Athena (SQL engine), and QuickSight (dashboard) with automation via Lambda and secure access managed through IAM policies.

Worker Safety Detection System

- Designed a deep learning model to detect PPE compliance using VGG16 and OpenCV on a dataset of 9,000+ images.

Automated Timetable Display System

- Developed a digital display solution for academic schedules with Python scripts and MySQL integration.
- Automated real-time timetable updates using Raspberry Pi for on-campus deployment.

Publication

- Data Intelligence and Cognitive Informatics, Springer (ICDICI 2022 Conference). *Applied Deep Learning for Safety in Construction Industry*
