EDUCATION

Master of Science in Computer Science

Indiana University Bloomington, USA

GPA: 3.9/4

Aug 2024 - May 2026

Bachelor of Engineering in Computer Science

Chaitanya Bharathi Institute of Technology, India

GPA: 4/4

Dec 2020 - May 2024

WORK EXPERIENCE

Associate Instructor | Indiana University Bloomington

Introduction to Python Programming II

Jan 2025 – Present

Bloomington, IN, USA

- Instructed and supported 30+ undergraduate students in Python, data structures, recursion, and algorithmic problem solving, contributing to improved assignment completion rates and exam performance across the class.
- Designed and facilitated hands-on labs covering text analysis, trees/graphs, and introductory ML workflows using NumPy, Pandas, and Matplotlib, reducing debugging turnaround time and increasing code quality in student submissions.

Software Developer Intern | Renaissance Life and Health Insurance Company of America

ReactJs, NextJs, NodeJs, ExpressJs, Python, PostgreSQL, AWS (EC2, RDS), Docker

May 2025 - Dec 2025

Indianapolis, IN, USA

- Engineered microservice-based REST APIs using NodeJs and ExpressJs, Dockerized and deployed on AWS EC2 with PostgreSQL (RDS), supporting 50K+ policyholders and enabling real-time eligibility and claim status lookups.
- Built and optimized server-rendered React and NextJs modules for the enrollment portal, reducing form submission errors and improving page responsiveness for both members and administrators.
- Automated compliance and claims reconciliation pipelines using Python and PostgreSQL, eliminating 10+ hours per week of manual reporting through scheduled validation and audit trail generation.

Software Engineer | Indiana University Maurer School of Law

ReactJS, Flask, Python, PostgreSQL, Pandas, OpenCV, D3.js, Docker

Nov 2024 – Dec 2025

Bloomington, IN, USA

- Architected and delivered a full-stack research platform using React and Flask, enabling search, filtering, and visualization of 10K+ international court documents across multiple tribunals (ICC, ICTY, KSC, STL).
- Developed automated text and image redaction detection pipelines with Python, OpenCV, and PostgreSQL, improving classification accuracy using regex and contour-based analysis.
- Created interactive D3.js dashboards to analyze redaction frequency and trends, enabling researchers to perform real-time drill-down analysis across courts and case types.

Full Stack Developer Intern | PHN Technologies Ltd.

ReactJs, NodeJs, ExpressJs, Python(Flask), MongoDB

Apr 2023 - Apr 2024

Pune, India

- Built a component-driven React frontend for a hospital management and patient monitoring system, delivering reusable modules for dashboards, live tracking, and appointment scheduling.
- Trained and integrated a machine-learning chatbot on a 4K+ record medical dataset, achieving 88% prediction accuracy for symptom-to-disease classification and basic remedy suggestions.

TECHNICAL SKILLS

Programming & Databases: Python, Java, JavaScript, TypeScript, PHP, SQL, PostgreSQL, MySQL, MongoDB

Web Technologies: ReactJs, React Native, VueJs, NodeJs, Angular, ExpressJs, Spring Boot, RESTful API development, FastAPI, HTML5, CSS3, Bootstrap, Selenium, Cypress

Tools: Git, Docker, Kubernetes, Postman, Jira, Linux, Lighthouse, Vercel, Tableau

Cloud Technologies: AWS (EC2, RDS, S3), Azure Devops

PROJECTS

Job Application Tracker | *Tech stack:* ReactJs, JavaScript, NodeJs, ExpressJs, MongoDB, REST APIs, JWT, HTML5, CSS3, Git

- Developed a full-stack job tracking and ATS analysis platform enabling users to manage applications and compare resumes against job descriptions.
- Implemented an ATS scoring engine that parses resumes and JDs, computes keyword match percentages, and highlights missing skills, helping users improve resume relevance by 30–40% during testing.
- Deployed secure JWT-based authentication and REST APIs to support persistent, user-specific workflows and reliable client-server communication.

TranscribeIU | *Tech stack:* VueJs, Vite, TypeScript, Playwright, NodeJs, HTML5, CSS3

- Created a browser-based ASR transcript review platform for analyzing and editing transcripts generated from Whisper and Azure Speech APIs.
- Delivered a Vue 3 + Vite frontend with real-time audio-text synchronization, speaker segmentation, and inline redaction editing, and implemented end-to-end testing with Playwright for file handling and playback workflows.
