PROFESSIONAL SUMMARY

Software Engineer pursuing an M.S. in Computer Science with strong foundations in data structures, algorithms, and object-oriented programming. Experienced in designing, developing, and maintaining backend software solutions using Java, Python, SQL, and REST APIs. Comfortable working in collaborative Agile environments, debugging production issues, and delivering clean, scalable, and reliable code.

EDUCATION

University at Buffalo, The State University of New York — M.S. in Computer Science

Dec 2025

Koneru Lakshmaiah University (KL University), India — B.Tech in Computer Science

May 2024

EXPERIENCE

Software Engineer

May 2023 – Jul 2024

AUDREE LLP, India

- Collaborated with senior engineers to design, develop, and maintain backend software components for a production analytics platform. Translated business and functional requirements into reliable server-side implementations.
- Developed backend logic using Java, Python, and SQL, applying data structures and object-oriented design to ensure correctness and maintainability. Supported database operations and server-side scripting for data ingestion and reporting workflows.
- Debugged and resolved application issues through log analysis, testing, and code reviews. Participated in Agile ceremonies and contributed to continuous improvement of development processes.

PROJECTS

Startup Validation Platform (Backend Services)

2025

- Designed and implemented backend services using Java, Spring Boot, and PostgreSQL to support application workflows. Ensured clean separation of concerns and scalable service design.
- Built REST APIs with input validation and transactional data handling to maintain data integrity. Focused on readable, efficient, and maintainable code.
- Added unit and integration tests to validate functionality and prevent regressions. Iterated on features through reviews and debugging.

Job Market Intelligence Platform

2025

- Developed backend data pipelines using Python and SQL to ingest and process large datasets. Applied validation and cleanup logic to ensure accurate outputs.
- Wrote optimized queries for aggregation and reporting use cases. Ensured consistent and correct data delivery to downstream consumers.
- Supported analytics visualization by validating backend outputs and documenting data flows. Improved reliability through iterative refinement.

AI-Powered Fitness Microservice

2025

- Built backend APIs to ingest, validate, and store user activity data using structured server-side logic. Designed APIs for easy integration and future extension.
- Implemented testing and debugging practices to ensure stable behavior across environments. Strengthened error handling and data validation.
- Assisted with deployment and monitoring on cloud infrastructure. Performed post-deployment verification and fixes.

TECHNICAL SKILLS

Programming: Java, Python, SQL, JavaScript

Backend Development: REST APIs, Server-Side Scripting, Microservices

Core CS: Data Structures, Algorithms, Object-Oriented Programming

Databases: PostgreSQL, MySQL

Cloud & Tools: AWS, Git/GitHub, Docker

Practices: Agile/Scrum, Debugging, Testing, Code Reviews

CERTIFICATIONS

AWS Certified Cloud Practitioner

AWS Certified Solutions Architect – Associate
