

Meghana B

Software Engineer | +1(910)-802-0757 | bmeghana323@gmail.com | Durham, NC

Summary

Software Engineer with 2+ years of experience in building web and mobile applications. Proficient in developing accessible user interfaces using **Angular** and creating secure backend services with **Node.js**, **Express**, and **.NET**. Experienced in integrating **REST APIs**, deploying applications on **AWS**, and automating **CI/CD** processes using **Docker** and **Jenkins**. Utilizes **Generative AI** tools such as **GitHub Copilot**, **ChatGPT**, and **Cursor** to enhance development speed, code quality, and documentation. Focused on performance, accessibility, and collaboration within **Agile** environments.

Skills

Programming Languages: JavaScript, TypeScript, C#, Python

Frameworks & Libraries: Angular, React, .NET, Node.js, Express.js, Redux, Bootstrap

Web Technologies: HTML5, CSS3, RESTful APIs

Databases: MySQL, Oracle, PostgreSQL

Tools & Platforms: Git, Jenkins, Figma, Adobe Illustrator, Miro, Postman

AI & Automation: GitHub Copilot, Cursor, ChatGPT API integration

Cloud & DevOps: AWS (S3, EC2), Docker, Microsoft Azure, Google Cloud Platform (familiarity with core services), CI/CD pipelines, Microservices architecture

Testing & Methodologies: Jasmine, Jest, Cypress, Karma, A/B testing, Agile, Scrum

Collaboration: Strong communication with cross-functional and distributed teams

Experience

Software Engineer

03/2024 — Current

BELK, Inc

Charlotte, NC

- Modernized and optimized the company's enterprise eCommerce platform, improving performance, accessibility, and conversion rates.
- Delivered high-quality, scalable web applications using **Agile** and **Scrum**, ensuring continuous delivery and quick iteration cycles.
- Developed accessible, responsive **UIs** with **Angular**, **TypeScript**, **HTML5**, **CSS3**, **Tailwind CSS**, and **Sass**, meeting **WCAG 2.1 accessibility** standards.
- Collaborated with designers to translate **Figma** wireframes into pixel-perfect UIs, ensuring consistency and brand alignment across devices.
- Built modular **Angular** components and services, integrating **RESTful APIs** for seamless data flow and enhanced performance.
- Developed backend services using **Node.js** and **Express**, implementing **JWT authentication** and enforcing security best practices using **CORS** and **HTTPS** headers.
- Utilized **GitHub Copilot** to improve code productivity and consistency, reducing development time on repetitive logic.
- Diagnosed and resolved production issues through root cause analysis, optimized performance with **lazy loading**, **caching**, and **CDN integration**.
- Optimized **MySQL** queries to enhance database efficiency and scalability on **AWS**, including **S3** and **EC2** deployments.
- Streamlined development workflows using **Jenkins CI/CD** pipelines, automating testing, build, and deployment processes.
- Collaborated across teams through **JIRA** and **Bitbucket**, ensuring transparent progress tracking and clear communication.

- Maintained code quality through **unit testing** with **Jasmine** and **Karma** and detailed technical documentation.
- Worked closely with internal stakeholders and external vendors to ensure data integrity and resolve UI issues in customer-facing platforms.
- Environment: Angular, HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, Node.js, Express, Figma, MySQL, AWS (S3, EC2), Jenkins, Jasmine, Git, Bitbucket, JIRA.

Software Engineer

01/2021 — 07/2021

CUREMETRIC HEALTH TECH

Hyderabad, India

- Developed responsive and interactive web applications using **Angular**, **TypeScript**, **Bootstrap**, and **Material-UI**.
- Built reusable **Angular components** and implemented **RxJS** for efficient state management and asynchronous data handling.
- Designed and developed **RESTful APIs** and backend services with **ASP.NET Core (C#)**, ensuring secure, scalable integrations with **Oracle** databases.
- Wrote efficient **SQL** scripts for **CRUD** operations and database migrations, optimizing performance for large-scale health data systems.
- Conducted unit and integration testing using **Jasmine** and **Karma**, integrating them into **CI/CD** pipelines with **Jenkins** and **Azure DevOps**.
- Conducted **API** testing with **Postman** and addressed **cross-browser compatibility** for a consistent user experience.
- Deployed and maintained applications using **AWS** cloud services, ensuring uptime and scalability.
- Participated in **Agile** ceremonies, sprint planning, retrospectives, backlog refinement, contributing to team collaboration and process improvement.
- Environment: Angular, HTML5, CSS3, JavaScript, TypeScript, Material-UI, NPM, .NET, C#, ASP .NET Core, Oracle, Mocha, Chai, GitHub, AWS, Agile/Scrum.

Education

12/2023 | **University of Central Missouri** — MO

Master's Computer Science

Coursework: Advanced Web Applications and Services Development, Machine Learning, Advanced Databases Systems, Introduction to Cloud Computing, Advanced Algorithms, Compiler Design and Construction.
