EDUCATION

University of Alabama at Birmingham, Master of Computer Science, GPA: 3.5/4	Jan 2023 – Dec 2024
Shri Vishnu Engineering College for Women, Bachelor of Computer Science	Jul 2016 – Sept 2020
Courses: Design and Analysis of Algorithms, Advanced Web Development, Database Management Systems, System Design, Network Security, Cloud Computing & Distributed System, Machine Learning Applications	

SKILLS

Programming Languages:	Java, C, C++, JavaScript, Python, TypeScript
Database:	MySQL, Oracle, SQL, PostgreSQL, MongoDB
Web Frameworks:	React.js, Redux, Node.js, Angular, REST API, HTML, CSS, JDBC, Bootstrap, jQuery, Maven, Spring Boot, Agile, Servlets, Microsoft Authentication Library (MSAL), Material UI, Tailwind CSS, Axios, Konva, Azure Graph API, Moment.js, Express, Vite
Tools:	GitHub Actions, Docker, Azure Cloud, Sentry, Selenium, Linux, SDLC, NPM, Jest, Junit, TestNG, Jira, LaTeX

WORK EXPERIENCE

Software Engineer, One Community Global, Remote, USA	March 2025 – Present
- Developed a LinkedIn auto-poster with Node.js, Express.js, and MongoDB, automating scheduled publishing for 200+ posts weekly. - Streamlined cron jobs with batch processing, reducing inactive user flagging time from 2 hours to 20 minutes and streamlining email reminders. - Enhanced GitHub analytics by integrating 5K+ contribution records with user profiles, improving mentor/team assignment accuracy by 30%. - Built and refined React.js modules (People Report, Weekly Summaries, Event Registration, Job Board), increasing reporting accuracy for 1,000+ users and resolving 50+ UI/UX issues to improve accessibility by 25%.	
Software Engineer, Accenture, Hyderabad, India	Sept 2020 – Dec 2022
- Engineered an interactive web app using ReactJS and Konva.js, enabling engineers to annotate complex P&ID schematics for Petrofac projects. - Designed and deployed RESTful services within a microservices architecture, ensuring seamless frontend–backend communication for 10,000+ active users. - Accelerated performance by applying Redux and Axios, reducing API latency by 80% and cutting data retrieval time for 50K+ records from minutes to 15 seconds. - Automated CI/CD pipelines using Jenkins and GitHub Actions, accelerating delivery cycles by 40%, while ensuring quality with Jest + React Testing Library achieving 80%+ coverage. - Produced 10K+ MTO reports using react-print-pdf with P&ID overlays and secured data with Azure Graph API role-based authentication.	
Engineering Intern, OpenText, Hyderabad, India	June 2019 – Feb 2020
- Created automation test cases for Content Server using Java, Selenium, and TestNG, validating 50+ UI workflows in an Agile environment. - Executed edge case scenarios, achieving 88% test coverage and ensuring reliable regression testing. - Collaborated with cross-functional teams via Jira and Confluence, improving defect resolution efficiency by 20%.	

PROJECTS

Event Management System React.js, Spring Boot, MySQL, HTML, CSS	June 2023 – July 2023
- Delivered a full-stack event management platform supporting 100+ active users, with CRUD operations, user authentication, and event scheduling, reducing manual event coordination effort by 60%. - Structured 3+ normalized relational schemas and optimized 10+ complex MySQL queries with proper indexing strategies, improving query response times by 35%. - Implemented seamless client-server communication using REST APIs across 15+ endpoints and applied best practices for error handling, reducing system errors by 40% during testing.
