

AMIT CHOUGULE

Full Stack Software Engineer | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PA USA Remote | 667-372-8157 | amitchouguleack@gmail.com

PROFESSIONAL SUMMARY

Full Stack SWE (5+ Yrs) | AWS, React, Node.js, Microservices | 40% Latency Reduction | Serverless & LLM Specialist

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript (ES6+), C#, Python, Java, HTML5, CSS3, SQL.
- Frontend Development: React.js, Next.js, Vue.js, Angular, Redux, Tailwind CSS, Responsive Web Design.
- Backend & API: .NET Core/Framework, Node.js, Express, FastAPI, Django, Java Spring Boot, RESTful APIs, GraphQL, Microservices Architecture, SaaS Architecture.
- Cloud & DevOps: Amazon Web Services (AWS - EC2, S3, Lambda), Serverless Architecture, IIS, Docker, Kubernetes, CI/CD (Jenkins), Infrastructure as Code (Terraform), Git.
- Data & Storage: PostgreSQL, MongoDB, Redis, SQL Server, SSRS, NoSQL, Performance Tuning.
- Security & Documentation: OAuth2, JWT, Unit/Integration Testing (Jest, Mocha), Technical Writing, SDLC Security, OWASP.

PROFESSIONAL EXPERIENCE

SANTANDER CONSUMER | Software Engineer (Full Stack) Dallas, TX (Remote) | Jan 2023 – Present

- System Scalability: Architected scalable full stack system designs using React and Node.js, increasing total platform capacity by 30% for high-traffic fintech applications.
- Microservices & Latency: Directed Microservices Architecture implementation using Docker and Kubernetes to ensure sub-second latency and 99.9% high availability for distributed systems.
- Database Optimization: Executed performance tuning for PostgreSQL and MongoDB clusters, achieving a 40% reduction in API response times and enhancing data retrieval efficiency.
- Frontend Efficiency: Spearheaded a reusable UI Component Library using React, reducing frontend development cycles by 25% across multiple engineering teams.
- AI Integration: Integrated Large Language Models (LLMs) and engineered prompt logic to automate internal documentation, improving developer productivity and workflow automation.

ACE HARDWARE CORP | Software Engineer (Full Stack) Oak Brook, IL | Feb 2021 – Sep 2022

- API Performance: Optimized RESTful API endpoints for large-scale e-commerce platforms, maintaining 99.9% uptime during peak holiday traffic periods.
- Mobile-First Development: Developed responsive web applications using React and Vue.js, ensuring 100% mobile-first compatibility and improving cross-device user retention.
- Cloud Migration: Facilitated legacy-to-AWS Cloud Infrastructure migration, leveraging Lambda and S3 (Serverless Patterns) to boost scalability and cost-efficiency by 25%.
- DevOps Workflow: Modernized CI/CD pipelines and DevOps workflows using Jenkins and Git, increasing release velocity and deployment reliability by 25%.

PROFESSIONAL DEVELOPMENT

- AWS Certified Solutions Architect (Udemy) – Cloud Architecture & Infrastructure Design
- Advanced Full Stack Engineering – Distributed Systems & Node.js Architecture
- AI & Large Language Model (LLM) Integration – Prompt Engineering & Vector Databases
