Professional Summary

Software Engineer with **3+** years of experience specializing in **Java**, **Python**, and **C++**, with strong hands-on expertise in Java for backend services and enterprise systems. Experienced in designing and developing high-performance distributed applications, optimizing computationally intensive modules, and building large-scale data pipelines. Hands-on experience integrating **AI/ML** and **Generative AI** capabilities into applications, including working with **large language models (LLMs)**, **prompt engineering**, and **AI-driven APIs** on **AWS**. Strong foundation in **data structures**, **algorithms**, **concurrency**, and **system design**, combined with practical experience in **cloud platforms (AWS)**, **CI/CD automation**, and **Microservices architecture**. Adept at collaborating across global teams, debugging complex systems under production pressure, and delivering robust solutions in Agile environments.

Work Experience

Software Engineer | PayPal, San Jose, CA

June 2023 – Present

- Developed and maintained backend services using **Java** and **Spring Boot framework**
- Designed and implemented **RESTful APIs** to communicate between frontend and backend systems.
- Developed frontend components using **HTML**, **CSS** and **JavaScript** ensuring compatibility across different browsers and devices.
- Built **Angular** components and UI services to consume the rest of the services using Component based architecture provided by Angular.
- Designed and developed **Microservices** using **REST** framework and Spring Boot and used **Bootstrap** along with **React JS** in creating the Application.
- Built **REST APIs** to consume AI model outputs and integrate them with Java-based backend systems.
- Developed Single Page applications using **AngularJS** & components, directives using **Typescript**.
- Developed Maven scripts and developed builds using continuous integration like **Jenkins**.
- Developed integration modules for clients using **Apache Camel** and also developed a core routing framework for Verizon National Preorder using Apache Camel.
- Worked with **AWS AI services (Amazon Bedrock)** to integrate Generative AI capabilities into applications.
- Managed the deployment of new releases using **Jenkins** and optimized queries to extract, transform, and analyze data.
- Ensured **secure, scalable deployment** of AI solutions using AWS IAM, logging, and monitoring.
- Deployed and managed database containers using **Docker** and **Kubernetes**, enabling efficient local development and testing environments
- Experience in working with different operating systems like Windows, Unix /Linux.
- Developed AI-driven features using prompt engineering, API integration, and cloud-native architectures.

System Engineer | Flipkart, Bangalore, IND

July 2022 - December 2022

- Developed full-stack features using **Angular** for the frontend and **Spring Boot** for the backend, enhancing user experience and customer engagement.
- Integrated **RESTful APIs** with **Angular** services for dynamic data interaction and real-time updates.
- Investigated and resolved production issues by analyzing logs, debugging, and collaborating with cross-functional teams.
- Monitored and maintained **AWS**-hosted production environments (**EC2**, **RDS**, **S3**, **Lambda**, **CloudWatch**), ensuring high availability and performance.
- Built integrations across **Microservices** and third-party **APIs** to support enterprise workflows.
- Led on-call rotations by troubleshooting high-priority incidents and implementing incident mitigation strategies.
- Gained hands-on experience with distributed systems, containerization, database internals, and backend scalability.

Software Engineer | Virtusa, Hyderabad. India

January 2022 - March 2022

- Developed and tested backend services using **Java** and **spring** for an Online Recharge Management System.
- Created automated **Postman** test collections for **API** performance validation.
- Integrated frontend components using **ReactJS** and managed databases with **SQL Server 2016** and **MySQL**.
- Executed testing, debugging, and documentation, contributing to a 98% defect-free deployment.
- Worked in an **Agile** environment collaborating closely with cross-functional teams.

Technical Skills

Languages: Java, Python, Ruby, C++, JSP, Spring Boot, Hibernate, Shell (Linux, UNIX), Node JS, React JS, HTML, CSS, Bootstrap, jQuery, Angular, Typescript

Database: Oracle (SQL/PLSQL), MS-SQL Server, MySQL, MongoDB, PostgreSQL, DynamoDB

Testing: Junit, Selenium, Postman, Mockito, SonarQube

Data Integration: Pentaho, Tableau, WordPress, Amazon QuickSight

Others: Generative AI, AWS Bedrock, AWS, Microsoft Azure, GitHub, Bitbucket, SVN, JIRA, Jenkins, Docker, Maven, Kubernetes, Git, Apache, GitLab.

Education

Master of Science, Computer Science [GPA: 3.75]

2022 – 2024

University of Memphis at Tennessee
