

JAVA DEVELOPER

AKSHARA

St. Louis, MO ♦ (314) 325-6147 ♦ akshara.kumar072@gmail.com

PROFESSIONAL SUMMARY

5 Years of experience in the field of IT in designing, developing, and deploying applications built on **Java**, **Spring Boot framework**, using **microservices architecture**. Expertise in leveraging **Spring Boot**, **Microservices**, and **RESTful APIs** to create high-performance solutions while adhering to best practices in software quality, including **Test Driven Development (TDD)** and code analysis tools such as **Sonar**. Experienced with **object-oriented programming (OOP)** and Java-based frameworks to design and implement scalable applications. Utilizes analytical skills to identify and troubleshoot complex issues efficiently. Strong understanding of the software development life cycle and best practices in coding standards. Knowledgeable **software developer** with a solid background in **Java development**. Contributed to impactful software projects, enhancing application performance and reliability. Demonstrated skills in problem-solving and effective debugging. Proficient in **relational database** management across various platforms, including **Oracle**, **MSSQL**, **MySQL**, as well as **NoSQL** databases such as **MongoDB**, and event-driven messaging with **Apache Kafka**. Recognized for strong problem-solving abilities and effective collaboration in Agile environments, consistently delivering robust software solutions aligned with business objectives.

SKILLS

- Java 8, 17
- Spring Boot 3
- Spring Data JPA
- Microservices architecture
- Design patterns
- Object-oriented programming (OOP)
- Relational Databases-Oracle, MSSQL, MySQL
- NoSQL Database-MongoDB
- IntelliJ IDEA and Eclipse
- Maven, Gradle Build tools
- Selenium
- SonarQube
- Splunk, Dynatrace
- Exception handling
- Generics
- Spring framework
- Spring Security configurations
- Spring Actuator
- RESTful API development
- HTML, CSS, JSP
- React and JavaScript development
- Apache Kafka
- Jenkins CI/CD
- Docker and Kubernetes
- JUnit testing
- Mockito
- Postman, Swagger
- Git version control, GitHub Copilot
- JIRA
- Agile, Scrum, Waterfall

EDUCATION

- **B. Tech (Bachelor of Technology)** from **JNTU-Hyderabad** India, 2019

WORK HISTORY

Java Developer, United Parcel Service, NJ

June 2025 - Current

- Developed and maintained **Java 8, Java 17/Spring Boot 3** microservices for a modular logistics platform, focusing on backend API development, database design, and integration with delivery status updates.
- Designed and developed **RESTful APIs** and **microservices** as part of a **scalable enterprise application**, enabling real-time package tracking and operational visibility.
- Developed and integrated **Java microservices with Apache Kafka** for asynchronous messaging and event-driven communication between distributed systems.
- Implemented **producers and consumers**, handling high-volume data streams, ensuring reliable message delivery, and maintaining system scalability.
- Deployed and managed microservices on **AWS**, including EC2 Instances, S3, RDS and Lambda, ensuring high availability and scalability.
- Worked with **AWS S3** for storing logs, configuration files, and static resources, and developed **AWS Lambda** functions to automate background tasks and workflows within the microservice architecture.
- Implemented **unit and integration testing** using **JUnit and mocking frameworks**, and performed API testing with **Postman** and automated tests with **Selenium** to ensure reliable backend services.
- Utilized **SonarQube** for code quality analysis, identifying vulnerabilities and maintaining clean, maintainable code.
- Gained exposure to **React** for internal dashboards and tools, supporting full-stack application visibility for internal teams.
- Monitored application performance and resolved production issues using **Dynatrace distributed tracing** and **Splunk logs**, ensuring high system availability and reliability.
- Leveraged **Splunk Logs** for **root cause analysis (RCA)** during production incidents, collaborating with DevOps and QA teams to resolve critical issues.
- Managed **code versioning and collaboration using GitHub**, including code reviews, branching strategies, and pull requests.
- Worked with **Docker** to containerize services and supported deployment in **Kubernetes clusters**, collaborating with DevOps teams for smooth releases.
- Configured **CI/CD pipelines using Jenkins** for automated testing and deployment of microservices.
- Communicated technical issues and their **business impact** effectively to stakeholders, enabling informed decision-making and faster problem resolution.

Skills: Java 8, Java 17, Spring Boot 3, Spring Data JPA, Splunk, Dynatrace, Sonar, GitHub Copilot, AWS, Apache Kafka, Microservices, React, Docker, Kubernetes, Jenkins, REST API, Maven, Gradle, JUnit, Postman.

Jr. Java Developer, PayPal, CA

March 2023 – June 2025

- Designed, developed, and maintained **Java and Spring Boot-based microservices** for transaction processing, user authentication, and fraud detection in a high-volume payments platform.
- Implemented **Spring Boot features** including REST controllers, exception handling, validation, and security to build resilient backend services.
- Built and optimized **RESTful APIs** supporting internal systems and partner integrations for secure payment workflows.
- Containerized applications using **Docker** and deployed them on **Kubernetes** to ensure scalability, fault tolerance and high availability.
- Utilized **CI/CD pipelines using Jenkins** to automate build, test, and deployment processes, enabling faster and more reliable releases.
- Improved system performance by reducing transaction response time by 20% through backend optimizations and **Kafka-based message processing**.
- Optimized database access using **Spring Data JPA**, improving query performance through indexing and caching strategies.
- Extensively used **Splunk** to monitor and analyze logs of Spring boot microservice across lower and higher environments, identifying errors, exceptions, and performance issues.
- Supported performance testing and production deployments by validating application stability via **Dynatrace** metrics.
- Collaborated with senior engineers, QA, and DevOps teams in Agile sprints, participating in daily stand-ups, sprint planning, and code reviews.

Skills: Java 8, Spring Boot, Spring Security, Spring Data JPA, REST API, Jenkins CICD, Docker, Kubernetes, Microservices, JUnit, Kafka, Splunk, Dynatrace, Agile, Git, Maven.

Java Software Engineer, HCL Technologies, Hyderabad, India

January 2022 – April 2022

- Developed **backend services and REST APIs** using **Java, Spring Boot**, and **Spring Data JPA** to support employee management, attendance tracking, and leave workflows.
- Designed and optimized **database interactions** to ensure efficient data retrieval and high application performance.
- Implemented **unit and integration testing** using **JUnit and Mocking frameworks**, significantly improving code quality and reducing defect rates.
- Utilized **Git** for version control systems to streamline development processes and facilitate easier code integration and collaboration.

- Built and maintained projects using **Maven** for dependency management and application packaging.
- Collaborated with **cross-functional teams** to gather requirements, contribute to software architecture design, and deliver project milestones on time.
- Participated in **code reviews** to identify improvements, enforce best practices, and maintain high coding standards.
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.
- Developed **reusable components** that reduced development effort and improved consistency across multiple projects.
- Documented **technical process and development methodologies** to support knowledge sharing and future maintenance.

Skills: Java, Spring Boot, Spring Data JPA, Oracle, REST API, Maven, Git, JUnit, Mockito, SQL, Agile, Unit testing, Integration Testing, Code reviews,

Java Programmer, Rishva Technologies, Hyderabad, India

March 2020 – December 2021

- Built an Expense Tracker app using **Java, Spring, SQL, REST API, Maven, and JUnit**, implementing full **CRUD functionality** and end-to-end testing.
- Designed and integrated **RESTful APIs** to enable seamless data exchange between backend services and client applications.
- Documented **technical specifications and development process** to support maintainability and future onboarding.
- Proactively sought mentorship from senior developers and actively participated in **code review** sessions, resulting in continuous learning and professional growth.
- Continuously learned and applied **emerging Java and Spring frameworks** to align with evolving project requirements.
- Participated in **Agile development** practices such as **Scrum** and daily stand-ups, promoting efficient teamwork and communication.
- Utilized version control systems like **Git** for effective source code management and collaboration among team members.
- Integrated RESTful APIs into Java applications, enabling seamless data exchange between systems.

Skills: Java, SQL, Spring Boot, REST API, Testing, JPA, Git, JUnit, Agile, MySQL, Maven.
