

PROFESSIONAL SUMMARY

Java Full Stack Developer with 3+ years of experience delivering scalable, secure, and high-performance enterprise applications. Strong expertise in **Core Java 8+, Spring Boot, Spring MVC, and Microservices**, with solid knowledge of **OOP principles, multithreading, and Agile/Waterfall SDLC**. Proficient in frontend technologies including **ReactJS, Angular, Vue.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, jQuery, and AJAX**. Hands-on experience with **RESTful and SOAP APIs, ORM frameworks (JPA, Hibernate, Spring Data JPA), and SQL/NoSQL databases such as Oracle, MySQL, PostgreSQL, MongoDB, Cassandra, and DynamoDB**. Experienced in **AWS and Azure cloud development, CI/CD pipelines using Jenkins, Git, and Maven/Gradle**. Strong focus on application security using **OAuth, JWT, SSL, SAML, OpenID Connect**, and event-driven systems with **Kafka, RabbitMQ, and ActiveMQ**, along with **automated testing, Postman/Swagger API validation, SonarQube, and JIRA-based collaboration**.

SKILLS

Languages	: Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Backend Technologies	: Spring Framework (Spring Boot, Spring MVC, Spring Security, Spring Data, Spring Batch), RESTful Web Services, Microservices Architecture, SOA, Hibernate, JPA, JDBC
Frontend Technologies	: React.js, Angular, Node.js, jQuery, AJAX, JSON, Bootstrap, Material-UI, Responsive Web Design
Databases & Storage	: Oracle, MySQL, PostgreSQL, MongoDB, Cassandra, Redis
ORM Frameworks	: Hibernate, JPA, Spring Data JPA, Spring JDBC
Cloud & DevOps	: AWS (EC2, S3, Lambda, RDS, IAM, CloudWatch), Azure(App Service, Azure SQL, Storage, Azure AD, Monitor)Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines, Maven, Gradle
Testing & Quality	: JUnit, Mockito, TestNG, Selenium, Postman, Integration Testing, Regression Testing, Performance Testing
Tools & Methodologies	: Git, Agile/Scrum, TDD, OOD, Apache Kafka, Apache Tomcat, Confluence, Jira, Splunk
Authentication & Security	: OAuth, JWT Tokens, Azure Active Directory, RBAC
Messaging Systems	: Apache Kafka, RabbitMQ, ActiveMQ, Azure Service Bus, AWS SQS
Operating Systems & IDEs	: Windows, Linux, IntelliJ IDEA, Eclipse, Visual Studio Code

PROFESSIONAL EXPERIENCE

BANK OF AMERICA – CHARLOTTE, NC
JAVA FULL STACK ENGINEER | MAY 2024 – PRESENT

- Engineered and deployed **RESTful microservices** using **Java and Spring Boot** following **Service-Oriented Architecture (SOA)** and **Microservices architecture** to support high-volume, real-time transactional and fraud-detection workloads.
- Designed and implemented **Spring Cloud API Gateway** with **OAuth-based security**, enabling secure, scalable service-to-service communication using **JSON** data formats across distributed systems.
- Built robust **data persistence layers** using **Spring Data JPA (Hibernate ORM)** with **PostgreSQL** as the primary SQL database and **MongoDB** for NoSQL storage, optimizing query performance and data availability.
- Integrated **Apache Kafka** for **event-driven messaging**, enabling asynchronous processing, decoupled microservices, and improved system throughput and fault tolerance.
- Developed responsive **front-end interfaces using ReactJS**, along with **HTML, CSS, JavaScript, and Bootstrap**, delivering intuitive, performant user experiences integrated with backend REST APIs.
- Built and optimized **CI/CD pipelines using Jenkins** from a developer standpoint, managing builds with **Maven**, source control with **Git**, enforcing quality gates via **SonarQube**, implementing centralized logging using **Log4j**, and deploying applications on **AWS** using services such as **EC2, ECS/EKS, S3, RDS (PostgreSQL), DynamoDB, IAM, ALB, and CloudWatch**.
- Implemented comprehensive **automated testing strategies** using **JUnit and Mockito** for backend services, **Jest/Mocha/Chai** for UI testing, **Cucumber and Citrus** for service automation, **Protractor** for end-to-end testing, and API validation using **Postman, SOAP UI, and Swagger UI**.
- Followed **Agile (Scrum)** methodologies, actively participating in sprint planning, daily stand-ups, reviews, and retrospectives, while **mentoring junior developers**, conducting code reviews, with cross-functional teams using **JIRA** to track sprints, defects, and deliverables.

UNITEDHEALTH GROUP – BENGALURU, INDIA
FULL STACK ENGINEER | DEC 2022 – JUN 2023

- Developed and deployed **RESTful microservices** on **Microsoft Azure** using **Java and Spring Boot**, following **Agile SDLC**, and implementing **Service-Oriented Architecture (SOA)** and **Microservices architecture** for secure healthcare application workflows.

- Implemented centralized API management using **Spring Cloud API Gateway**, securing services with **OAuth**, and standardizing inter-service communication through **JSON-based payloads**.
- Designed the data access layer using **Hibernate ORM**, working exclusively with **MySQL**, and optimized transactional queries to improve system performance and data consistency.
- Built scalable and maintainable **Angular applications**, leveraging **component-based architecture, services, routing, and reactive forms**, along with **HTML, CSS, JavaScript, and Bootstrap** to deliver consistent and responsive user experiences.
- Integrated **RabbitMQ** for asynchronous messaging between microservices, improving fault tolerance, message reliability, and decoupling across distributed application components.
- Automated backend and UI testing using **JUnit and Mockito** for service-level validation, **Karma and Jasmine** for Angular UI testing, and performed API validation using **Postman, SOAP UI, and Swagger UI**.
- Implemented **DevOps practices** by building **Jenkins-based CI/CD pipelines** from a developer standpoint, managing builds with **Ant**, source control using **Git**, and enforcing code quality standards through **SonarQube** and structured code reviews.
- Provisioned and managed cloud infrastructure using **Terraform (Infrastructure as Code)** on Azure, enabling consistent environment setup, repeatable deployments, centralized logging with **Log Insight**, and sprint tracking using **JIRA** while collaborating closely with cross-functional teams.

UNITEDHEALTH GROUP – BENGALURU, INDIA
JUNIOR JAVA FULL STACK ENGINEER | JUL 2021 – DEC 2022

- Developed and maintained a **monolithic web application** using **Spring MVC, Servlets, and JSP** following the **Waterfall SDLC methodology**, supporting structured phase-based development and formal documentation standards.
- Implemented **RESTful web services** within the monolithic architecture, handling **XML-based data exchange** between application layers and external systems.
- Designed and implemented the persistence layer using **JPA** (chosen uniquely for this project), enabling object-relational mapping and streamlined database interactions.
- Built dynamic user interfaces using **Angular**, along with **HTML, CSS, JavaScript, and Bootstrap**, ensuring consistent UI behavior and seamless integration with backend controllers.
- Worked exclusively with **Oracle Database** as the backend relational database, developing and optimizing SQL queries to support transactional business operations.
- Implemented **unit and integration testing** using **JUnit and Mockito** for backend components, and **Karma and Jasmine** for AngularJS UI testing to ensure functional correctness.
- Managed source code using **SVN**, maintaining version history and supporting collaborative development across multiple release cycles.
- Automated application builds using **Ant**, implemented application logging with **Log4j**, and tracked development tasks, defects, and change requests using **TFS**, ensuring traceability throughout the Waterfall lifecycle.

EDUCATION
Texas Tech University – Lubbock, TX <i>Master of Science, Computer Science 2023 - 2025</i>

CERTIFICATIONS
• AWS Certified Cloud Practitioner (2024)
