

PREETI VASAIKAR

Dallas, TX | +1 (682) 298-9135 | preetivasaiakar05@gmail.com | [LinkedIn](#)

CAREER OBJECTIVE

Aspiring Software Engineer with demonstrated proficiency in Python, Django, Flask, and RESTful API architecture, complemented by full-stack expertise in React.js, MySQL, and MongoDB. Adept at applying object-oriented paradigms, Agile methodologies, and cloud-native solutions on AWS to engineer scalable, high-performance applications and integrate advanced machine learning models.

EDUCATION

The University of Texas at Dallas

Master of Science, Computer Science | GPA: 3.72

Dallas, TX

Exp: May 2026

Mumbai University

Bachelor of Engineering, Computer Engineering | GPA: 3.63

Maharashtra, India

May 2024

CORE SKILLS AND COMPETENCIES

Leadership, Communication, Problem-solving, Debugging, Adaptability, Collaboration Skills, Strategic Planning

TECHNICAL SKILLS

Languages & Web:	Python, Java, JavaScript, HTML5, CSS
Frameworks:	Flask, Django, React.js
Databases:	MySQL, MongoDB, Firebase
Tools & Platforms:	Git, AWS, Hadoop, CI/CD pipeline
Methodologies & Concepts:	Agile, Object-Oriented Programming(OOP), RESTful APIs, LLMs

PROFESSIONAL EXPERIENCE

Bharat Petroleum (Franchise)

Software Developer Intern

Mumbai, India

Aug 2023 - May 2024

- Built and deployed a web application using Python (Flask) and React.js, reducing average customer checkout time by 25%.
- Designed and optimized an inventory management system with MySQL and MongoDB, improving stock accuracy by 30% and minimizing product shortages.
- Developed and integrated RESTful APIs for sales and customer data; automated reporting dashboards in React.js increased data-driven decisions by 40%.

FeyNN Labs

Machine Learning Intern

Remote

May 2023 - Jul 2023

- Contributed to AI product/service prototyping, with a focus on business and financial modeling, optimizing resource allocation, and reducing time to market by 10%.
- Leveraged market segmentation using machine learning and data analysis tools, utilizing Python, pytorch and TensorFlow to train models on large datasets (80K+ entries).
- Collaborated with cross-functional teams to translate business requirements into technical solutions, accelerating the product development cycle by 25%.

NOTABLE PROJECTS

KRISHI MADAD: A Machine Learning Application to Aid Farmers

May 2024

Python, TensorFlow, Django, Firebase, HTML, CSS, Git

- Built a machine learning app using TensorFlow for crop prediction, disease detection, and fertilizer recommendations, achieving 95% crop prediction and 92% disease detection accuracy with field-collected data.
- Developed an e-market platform prototype with Firebase and Django, integrating features for seamless crop transactions and providing insights on government schemes for farmers.

Personalized Health Tracker Web App

May 2023

Python, Flask, JavaScript, HTML, CSS, MySQL, Git

- Developed a secure web app with dashboards and MySQL database, enabling 200+ users to track health metrics and boost medication adherence by 30%.
- Built automated notifications and visual reports using JavaScript and CSS, which increased timely health checkups among users by 25.
