

Jonathan Garcia Arias

Software Engineer | Backend & Full-Stack Developer

US Citizen | 843-575-8242 | jonathanjg1103@gmail.com | GitHub [Jon2301a](#) | [Jon118170](#) | linkedin.com/in/jonathan-garcia-arias

SUMMARY

Software Engineer (Backend / Full-Stack) with hands-on experience building secure, scalable REST APIs using Spring Boot, JWT authentication, and cloud services (AWS, Azure). Strong foundation in data structures, database design, and production-ready backend systems.

EDUCATION

Bachelor of Science in Information Technology (Software & Systems Focus)

University of South Carolina - Beaufort

August 2025

GPA: 3.724

Honors: Deans' List, Chancellor's List, President's List

Related Coursework: Data Structures & Algorithms, Object-Oriented Programming I & II, Database Systems, Computer Architecture

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C#, SQL

Backend & APIs: Spring Boot, Spring Security, REST APIs, JWT, OpenAPI/Swagger

Frontend: React.js, HTML, CSS

Databases: PostgreSQL, SQL Server, SQLite

Cloud & DevOps: AWS, Azure, Docker, GitHub Actions

Tools & Practices: Git, GitHub, Postman, CI/CD, Automated Testing, Agile Development

Core Concepts: Data Structures & Algorithms, OOP, API Design, Database Modeling

EXPERIENCE

Handshake Inc.

September 2025 – Present (Contract / Fellowship)

AI Trainer – Expert Handshake MOVE Fellowship | Remote

- **Evaluated** and refined domain-specific prompts to assess large language model reasoning quality and correctness.
- **Analyzed** system outputs for accuracy, clarity, and edge cases, contributing to iterative improvement in AI-driven workflows
- **Collaborated** with engineers and researchers to identify failure patterns and improve evaluation criteria.

University of South Carolina Beaufort

Makerspace Assistant Intern

June - July 2025

- Developed and refined interactive CAD-based software workflows used by 10+ students for digital fabrication projects.
- Improved tooling reliability and usability through iterative testing and feedback, increasing adoption by 10-15%
- Supported technical troubleshooting and system improvements in a fast-paced academic lab environment.

PROJECTS

MyBeaufortView – Full Stack Social Media Web Platform

August 2025 – Present

Java, Spring Boot, Spring Security, React, PostgreSQL, AWS S3, Flyway, OpenAPI/Swagger

- **Designed and implemented** a **Spring Boot REST API** supporting multi-role users (guest, privileged, admin) with JWT-based authentication and authorization.
- **Documented and standardized REST endpoints using OpenAPI/Swagger**, enabling clear API contracts and improving frontend-backend collaboration.
- **Modeled** a relational PostgreSQL schema and managed versioned database migration using Flyway.
- **Built paginated feed APIs** and DTO-based responses to support scalable content browsing.
- **Integrated AWS S3** presigned uploads for secure image storage and retrieval
- **Wrote controller, repository, and security integration tests to validate** authorization rules and API behavior.

DormHub – Full Stack Web Application

April – May 2025

React, Spring Boot, PostgreSQL, Render, Netlify, Node.js, Java, SQL

- **Built** a full-stack application enabling administrators to assign dorm tasks and manage student activities.
- **Implemented** RESTful APIs and a React frontend to support task assignment and status tracking.
- **Set up** CI/CD pipelines using GitHub Actions and deployed the system to cloud hosting platforms.

Calenvisor – Scheduling Application

April - May 2025

C#, .NET, SQL Server, Azure

- **Designed** and implemented an object-oriented backend modeling core scheduling entities (Students, Advisors, Meetings, Availability, Locations) with clear separation between UI and domain logic.
- **Built** a centralized database utility to manage connections and execute parameterized stored procedures, improving maintainability and security.
- **Enforced** scheduling integrity through backend and database-level constraints, preventing double-booking and invalid time overlaps.
- **Developed end-to-end CRUD** workflows enabling advisors to manage availability and students to book appointments.

EXTRACURRICULAR ACTIVITIES

Techstars, Boulder, CO

Participant, Local Techstars Startup Weekend

March 2024

- Collaborated with a cross-functional team to design and prototype a solution aimed at improving downtown visitor engagement.
- Contributed to UX/UI design, technical feasibility discussions, and final pitch presentation under a 54-hour deadline.
