EDUCATION

Stevens Institute of Technology
Master of Science in Computer Science
GPA: 3.85 / 4.0

Hoboken, NJ, United States
Sep 2023 - May 2025

Chinese Culture University
Bachelor of Science in Computer Science

Taipei, Taiwan
Sep 2017 - Jun 2021

EXPERIENCE

Mamon11
Software Engineer

Miami, FL (Remote)
Dec 2025 - Present

- Developed an automated quoting engine using Koa.js, integrating multiple third-party APIs to aggregate and normalize real-time pricing data, **reducing manual processing time by 80%**
- Implemented a request queuing and data processing layer to manage high-concurrency API calls, ensuring data consistency and maintaining server stability under peak traffic

Chicago Education Advocacy Cooperative
Software Engineer

Chicago, IL (Remote)
July 2025 - Dec 2025

- Developed a full-stack education data dashboard using React, Flask, and PostgreSQL, integrating public datasets from 50+ school districts, **increasing community engagement by 40%**
- Co-developed The ChiEAC CARES Chatbot, a community-facing AI assistant built with GPT-based models and RAG pipelines to answer FAQs about educational programs and rights; **reduced staff response time by 65%**

SparkAmplify
Software Engineer

Pasadena, CA (Remote)
Jun 2024 - Jan 2025

- Developed a web application using React for designers to interact with the LoRA model, streamlining workflows and **reducing design iteration time by 50%**
- Created an AI-driven platform for educators using large language models to rephrase course materials into multiple English difficulty levels and automatically generate tailored assessments, **reducing manual workload for teachers by 80%**

Stevens Institute of Technology
Research Assistant

Hoboken, NJ
May 2024 - Sep 2024

- Developed data processing pipelines for **100,000+ heart rate and stress-related data points** and deployed machine learning models to predict user stress levels

Institute for Information Industry
Full Stack Software Engineer

Taipei, Taiwan
Jul 2020 - Jul 2021

- Designed an MVC-based Ticket System for web/Android, reducing server operation task response time by 40%

PROJECTS

EHR-Based Platform for Chronic Disease Risk Prediction

Jan 2025

- Developed a .NET-based platform utilizing GPT algorithms and advanced language models to analyze Electronic Health Records (EHR) for chronic disease risk prediction
- Engineered an automated data entry pipeline and deployed machine learning endpoints with optimized CI/CD workflows, significantly enhancing system reliability and operational efficiency

Hackathon

Stevens QuackHacks | “Best Technical Implementation” award

Mar 2025

SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, C++, C#

Database & Data Stores: MongoDB, MySQL, PostgreSQL, Redis

Web Technologies: React, Redux, Flask, Node.js, Koa.js, Spring Boot, AJAX, HTML, CSS

DevOps: AWS, Git, Docker, Jira, Agile
