Professional Summary

Senior Java Backend Developer with 8+ years of experience building high-availability, transaction-intensive systems in financial services and telecommunications. Strong expertise in Java, Spring Boot, microservices, and enterprise integrations for large-scale payment platforms. Proven track record of improving performance, stability, and security in mission-critical environments while working in Agile, cloud-enabled ecosystems.

Technical Skills

Languages:

Java (Advanced), SQL (Intermediate), HTML (Basic), JavaScript (Basic), PHP (Basic)

Frameworks & Libraries:

Spring Boot, Spring WebFlux, Quarkus, JPA, REST APIs, Apache Kafka

Databases:

Oracle (Intermediate), PostgreSQL (Intermediate), MySQL (Intermediate)

Tools & Platforms:

Docker, Kubernetes (Basic), OpenShift, AWS (Intermediate), Git, Jira, Confluence, Bitbucket, Kiuwan, Linux

Methodologies & Practices:

Microservices Architecture, Clean Code, SOLID Principles, OOP, Agile/Scrum, CI/CD, Static Code Analysis

Professional Experience

Expert Java Developer (Client: Transbank Chile)

Zenta Group | Santiago, Chile | Aug 2022 – Dec 2025

- Architected and maintained decoupled, service-oriented middleware platforms using Java 8/17/21 and Spring Boot, supporting high-volume financial transactions with high availability requirements.
 - Enhanced performance and stability of critical payment services (debit, credit, refunds, authentication) by refactoring legacy components, reducing incident rates by an estimated 25%.
 - Developed and optimized Oracle SQL scripts for daily operational support, improving data correction and maintenance efficiency by approximately 30%.
 - Implemented Clean Code and SOLID principles across backend services, improving code maintainability and reducing technical debt.
 - Integrated Apache Kafka for event-driven communication, enabling real-time processing across distributed systems.
 - Executed static code analysis with Kiuwan, addressing IDC quality findings and improving overall code quality scores.
 - Deployed and managed containerized applications in OpenShift environments using Docker and CI/CD pipelines.
-

Senior Java Developer (Client: Transbank Chile)

Dynamic Dev SAC | Lima, Peru | Oct 2021 – Aug 2022

- Built and enhanced Java 8 and Spring Boot microservices supporting large-scale payment and authorization flows.
- Maintained mission-critical financial services, ensuring transactional integrity and system availability above 99.9%.

- Refactored backend components to improve scalability and response times, achieving an estimated 20% performance gain.
 - Created and maintained Oracle database scripts for production support, data updates, and corrective maintenance.
 - Collaborated in Agile teams using Jira, Confluence, and Git Flow, improving sprint predictability and delivery cadence.
-

Software Engineer

Ultrasoftdev SAC | Cusco, Peru | Mar 2019 – Jul 2021

- Developed Java-based backend solutions for telecommunications projects, focusing on data processing and system reliability.
 - Supported database-driven applications using MySQL, PostgreSQL, and Oracle, ensuring accurate KPI reporting and analysis.
-

Software Development Engineer

Claro (América Móvil) Peru SAC | Cusco, Peru | Jun 2018 – Dec 2018

- Designed and implemented Java-based analytical components to process RF network KPIs, improving visibility into congestion management.
 - Enabled data-driven decision-making by automating performance metric analysis for radio frequency networks.
-

Software Development Engineer

Movilnet C.A | Caracas, Venezuela | Feb 2015 – Jan 2018

- Designed and developed information systems to visualize mobile network KPIs, improving operational control and reporting efficiency.
 - Built Java-based applications (Spring Boot, Swing) and REST APIs, integrating MySQL and Oracle databases.
 - Implemented front-end components using JavaScript, Angular, HTML/CSS, and JQuery for internal web applications.
-

Eduaction

Systems Engineering

UNEXPO LCM | Caracas, Venezuela | 2006 – 2012

Certifications & Training

- PCI Standards & Information Security – Udemy, 2025
 - Java Programming & OOP Certification – 2023
 - English Grammar Training – Maximo Nivel, Ongoing
-

Languages

English: B2 (Professional working proficiency)

Spanish: Native
