

Siva Swathi Javisetty

Full Stack & Cloud Engineer | Backend & Infrastructure Specialist

Bradenton, FL

(214) 592-5264 ||javisettysivaswathi@gmail.com

PROFESSIONAL SUMMARY:

Python Full Stack & Cloud Engineer building and running production-ready web applications using Python (FastAPI, Flask, Django) along with React.js and Redux for frontend interfaces. Develop REST APIs, microservices, and event-driven systems that integrate smoothly with frontend apps. Hands-on experience with AWS services (EC2, Lambda, S3, RDS, DynamoDB), Docker, Kubernetes, CI/CD pipelines (Jenkins, GitHub Actions), and Infrastructure as Code (Terraform, CloudFormation) to deploy scalable and secure applications.

Worked on AI & ML integrations, including RAG & Vision models, OpenAI APIs, and LangChain, to provide real-time intelligent features. Handles Linux and Windows servers, deployments, environment configuration, monitoring, logging, troubleshooting, ticketing systems (JIRA, IT Helpdesk), and networking tasks such as TCP/UDP management, VPC design, subnets, routing, firewalls, VPN, and security monitoring. Focused on delivering secure, maintainable, and highly available systems, ensuring backend, frontend, cloud, DevOps, AI, and networking components work seamlessly together.

TECHNICAL SKILLS:

Programming & Scripting: Python (FastAPI, Flask, Django), Java (Spring Boot, Spring MVC, Hibernate/JPA), JavaScript, TypeScript, SQL, Bash/Shell Script, PowerShell, Groovy

Backend & API Development: RESTful APIs, Microservices, Event-Driven Systems, Asynchronous Processing, Authentication & Authorization (JWT, OAuth2, SSO, Cognito), Error Handling, Logging, Celery, AWS SQS/SNS, Background Jobs, Message Queues, Node.js/Express.js

Frontend Development: React.js, Redux, HTML5, CSS3, AJAX, Responsive UI Development, API

Cloud Platforms & Infrastructure: EC2, Lambda, S3, RDS, DynamoDB, IAM, VPC, Subnets, Route Tables, NAT Gateway, Security Groups, NACLs, Auto Scaling, Load Balancers (ALB/NLB), Route 53, CloudFormation, CloudWatch, ECS/EKS, Cognito, SQS, SNS, CloudTrail, Elastic Beanstalk, EBS, CloudFront, Secrets Manager, Systems Manager, API Gateway, WAF, GuardDuty, Azure(basics)

DevOps & CI/CD: Docker, Kubernetes, Jenkins (Groovy), GitHub Actions, Terraform, YAML/JSON pipelines, Build & Release Automation, Blue-Green and Rolling Deployments

AI & Machine Learning Integration: RAG & Vision Models, OpenAI APIs, Event-driven AI Workflows, Asynchronous Task Processing, Model Deployment in Docker/Kubernetes

System Administration & Operations: Linux and Windows Server Administration, Application Deployment, Environment Configuration, Monitoring, Logging, Troubleshooting, Patch Management, PowerShell automation scripts, User & Group Management, Ticketing Systems (JIRA, IT Helpdesk).

Networking & Security: VPC design, Subnets, Routing Tables, NAT, Firewalls, VPNs, TCP/UDP, DNS, DHCP, HTTP/HTTPS, Load Balancing (L4/L7), SSL/TLS, IAM Roles & Policies, RBAC, Security Hardening, Compliance Best Practices; hands-on monitoring and troubleshooting using ping, traceroute, netstat, ss, curl, lookup, tcpdump.

Databases & Caching: PostgreSQL, MySQL, SQL Server, MongoDB, Redis, DynamoDB, Schema Design, Query Optimization, Backup & Recovery

Testing & Quality Engineering: PyTest, JUnit, Selenium, JMeter, Postman, Unit Testing, Integration Testing, TDD Basics, Swagger UI.

Tools & Platforms: Git, VS Code, IntelliJ IDEA, Eclipse, Linux CLI, Bash/Terminal, PowerShell, Microsoft 365, Active Directory, System Monitoring Tools

PROFESSIONAL EXPERIENCE:

PM ACCELERATOR — StylePilot.ai | Full Stack & Cloud Engineer

Sep 2025 – Present

- Designed and implemented **end-to-end cloud-native solutions** for web and mobile platforms (Expo), integrating backend APIs, frontend components, and AI-powered **RAG & Vision recommendation chatbox** for real-time user interactions.
- Developed backend APIs using **Python FastAPI** and Node.js, handling authentication, business workflows, and frontend integration.
- Built modern UI components using **React.js**, integrating state management with Redux and routing with React Router.
- Implemented **distributed AI workloads** using **Celery and AWS SQS**, processing RAG & Vision model tasks asynchronously in Dockerized environments.
- Provisioned and managed AWS infrastructure: EC2, RDS (PostgreSQL), S3, Lambda, VPC, IAM, Security Groups, Auto Scaling, Route 53.
- Configured **CI/CD pipelines** with Jenkins (Groovy) and GitHub Actions, using **YAML/JSON templates** for automated environment-specific deployments.
- Monitored system, application, and network performance using CloudWatch and custom scripts, troubleshooting backend, infrastructure, and security issues.

Cloud Engineer — DhyanaHita Solution, Hyderabad, India

Sep 2022 – Jul 2024

- Designed, deployed, and maintained cloud infrastructure (AWS EC2, Lambda, S3, RDS, DynamoDB, ECS/EKS, CloudFormation, IAM, Security Groups, NACLs, Route 53).
- Configured compute, storage, database, networking, and security services to ensure high availability, cost optimization, and compliance.
- Implemented serverless workflows using Lambda & SQS/SNS for event-driven automation and asynchronous task processing.
- Automated infrastructure provisioning using Terraform and CloudFormation with **JSON/YAML templates**.
- Monitored cloud resources with CloudWatch, creating alarms, dashboards, and automated alerts for proactive maintenance.
- Designed and optimized databases (PostgreSQL, SQL Server, DynamoDB) for backend applications.
- Applied security best practices: IAM roles/policies, VPC setup, encryption, secure networking, and compliance monitoring.
- Built and maintained CI/CD pipelines for automated deployment and testing.

Savantis Solutions — IT Support & Networking Engineer, Hyderabad, India

Dec 2021 – Aug 2022

- Provided IT support for hardware, software, and network issues across Windows and Linux environments.
- Configured and maintained network devices including routers, switches, and firewalls; monitored connectivity and performance.
- Assisted in server administration, Active Directory management, user accounts, and permission controls.
- Installed, configured, and updated OS, applications, and security patches.
- Maintained SQL Server databases including queries, backups, and recovery operations.
- Environment: Windows Server, Linux, Active Directory, Cisco Routers & Switches, Firewalls, TCP/IP, VPN, SQL Server.

EDUCATION HISTORY :

Master of Science (M.S.) – Information Technology & Project Management

Indiana Wesleyan University — May 2025

CERTIFICATIONS:

- AWS Certified Cloud Practitioner
- Cisco Networking Essentials
- Hacker Rank Certifications: Python, SQL
- Azure Fundamentals
