

EDUCATION

Master of Science in Information Systems, GPA: 3.7

Aug 2023 – Dec 2025

Saint Louis University, USA

Bachelor of Technology

Aug 2019 – May 2023

SRM University, Amaravathi, India

WORK EXPERIENCE

Software Engineer: Kroger

Jan 2025 - Present

- Developed and maintained a scalable enterprise web application using **ReactJS** for the frontend and **Spring Boot** for backend RESTful services.
- Designed and implemented **secure, high-performance REST APIs**, enabling seamless integration across multiple internal and external systems.
- Built and optimized microservices-based architecture, improving system scalability, fault tolerance, and deployment flexibility.
- Implemented **CI/CD pipelines** using **Jenkins and Docker**, reducing deployment time and improving release stability across environments.
- Designed and managed **SQL Server database schemas**, optimizing queries and indexing to enhance application performance.
- Integrated **Kafka-based asynchronous messaging**, enabling reliable event-driven communication between distributed services.
- Implemented and fine-tuned **auto-scaling policies** to maintain high availability and cost efficiency for **distributed microservices**.
- Enhanced system observability by implementing **centralized logging, monitoring, and alerting**, improving issue detection and resolution time.
- Utilized LLM-based AI assistants (e.g., GitHub Copilot)** to enhance developer productivity by accelerating code generation, refactoring, unit test creation, and troubleshooting across microservices and frontend components.
- Technologies:** Java, Spring Boot, ReactJS, Microsoft Azure, REST APIs, Microservices, MS SQL Server, Docker, Jenkins, Kafka, Hibernate.

Software Developer: BECKONS SOFTWARE PVT LTD

May 2022 – July 2023

- Designed and developed** scalable microservices and enterprise applications using Java, Spring Boot, Spring MVC, and Hibernate, following **MVC and REST architectural principles**.
- Built** secure RESTful APIs supporting authentication and role-based authorization using **JWT**, integrating seamlessly with frontend applications and third-party services.
- Built an **automation test suite** for microservices in **Java**, deployed on **Jenkins (AWS EC2)**, reducing testing time by 30% and generating HTML test reports with automated email notifications.
- Developed **data processing and file generation modules** using optimized data structures and configuration-driven logic to support real-time application workflows.
- Integrated applications with **REST and SOAP services**, including external APIs (e.g., Google APIs), ensuring reliable data exchange across distributed systems.
- Implemented **asynchronous event-driven communication** using **Apache Kafka** and improved performance by caching frequently accessed data in **Redis in memory clusters**.
- Designed and managed **relational and NoSQL databases** using **MySQL, MongoDB, and PL/SQL**, enabling efficient handling of structured and unstructured data.
- Containerized applications using **Docker** and deployed services on **AWS (EC2, Kubernetes)**, ensuring high availability, scalability, and fault tolerance.
- Built and maintained **CI/CD pipelines** using **Jenkins**, automating builds, deployments, and test execution across environments.
- Technologies:** Java, Spring Boot, Spring MVC, Hibernate, REST APIs, JWT, React, Angular, HTML, CSS, Bootstrap, ZK, Kafka, Redis, MySQL, MongoDB, PL/SQL, Docker, Kubernetes, Jenkins, AWS, Maven, Postman, JUnit, Jest.

TECHNICAL SKILLS

- | | |
|--|--|
| Programming and Web Technologies: | C#, Java, Python, Node, JavaScript, Bootstrap, Ajax, HTML, CSS, Angular, JSON, Terraform |
| Databases: | Mongo DB, MS SQL, MySQL, Redis, Cosmos DB |
| Frameworks: | .NET Core, Entity framework, Apache Kafka, NodeJS, Nginx, Spring, Spring Boot, Micronaut framework |
| Tools and Libraries: | Git, Jenkins, Jira, Agile, IntelliJ, Docker, Android Studio, Kubernetes. |
| Azure: | AKS, Azure Cosmos DB, Redis, Blob. |
| AWS: | AWS Lambda, API Gateway, DynamoDB, S3, Step Functions, Serverless Architecture. |

ACADEMIC PROJECTS

Automated Online Testing System (Skills: JAVA):

- Adopted agile development methodology RUP (Rational Unified Process) to analyze requirements, develop use cases and improve code architecture with Object Oriented principles in every iteration.
- Developed online web application using JAVA.

Quora Question pairs (Skills: Python, Hadoop, Spark, Linux):

- Designed an algorithm to process the data by removing questions with non-ascii characters, stop words.
- Used Natural language processing and similarity metrics techniques to extract the features from the data.
