Education

Brown University

Master of Science, Computer Science

- GPA: 4.0/4.0

Providence, RI

Sep 2023 – May 2025

University of California-San Diego

Bachelor of Science, Mathematics-Computer Science

- GPA: 3.88/4.0; Data Science Minor; Provost Honor in Academic; Cum Laude Honor

San Diego, CA

Sep 2019 – Jun 2023

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C++, R, SQL

Frontend: React, Next.js, Semantic UI, Material-UI, Vite

Backend: Node.js, Express.js, Django, Spring Boot, FastAdmin

ML / CV: PyTorch, TensorFlow, YOLO, OpenCV, Scikit-learn

Cloud & DevOps: Git, AWS, Nginx, GitHub Actions, Docker

Work Experience

Deep Brain Tech

Software Engineer

Remote, United States

Sep 2025 – Present

- Engineered FogChess, a real-time multiplayer chess platform with **Node.js** and **TypeScript**, supporting cross-device gameplay and room-based matchmaking for immersive competitive learning.
- Extended **Katago** engines in Quantum Go AI, improving evaluation logic and automated game-state validation.
- Built website authentication, user session sync, and UI flow in **Next.js** for seamless player onboarding.

Artisk AI

Software Engineer Intern

Hoboken, New Jersey

Jul 2025 – Sep 2025

- Refactored and modularized architecture using **React** and **Node.js**, improving frontend component reusability and consistency across dynamic admin panels while standardizing shared UI state and reusable hooks.
- Built backend admin dashboard with MVC model of module management in **FastAdmin**, **JavaScript**, and **PHP**.
- Improved data latency responsiveness by optimizing synchronization and **MongoDB** aggregation pipelines.

Nanjing Luculent Software Co., Ltd

Software Engineer Intern

Nanjing, China

Jul 2023 – Sep 2023

- Optimized pipelines in **Python** and enhancing the **PyScript** frontend, improving UI responsiveness and reliability.
- Designed algorithms in **Flask** to refine thermal image interpretation, leading to 6% increase in detection accuracy.
- Automated regression testing by **PyTest** to cut error rates, reducing 25% debugging time at QA stages.

UCSD CSE Department

Computer Science Teaching Assistant

San Diego, CA

Dec 2021 – Jun 2023

- Assisted 1200+ students across 5 courses in **Java** and **C++** with algorithm assignments design.
- Built auto-grading toolchain with **JDB** checkers using **Python** and **Java**, reducing grading workload by 50%.

PingAn Stray Animal Intelligent Rescue Center

Software Engineer Intern

Nanjing, China

Jan 2022 – Jun 2022

- Developed pipelines in **Spring Boot** for rescue data transformation; designed statistical models using **JavaFX**.
- Enhanced CNN image model with **OpenCV** and **DJL**, improving image readability by 9% in dark conditions.

Projects

Online Purchase Business Management Platform

May 2025 – Jul 2025

- Developed full-stack online order platform in **TypeScript** using **React** and **Express.js** with RBAC and **Material-UI**.
- Utilized **Prisma** ORM and queried **Supabase** schema; deployed on Render to enable cloud-native scalability.

Campus Information Management Platform

Jun 2024 – Oct 2024

- Engineered a **Django** application with **RESTful** APIs and Docker deployment with **Semantic UI** frontend.
- Supported 100+ concurrent student records with secure deployment on **AWS EC2** for scalable schedule management.

Brown University Capstone Project Reintegrating AI

Feb 2024 – Jun 2024

- Integrated **YOLOv8** and **OpenCV** to extract structured data from videos and combined it with **OpenAI API** for semantic interpretation, boosting zero-shot literal retrieval accuracy by 13%.
