

Aditya Mantri

(817) 456-4749 | www.linkedin.com/in/aditya-mantri-679148202 | mantriaditya8@gmail.com

Education

University of Texas at Dallas

Bachelor of Science in Computer Science

GPA: 3.806 / 4.0

Graduated May 2023

- Computing Scholars Honors Program - 30 students admitted per year out of 800 total incoming CS freshmen. More intense and theoretically rigorous program
- Courses: Data Structures, Algorithms Analysis, Operating Systems, Computer Architecture, AI, ML
- Academic Excellence Scholarship – full ride | National Society of Leadership and Success member

Technical Skills

- Languages: Java, C++, Python, TypeScript, PostgreSQL, HTML/CSS
- Frameworks / Tools: React, Spring Boot, Kafka, Kubernetes, JUnit Testing
- Applications: Node.js, AWS (SaaS), Linux, Ansible, Git, Docker

Work Experience

Bloomberg *Software Engineer*

July 2023 – Present

- Designed and implemented multiple multithreaded gateways: enabling client connectivity to trading platform via FIX protocol, secured with Stunnel connection; live with 4 major banking clients – *Java*
- Client-facing role in distributed system, gaining deep familiarity with complex workflows and project architecture; successful deployments of deliverables into production – Linux environment
- Enhanced and customized Python automation scripts, performed data management tasks, implemented system configuration changes, executed component upgrades, and conducted thorough testing

Amdocs *Software Engineer Intern*

June 2022 – August 2022

- Designed and implemented end-to-end application for database-table transformation and deployment from scratch - *Java Spring Boot, Postgres, and Bash*; Agile Scrum software development
- Using REST APIs, users can provide different forms of input, which will be validated through backend using connection to local database and sent for transformation through Shell script
- UI developed using *ReactJS and HTML/CSS* – GET, PUT, and POST requests allow for user-provided input and retrieval of messages from backend

NGS Infonet *Cyber Security Intern*

July 2021 – August 2021

- Conducted bug fixes in Fortinet malware detection software, resulting in 1.3% increase in accuracy
- Created personal testing units and performed functional testing to discover detection weaknesses
- NSE 1, 2, 3 certified (Cyber Security certifications)

Cisco Systems *Software Developer Intern*

July 2019 – August 2019

- Supported cloud-managed wireless networking technology and reduced pipeline latency by 3%
- Developed HTTP connection-error detection software and administered application layer networking

Personal Projects

Hobby Matcher

- Hobby-matching application with ranking algorithm – *C++, MySQL, TypeScript, and HTML/CSS*
- User creates profile with hobbies/interests; profiles with similar hobbies match to connect
- Location-based services (radius) allow for users to limit search to members in their area; Redis cache
- Users can search for specific hobbies to connect with profiles of those interests; input w/ REST APIs

Flight Reservation System

- Users can check flight availabilities, book tickets, and refund tickets – *Java, Postgres, ReactJS, HTML*
- Users can search for specific flight details and all relevant flights (and details) are displayed
- Data stored efficiently via Postgres database with optimized search; flights retrieved via REST APIs
