6047208297

- Innovative full-stack developer with over 8 years of experience in software development, specializing in building high-performance, user-centric web applications.
- Proven expertise in frontend and backend technologies, UI/UX principles, agile methodologies, and software architecture.
- Strong communicator and collaborator with a track record of leading projects from concept to completion in both startup and enterprise environments.

Technical Skills

Web & Frontend

- React, Next.js, Vue.js, Angular 18, TypeScript, JavaScript (ES6+)
- Modular component architecture, performance optimization, SSR/CSR strategies
- Authentication & Identity: OAuth2, token-based auth, secure session handling
- Accessibility fundamentals (WCAG 2.1 AA), responsive design, UI/UX collaboration
- HTML5, CSS3, SCSS, Tailwind
- D3.js visualization

Backend & APIs

- Node.js, REST, GraphQL, microservices architecture
- API design, third-party integrations, SDK consumption
- Java (Spring Boot), .NET Core (service collaboration), Python

Databases

- MongoDB, DynamoDB, MySQL, SQL Server

Cloud, DevOps & Observability

- AWS (cloud-native application exposure)
- Kubernetes, OpenShift, CI/CD (Jenkins, GitHub, TeamCity)
- Monitoring & logging: Splunk, Dynatrace, Kibana

Testing & Quality

- Test Driven Development (TDD)
- Jest, React Testing Library, Cypress, xUnit
- Code reviews, documentation, engineering standards

Education

Master of Information System and Operation Management

University of Florida

January 2014 - December 2015

Gainesville, USA

Bachelor of Management in Information Management and Information System

Zhongnan University of Economics and Law

September 2009 - June 2013

Wuhan, China

Work Experience

Senior Software Developer

Royal Bank of Canada Wealth Management

March 2023 - Now

Vancouver, Canada

- Led front-end technical direction by defining coding standards, reusable templates, and architectural guidelines, while driving rigorous code reviews that ensured performance, accessibility, security compliance, and high-quality engineering practices.
- Built internal module generator tools to rapidly scaffold new VueJs/AngularJs + TypeScript modules, accelerating feature development and onboarding.
- Collaborated closely with product, UX, and backend engineering to design scalable UI flows and improve cross-team alignment.
- Led cross-functional debugging and collaboration across frontend and backend (C#/Java Spring Boot/Python) services to ensure reliable, scalable, and high-quality end-to-end delivery within Agile/Scrum workflows.
- Ensured web applications met WCAG 2.1 AA accessibility standards by implementing semantic markup, accessible component patterns, keyboard and screen-reader support, and collaborating with design and QA teams on accessibility validation.
- Designed and implemented reusable D3.js-based visualization components for charts and graphs, optimized for performance and cross-browser compatibility.

Full-Stack Software Developer

June 2022 - February 2023

ToursByLocals

Vancouver, Canada

- Built and shipped production React and Node.js applications powering a C2C marketplace with 5,000+ daily active users.
- Designed and implemented user-centric features such as registration flows, user profiles, search, and real-time messaging.
- Architected scalable backend services using Node.js, GraphQL/REST, MongoDB, and integrated with multiple third-party APIs.
- Improved performance and reliability through better API design, caching strategies, and frontend optimization.
- Introduced modern JavaScript best practices and mentored teammates, raising overall engineering quality and velocity.

Platform Software Engineer

June 2021 - February 2022

Saxo Fintech Technology Limited

Chongqing, China

- Developed a highly performant React and Node.js web dashboards displaying order and execution flows to HKEX.
- Implemented throughput visualizations and system-status monitoring across distributed backend services.
- Partnered with CTO and cross-functional departments for technical communication, documentation, and architecture alignment.

Full-Stack Software Developer

January 2019 - January 2020

Upwork.com

Remote

- Delivered end-to-end web solutions for multiple clients using React, Node.js, and REST APIs.
- Owned features from requirements through deployment, ensuring quality, performance, and maintainability.

Full-Stack Software Developer

May 2015 - August 2018

Elite Software Inc.

Gainesville, USA

- Built enterprise web applications using html5, CSS, MVC, JQuery and Ajax.
- Gained strong foundations in system design, API integration, and Agile development.
