

Karthik Saripalli | .Net Developer

Overland Park, KS | +1 (913) 357-3894 | karthiksaripalli0808@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

.NET Developer with **4 years of experience** designing and maintaining enterprise applications using .NET Core, ASP.NET MVC, C#, SQL Server, and Entity Framework. Proven record of developing RESTful APIs, optimizing SQL queries, and improving system efficiency through code refactoring. Skilled in CI/CD automation with Azure DevOps and deploying applications on Azure and AWS. Strong background in Agile development, ensuring secure, reliable, and high-performance solutions that meet business requirements and support organizational growth.

TECHNICAL SKILLS

Programming Languages: C#, Python, Java, SQL, JavaScript

Frameworks & Technologies: .NET Core, ASP.NET MVC, Entity Framework Core, Web API, LINQ, Clean Architecture, Microservices, Design Patterns

Front-End Development: Angular, HTML5, CSS3, Bootstrap, Responsive UI

Databases: SQL Server, MySQL, Stored Procedures, Views, Triggers, Query Optimization

Cloud Platforms: Microsoft Azure (App Services, Azure SQL, Azure DevOps), AWS (Elastic Beanstalk, RDS, S3)

DevOps & CI/CD: Azure DevOps Pipelines, Git, Bitbucket, Jenkins (exposure), Automated Deployment

Testing & Quality Assurance: XUnit, NUnit (exposure), Postman, Cucumber, Unit Testing, Test-Driven Development (TDD), API Testing

Web Services & Integration: RESTful APIs, SOAP Services, API Design & Integration, Authentication & Authorization (JWT, OAuth2)

Software Development Concepts: OOP, SOLID Principles, Repository Pattern, Clean Code Practices, Agile/Scrum, SDLC, Debugging & Troubleshooting

Tools & IDEs: Visual Studio, VS Code, Jira, Postman, Azure DevOps, Bitbucket

PROFESSIONAL EXPERIENCE

UnitedHealth Group, KS, USA

Jan 2025 - Current

.Net Developer

- Developed fifteen RESTful APIs using .NET Core, Entity Framework, and SQL Server, increasing backend data throughput by thirty percent, reducing system errors, and supporting over one million daily user transactions reliably.
- Reduced API response times by twenty-five percent using LINQ query optimization and C# refactoring, improving overall system performance, reducing server load, and enhancing responsiveness of enterprise-level distributed applications.
- Applied Clean Architecture and Repository Pattern, lowering post-deployment defects by twenty percent, improving code maintainability, scalability, and reusability across multiple enterprise applications with consistent standards and practices.
- Built automated CI/CD pipelines in Azure DevOps, reducing release cycle duration by forty percent, improving deployment consistency, and accelerating feature delivery across multiple cloud-hosted enterprise applications simultaneously.
- Deployed hybrid cloud solutions using Azure App Services and AWS S3, achieving ninety-nine-point nine percent uptime, secure storage, scalable access, and reliable global availability for enterprise users consistently.

Mphasis Limited, India

Sep 2021 - Jul 2023

Software Engineer | .Net Developer

- Developed web applications and backend services using .NET Core and ASP.NET MVC, improving data processing speed by twenty percent and supporting high-volume enterprise operations effectively.
- Created secure RESTful APIs with JWT and OAuth2 authentication, enabling integration between internal systems and client applications while reducing authentication-related failures by fifteen percent across applications.
- Implemented unit testing and Test-Driven Development using XUnit, reducing post-release defects by fifteen percent and increasing system reliability for multiple enterprise-level deployments with complex business logic.
- Optimized SQL queries, stored procedures, and indexes, reducing database execution time by twenty percent, improving application response, and supporting faster backend processing for high-volume transactions.
- Delivered features in Agile sprints while mentoring junior developers, collaborating across cross-functional teams, and improving team velocity and overall code quality for multiple enterprise-level projects successfully.

Cybage Software, India

Feb 2020 - Aug 2021

Junior .Net Developer

- Assisted in ASP.NET MVC application development, improving application functionality and reducing backend processing errors by fifteen percent across multiple client-facing modules and internal workflows efficiently.

- Integrated RESTful APIs with front-end components, ensuring seamless data flow, lowering system errors, and improving application responsiveness by twenty percent across multiple web applications successfully.
- Performed unit and API testing using Postman and NUnit, reducing post-deployment defects by fifteen percent and improving system stability, functional correctness, and user experience consistently.
- Participated in code reviews and debugging, improving code quality, adherence to standards, and reducing post-deployment issues across multiple enterprise applications effectively.
- Collaborated in Agile development cycles, delivering features on schedule, supporting sprint goals, and improving team performance metrics with measurable improvements in project delivery consistency.

EDUCATION

Master of Science in Computer Science University of Central Missouri Lee’s Summit, MO, USA	Aug 2023 - May2025
Bachelor of Technology in Computer Science and Engineering Bapatla Engineering College, Bapatla, AP, India	Jun 2017 - May 2021

PROJECTS

Event Management System

- Designed and developed a robust Event Management System using .NET Core, MVC, and Entity Framework Core, enabling secure user login, scheduling, registration, and search functionalities for enhanced efficiency.
- Deployed the application on AWS Elastic Beanstalk with RDS for scalable database hosting, ensuring high availability, performance optimization, cloud reliability, and enterprise-grade resilience in real-world production environments.
- Created dynamic, interactive user interfaces using HTML5 and CSS3, integrated with efficient backend workflows, strengthening skills in cloud deployment strategies, database management, and complete .NET application lifecycle development.

Library Management System

- Developed a comprehensive Library Management System using C#, .NET Framework, SQL Server, and Entity Framework Core, automating book inventory, student records, and borrowing operations for streamlined academic resource management.
- Implemented critical features including user authentication, CRUD operations, book search functionality, and fine calculation processes, resulting in optimized workflows and improved overall user experience for administrators and students.
- Designed secure APIs and optimized SQL database interactions, gaining hands-on expertise in backend development, structured data management, and scalable API design, strengthening professional skills in enterprise-level application development.
