SUMMARY

Software Engineer with senior-level experience in full-stack web development, specializing in back-end solutions with Java, Node.js, Spring, AWS DynamoDB and SQL databases. Led a team of three to design and implement a Kafka-to-Spring-to-DynamoDB pipeline, delivering five backend services for multiple data pipelines. Collaborative developer focused on clean, efficient code and scalable architectures.

SKILLS AND EXPERTISE

- **Programming Languages:** JavaScript, Typescript, Java, PL1, Kotlin concepts, SQL, HTML, CSS
- **Frameworks & Libraries:** Angular, React.js, ReactJS, Express.js, Express.JS, Node.js, NodeJS, Redux, Bootstrap, CSS Grid & Layout, Spring, SpringBoot, Java Swing
- **Databases & Data Management:** Oracle, PostGres, MySQL, Dynamo DB, MongoDB, Firebase, ADABAS, Database Management
- **Tools & Platforms:** GitHub, NPM, UNIX, Chrome, Mac OS, Edge, PC, IBM console, APIs, Cloud Services
- **Development Methodologies & Concepts:** AGILE, Software Engineering - System Lifecycle, Software Development Lifecycle, Object-Oriented Programming, Computer Science Concepts
- **Collaboration & Management:** Project Management, Multidisciplinary, Cross-functional, Distributed team experience

PROFESSIONAL EXPERIENCE

Thrivent

Consultant (IT-Development Program)

Minneapolis, MN · Jun 2024 - Sep 2025

- Developed full-stack applications using Spring/Java and React (Next.js), delivering responsive user interfaces and robust backend services that accelerated feature rollout
- Team requirements/functional lead for 3 other Engineers building Kafka to Spring to AWS Dynamo tables pipeline.
- Built, tested, delivered 5 Backend applications used in 3 related pipelines.

York Solutions

Engineer Internal Automation Projects

Brooklyn Park, MN · Sep 2023 - May 2024

- Developed a full-stack training site using Node.js, TypeScript, PostgreSQL, and Angular with TypeScript, applying Redux for state management and CSS for styling, which enhanced trainee access to interactive learning resources
- Implemented an MS Power Automate workflow that automatically collected meeting notes and contacts and stored them in BullHorn, streamlining post-meeting documentation
- Electron Desktop Application to capture scanned docs into BullHorn

OPTUM (United Health Group)

Consultant (IT-Development Program)

Eden Prairie, MN · Feb 2023 - Aug 2023

- Developed and delivered multiple user stories and defect fixes for the ATLAS application, a full-stack Angular front-end with Spring Boot Java and MySQL backend.
GitHub for version control, Karma and Mockito for unit testing, and SonarQube for code-coverage analysis. This resulted in successful production releases.

Collaborated with product owners to analyze and negotiate requirements, performed code reviews and extensive debugging to maintain quality

York Solutions

Barriers to Entry Technical Training Associate & Teaching

Brooklyn Park, MN · Nov 2022 - Feb 2023

Assistant/Consultant

- Designed and delivered several individual and team projects as a teaching assistant for the Barriers to Entry training program, using Angular, Bootstrap, and Oracle to teach Java full-stack development, soft-skill methodologies, and best practices, leveling up my experience and enabling participants to transition into entry-level software development roles

THOMSON REUTERS

Senior Release Engineer

Eagan, MN · Apr 2019 - Aug 2021

- Managed schedules for bi-weekly iterations and product releases, maintaining stable, secure experiences in always available production environment, while working remote.
- Collaborated with project stakeholders for QA scale testing every 2 weeks, achieving release objectives, and resolving retrospective issues.
- Maintained contact with application leaders each week, quickly identifying and resolving problems.
- Refined and implemented tracking, issue reports and company communications, managing project release data and keeping leadership informed of progress.

- Coordinated release set creation 4 months of the year on rotation, building sets with teammates, allowing proper testing and consistent stable releases.
- Facilitated cloud-based release tracking and agile critical bug and defect standup meetings 3 times per week, streamlining communication and patch planning to keep Prod on schedule.

Senior Systems Engineer

Eagan, MN · May 2017 - Apr 2019

- Maintained 80+ infrastructure servers, implementing security monitoring, OS patch scheduling, and product releases, which kept system uptime high and ensured compliance with security standards
- Tracked procurement / set-up / configuration of 25+ new application servers, designing and configuring servers for Online Charges system over 2-year period.

Senior Software Engineer (Mainframe)

Eagan, MN · Oct 1999 - May 2017

- Trained and mentored 4 junior team members, improving team technology skill-level and work capacity.
- Led a five-person development team to build the statutes markup system with IBM mainframe tools, performed comprehensive regression testing, and delivered a stable releases over several years that increased markup revenue by 30%
- Drove massive revenue by designing and implementing data structures/algorithms with links.
- Enhanced Triangle regression testing / comparing tool suite. (Full-stack Java Swing GUI based).
- Updated database schema, supporting backend servers and installing application on users systems.
- Coordinated cross-department cross-functional database change and configuration.
- Mined requirements, implementing modules as team member of system redesign. (PL/1 to Java).
- Drafted detailed design objectives, developing architectural and system design documents for 2 major systems.

EDUCATION

Metropolitan State University

Bachelor of Arts (BA), Computer Information Systems

St. Paul, MN

Zero To Mastery Online Coding Academy

Certificate, Complete Web Developer

2021

Toronto Canada

Zero To Mastery Online Coding Academy

Certificate, Senior Web Developer

Toronto Canada

Zero To Mastery Online Coding Academy

Certificate, JavaScript: The Advanced Concepts

Toronto Canada

Zero To Mastery Online Coding Academy

Certificate, Complete React Developer in 2022 (w/Redux, Hooks, GraphQL)

Toronto Canada

CERTIFICATION

- Complete Web Developer
- Senior Web Developer
- JavaScript: The Advanced Concepts
- Complete React Developer in 2022 (w/Redux, Hooks, GraphQL)
