

PROFESSIONAL SUMMARY

- Full Stack Developer with 10+ years of experience building and modernizing large-scale applications across healthcare, e-commerce, government, and learning sectors
- Expertise in **ASP.NET MVC, C#, SQL Server, API integrations, and system modernization**, delivering solutions that enhance scalability, performance, and reliability
- Proven record of **optimizing application performance**, improving ETL pipelines, and reducing processing times
- Experienced mentor and collaborator, supporting junior developers and cross-functional teams to accelerate delivery and maintain high code quality

EMPLOYMENT

Reflection Software - Aurora, IL *Learning Management System and solutions provider (SAAS)* (2/2022 - Present)

Full Stack Developer

- Developed and maintained enterprise web and windows applications using **ASP.NET MVC, C#, and VB.NET**
- Optimized automated data imports for large datasets, improving caching and reducing run time by 10%
- Integrated a leading eLearning engine to support the latest standards (SCORM 2004, xAPI, cmi5) expanding engagement and compatibility
- Designed a tSQLt testing framework for ETL applications, ensuring reliable data processing, reducing errors and eliminating hours of testing during each software update
- Leveraged microservices to unify business logic into reusable services, improving maintainability and streamlining future development efforts

Spinutech - Elmhurst, IL *Digital marketing and web development (SAAS)* (3/2017 - 2/2022)

Web Developer

- Built large web applications using ASP.NET MVC with jQuery, Bootstrap, DataTables, and Highcharts
- Designed normalized database architectures and optimized SQL queries, **reducing query run times by up to 30%**
- Led integration of **8+ APIs**, enhancing platform functionality and security
- Redesigned the NCC website to integrate live remote proctoring, expanding secure certification exam access for thousands of healthcare professionals nationwide
- Enhanced system security by applying best practices and documenting procedures for the team
- Coached junior developers, shortening learning curve and enhancing overall project delivery speed

OSG USA - Glendale Heights, IL *Cutting tool manufacturer* (10/2014 - 1/2016)

Systems Programmer

- Modified Microsoft Dynamics AX using X++ and C#/C++ to improve efficiency and utilize automation
- Received **Employee of the Quarter** for developing BI dashboards tracking KPIs and bonuses across locations
- Gathered requirements from end users and proposed versatile design solutions
- Automated printing of orders per location allowing staff to come in an hour later daily
- Diagnosed and resolved Dynamics AX errors, improving system uptime and workflow continuity by **30%**

TECHNICAL SKILLS

Languages & Frameworks: C#, C++, X++, Javascript, Visual Basic, .NET, Bootstrap, jQuery, PowerShell, VB Script, Batch
Cloud, Security & Integration: AWS (EC2, S3, IAM), REST APIs, SOAP APIs, OAuth 1 & 2, SAML, Single Sign-On (SSO), IIS, MSMQ
API & Third-Party Integrations: Stripe, Braintree, UPS, Mailchimp, Twilio, Microsoft Graph, Zoom, Rustici Engine, PSIExams, CKEditor, CKFinder, TinyMCE, Hangfire
Development Tools & CI/CD: Visual Studio, Rider, Logi Studio, Postman, Fiddler, Stackify, Git, Mercurial, SVN, Jenkins, Octopus

EDUCATION

Lean Leadership Center	CORE – Leadership System	(2/2025 - 8/2025)
Global Knowledge	Querying Microsoft SQL Server 2014	(1/2016 - 2/2016)
Elmhurst University	Bachelor of Science Major: Computer Science	(9/2009 - 6/2013)
