SUMMARY

Software Engineer (2+ years) specializing in **Java, Spring Boot, microservices, REST APIs, SQL/JPA/Hibernate, Angular/TypeScript**, and **distributed systems**. Experienced in performance tuning (indexes/query rewrites, caching), observability (logs/metrics/traces), security patterns (**RBAC/OAuth2/JWT**), and **DevOps (Docker, Kubernetes, Jenkins/GitHub Actions, AWS)**. Competitive programmer with **1,500+ DSA problems, LeetCode Top 6% (1850), ICPC Regionalist & Chess player**.

EDUCATION

University of Central Missouri, USA, MS in Computer Science
Cumulative GPA: 3.5 / 4.0

January 2024 – December 2025

National Institute of Technology Calicut, India, Bachelor's degree in CS
Cumulative GPA: 9.24 / 10.0

July 2018 – May 2022

SKILLS

Programming Languages	C, C++, Java, Python, C#, SQL, JavaScript/TypeScript, HTML/CSS.
Frameworks & Libraries	Spring Boot, React.js, Node.js, Angular, .NET, REST APIs, OpenAPI/Swagger, Databases.
Technical Skills	Software Design, Microservices, Distributed Systems, Docker, Kubernetes, DevOps (CI/CD), AWS (EC2/S3/RDS), Kafka/RabbitMQ, Redis, Linux, Unit/Integration Testing (JUnit/Mockito), Git, Data Structures & Algorithms, system design, PostgreSQL/MySQL

EXPERIENCE (2+ YEARS)

Software Engineer - II

Aug 2022 - Dec 2023

Infosys, Client: Intel

Hyderabad, India

- Built and operated **production-grade Java/Spring Boot services** integrated with UI workflows, maintaining 99.95% availability and **on-call ownership** for customer-facing enterprise systems.
- Implemented event-driven and **async processing** with **Kafka/RabbitMQ**, designing resilient flows - **retries/timeouts/idempotency** to handle spikes safely and ensure reliable message processing.
- Streamlined delivery through **CI/CD (Jenkins/GitHub Actions)** and **Docker containerization**, cutting deployment effort by 50% and improving release frequency and rollback safety.
- Boosted API performance by **35%** through **SQL tuning (indexes/query rewrites)** and **Redis caching**, cutting **p95 latency** and improving stability under peak load.

Software Engineer - I

June 2021 - Aug 2022

- Delivered **full-stack** features using **Angular + Spring Boot**, building **REST endpoints** and persistence with **JPA/Hibernate**, translating product requirements into maintainable services with clean API boundaries.
- Supported release readiness using **Git + CI/CD practices (build pipelines, environment configs, deployment hygiene)** and collaborated with QA/product to deliver fixes fast.
- Enhanced code quality and maintainability through refactoring, reusable UI components, and comprehensive testing (**unit/integration**) with effective debugging and code reviews.

PROJECTS

Banking Application — *Java, SpringBoot*

- Built a production-style Banking Application using **Java + Spring Boot** with **REST APIs** for account onboarding, authentication, balance management, deposits/withdrawals, and transaction history.
- Designed a microservices architecture (**Account/Transaction/Auth**) with **JWT-based authN/authZ**, **ACID-safe money transfers**, idempotent transaction processing, and optimized PostgreSQL persistence (**indexing/query tuning**).
- Improved scalability and reliability using Redis caching, Kafka/event-driven workflows for notifications/auditing, and robust testing/error handling (**JUnit/Mockito, global exception handling**).

ACHIEVEMENTS & CERTIFICATIONS

- LeetCode - Top 6% (Rating 1850)**, Ranked 336/25,000 in Weekly Contest 446
- HackerRank - 1450** (5 stars in Problem Solving, C++, Python) , **CodeChef - Rating 1807 (4 stars)**
- ICPC Regionalist 2020**: Regionals Rank 214/722 teams, Preliminaries Rank 101/3505 teams.
- Solved 1,500+ DSA Problems (600+ on LeetCode)**, showcasing advanced algorithmic and problem-solving skills.
- Google Hash Code 2021**: Rank 2,213 out of 9,000+ teams.
