Presidente Prudente (Sao Paulo, Brazil)

PROFESSIONAL SUMMARY

Software and Site Reliability Engineer transitioning from infrastructure to development, with 3+ years of experience in monitoring, automation, and system reliability. Coding skills in Python and JavaScript, with hands-on experience developing personal projects. Proficient in Kubernetes (AKS), CI/CD pipelines, and cloud platforms (Azure, AWS). Fast learner with an analytical mindset, combining engineering rigor with modern software development practices.

EXPERIENCE

Site Reliability Engineer - Casas Bahia Tecnologia

07/2022 – Current

- Implemented and maintained monitoring for servers, APIs and AKS clusters using Grafana, Dynatrace and Zabbix with custom alerts and metrics
- Managed and updated Linux/Windows servers and containerized workloads on Azure Kubernetes Service (AKS) using YAML configurations
- Contributed to automation and documentation of SRE deployment processes with Rundeck, Jira and Confluence, reducing toil and increasing operational efficiency
- Supported CI/CD processes and infrastructure changes via Rundeck and ServiceNow
- Partnered with development teams to define and monitor SLIs, SLOs and SLAs, performing root cause analysis to improve application performance and reliability
- Handled troubleshooting incidents at L1/L2 levels of infrastructure and application issues using observability tools

Product Engineer - SEG Automotive Components

04/2018 – 07/2022

- Answered as locally responsible engineer for components of starter motors
- Developed starter motors for national and international customers
- Provided design solution to global manufacturing problem, resulting in worldwide decrease in customer complaints
- Led projects of cost reduction and supplier development, saving more than 100,000 BRL in yearly production costs
- Created KPI controls, tolerance calculations and statistical and root cause analyses in Excel and bills of materials in SAP
- Provided engineering support to series production, quality and sales teams and external customers

Mechanical Engineer - Usina Alto Alegre Açúcar e Álcool

05/2017 – 03/2018

- Monitored quality and upkeeping of hydraulic oil and undercarriage system of harvesters
- Supervised team of mechanics at the technical assistance department in the Workshop
- Provided support to the implementation of Total Productive Maintenance program on sugarcane harvesters, tractors and trucks, increasing the fleet availability.

EDUCATION

Technology in Systems Analysis and Development

10/2021 – 07/2024

Universidade do Oeste Paulista - Brazil

Master of Science in Mechanical Engineering (Energy Systems)

09/2014 – 12/2015

Columbia University in the City of New York - USA

Bachelor's degree in Mechanical Engineering

01/2007 – 08/2012

Universidade Estadual de Campinas - Brazil

SKILLS

- Languages & Frameworks: Python, JavaScript (ES6+), React.js, Node.js, HTML, SQL
- DevOps & Tools: Git, GitHub, CI/CD, Kubernetes (AKS), ServiceNow
- Monitoring & Observability: Grafana, Dynatrace, Zabbix
- Cloud & Systems: Azure, AWS, Linux (Ubuntu, WSL), Windows Server
- Other: SAP, Excel (VBA, macros, pivot tables), Confluence, Jira
- Soft Skills: Analytical thinking, reliability, teamwork, continuous learning

LANGUAGES

- Fluent English and Portuguese
- Intermediate Spanish
- Basic German

EXTRACURRICULAR COURSES AND ACTIVITIES

- | | |
|--|----------------|
| • Python Developer – From Zero to Advanced – Udemy | Ongoing |
| • Personal finance tracker app with Python | 06/2025 |
| • Development of personal finances application with Python | 05/2025 |
| • The Complete JavaScript Course 2024: From Zero to Expert – Udemy | 01/2025 |
| • Leveling content – SRE Formation Bootcamp – Elven Academy | 02/2023 |
| • Kubernetes for the Absolute Beginners – Hands-on – Udemy | 12/2022 |
| • Scientific Computing with Python – freeCodeCamp.org | 12/2022 |
| • Scholarship for Development of Alcohol-Powered Stove – Unicamp | 2010 |
