SUMMARY

Software Engineer with **3+ years** of experience designing, developing, and maintaining enterprise and ride-sharing applications. Skilled in **Java, Spring Boot, Spring MVC, REST APIs, React, PostgreSQL, MySQL, Docker, and Kubernetes**. Hands on with building scalable backend services, implementing interactive frontend interfaces, integrating **APIs**, and managing cloud deployments. Contributed to 15+ application modules and workflows in live production systems, delivering reliable, high-performance solutions and streamlining development processes.

PROFESSIONAL EXPERIENCE

Software Engineer | Uber | USA

February 2025 – Present

- Developed backend microservices with **Java, Spring Boot**, and **Hibernate**, persisting trip and rider data in **PostgreSQL** across REST endpoints with robust validation and error handling.
- Crafted frontend features using **React, TypeScript, HTML, and CSS**, creating reusable components, interactive form flows, and dynamic data views for four internal web apps.
- Coordinated frontend-backend integration via REST contracts, auditing payloads and orchestrating sixteen **UI-service** interactions with consistent data exchange.
- Tuned containerized services with **Docker on Kubernetes**, evaluating configurations and logs, and guiding deployments to ensure stable application behavior across releases.
- Reviewed **API** request validation and response mapping for twenty backend services, maintaining consistent data integrity and error handling before promotion.
- Troubleshooted defects using **Splunk and ELK**, resolving **Spring Boot APIs, React UI, and PostgreSQL** issues, addressing six incidents per sprint with **Postman, JUnit, and Jest**.
- Deployed Spring Boot microservices on **AWS EKS**, configuring IAM roles, load balancing, and environment variables for seamless cloud execution.

Java Full Stack Developer | Robosoft Technologies | IN

July 2020 – December 2022

- Built Java web applications using Spring **MVC/JSP**, designing six production modules with controllers, validation, and server-side rendering.
- Managed backend services with **Java, Spring**, and **JDBC**, orchestrating nine workflows with input validation, exception handling, and reliable data processing.
- Validated business logic through unit and integration tests (JUnit, Mockito) for 22 services, ensuring correctness and robustness before deployment.
- Optimized **MySQL** databases, structuring schemas, writing efficient queries, and safeguarding data consistency across seven transactional features.
- Deployed **Java** applications on Apache Tomcat using Maven, resolving deployment issues and conducting bi-weekly releases.
- Diagnosed backend logic and **API issues** with **JUnit/Postman**, remediating five functional/API defects per release.
- Collaborated with QA, UI designers, and leads using **Git/Jira**, conducting code reviews, tracking tasks, and enhancing sprint outcomes.
- Administered Spring Boot microservices on **AWS EC2**, configuring properties, environment variables, and endpoints alongside Tomcat apps.

PROJECTS

Order Management Web Application

- Engineered Spring Boot backend exposing six REST APIs for order and customer management, implementing request validation, structured responses, and error handling.
- Designed React frontend with 10–12 screens, integrating REST APIs for order creation, updates, and status tracking with uniform UI and input handling.

Employee Tracking and Reporting System

- Constructed **Java Spring MVC** backend supporting 7–9 employee workflows with **JDBC** and **MySQL**, ensuring secure data retrieval, updates, and validation.
- Developed frontend using **HTML, CSS, JavaScript**, and **jQuery** across 8–10 screens, enabling employee record management and reporting with consistent layout and input handling.

TECHNICAL SKILLS

Programming & Scripting: Java, C#, C++, Perl, TypeScript, JavaScript

Backend & Distributed Systems: Spring Boot, RESTful Services, Microservices, Multi-tier Architecture, Large-scale Applications, Embedded Systems

Frontend Engineering: React, HTML5, CSS3, jQuery, Bootstrap

System Design & Architecture: Object-Oriented Design, Design Patterns, Scalability, Reliability, Fault Tolerance, High Availability, Performance Optimization

Cloud Platforms: AWS (EC2, S3, Lambda, DynamoDB, RDS, API Gateway, SQS, SNS, CloudWatch), GCP, Azure

Data Management: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Testing & QA: Unit & Integration Testing, JUnit, NUnit, Mockito, Jest, Postman, Automated Testing

Build, Deployment & Runtime: Maven, Gradle, Ant, Apache Tomcat, Docker, Kubernetes, CI/CD Pipelines

Version Control & IDEs: Git, GitHub, GitLab, Bitbucket, IntelliJ IDEA, Eclipse

Monitoring & Troubleshooting: Splunk, ELK Stack, Logging & Monitoring Tools

Agile & Collaboration: Jira, SDLC Practices, Code Reviews, Stakeholder Collaboration, Technical Leadership, Continuous Improvement

EDUCATION

Lindsey Wilson College | Master of Science in Technology and Management | USA

May 2023 – December 2024
