

Shivani Sareddy

Java Full Stack Developer

+1 (234) 282-9446 | shivani.s@jobstechmail.com | Ohio, USA

SUMMARY

Java Full Stack Developer with 3+ years building scalable web applications using Java, Spring Boot, and React.js for end-to-end software solutions. Expertise developing RESTful and SOAP-based APIs, implementing microservices architecture with Spring Integration, and managing database interactions using Hibernate and JPA across SQL and NoSQL databases. Skilled creating responsive user interfaces with HTML, CSS, JavaScript, and Bootstrap frameworks while integrating backend services for seamless data flow. Experienced deploying applications on AWS infrastructure, automating CI/CD pipelines with Jenkins, conducting unit testing with JUnit, and collaborating in Agile teams. Proven ability integrating legacy systems with modern platforms, ensuring secure data handling, and delivering production-ready applications through version control and DevOps practices.

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages & Core Java: Java 8/11, SQL, C#, Python

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JSF, Node.js, React.js, .NET Core

IDEs: NetBeans, IntelliJ IDEA, VS Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML5, CSS3, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, XML

Application Server: Apache Tomcat, IBM Web Sphere

Cloud Technologies: AWS, GCP, Azure

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

DevOps/Other Tools: Docker, Kubernetes, UML, Jira, Junit, MS Excel, JMeter

Version Control Tools: Git, GitHub, GitLab

Operating Systems: Windows, Linux, Mac

EXPERIENCE

Java Full Stack Developer, CVS Health, USA

Jan 2025 – Present

- Gathered and analyzed healthcare system requirements within **Agile** methodologies, contributing to designing, developing, testing, and maintaining healthcare applications, ensuring compliance with industry standards.
- Developed scalable and maintainable healthcare applications using **Java** and **Spring Boot**, leveraging auto-configuration and production-ready features to support robust, efficient healthcare data management.
- Built healthcare interoperability services using **Java** and **Apache Camel** to integrate legacy systems with modern applications, implementing **HL7** and **FHIR** standards for seamless patient data exchange across healthcare platforms.
- Developed **RESTful APIs** using **Spring Boot**, **React.js**, and **Spring Integration**, implementing modular architecture and microservices to meet project requirements and deliver healthcare application interfaces with seamless data integration.
- Created **SOAP-based services** using **JAX-WS** for standardized communication and established **RESTful services** to facilitate efficient, stateless interactions, addressing diverse integration requirements.
- Developed a prescription management module using **Spring MVC** and **Hibernate**, enabling real-time pharmacy integration and medication tracking while ensuring **HIPAA** compliance and secure data handling.
- Configured and managed **AWS** infrastructures (**VPC**, **EC2**, **S3**, **CloudFront**, **ELB**) using **AWS SDK for Java** scripts for automation, supporting healthcare applications with high scalability, reliability, and cost-effective patient data processing.

Java Full Stack Developer, Citus Infotech, India

Jun 2021 – Jul 2023

- Contributed to projects using the **Waterfall** model, meticulously planning and executing each phase, from gathering financial system requirements to designing, implementing, testing, and deploying, ensuring regulatory compliance.
- Utilized **HTML**, **CSS**, **JavaScript**, **Bootstrap**, **jQuery**, **Ajax**, **JSON**, and **XML** to craft dynamic user interfaces and enhance interactive web functionality.
- Engineered reusable components in **React.js**, boosting code maintainability and scalability of web applications.
- Developed financial reporting and analytics modules using **Java**, **Spring Boot**, and **RESTful APIs**, integrating with **SQL Server** using **JDBC** and **Hibernate** for real-time transaction monitoring and compliance reporting in banking applications.
- Architected and implemented microservices to manage financial transactions, utilizing **Hibernate** and **JPA** for seamless database interactions with **MySQL**, **MS SQL Server**, **MongoDB**, and other financial data repositories.
- Leveraged **Jenkins** to automate build and deployment processes, ensuring integration and delivery of top quality software.
- Integrated **Spring Boot** applications with financial databases like **MongoDB** and **MySQL** using **Spring Data JPA** and **Spring Data MongoDB**, optimizing data management and real-time data retrieval for financial applications, enabling faster transaction processing.
- Conducted thorough unit testing with **JUnit**, maintained code quality and integrity using **GitLab**, and promoted a collaborative environment fostering team-driven innovation.

EDUCATION

Master's in Computer science, Kent State University, Ohio, USA

Aug 2023 – Dec 2024

Bachelor's in Electrical & Electronics Engineering, Vaagdevi College of Engineering, INDIA

Aug 2019 – Jun 2022

CERTIFICATION

Amazon Web Services Developer - Associate
