

Yaswitha Mannava

Spirit Woods Ln, Arlington, TX | (972) 957-7124 | yaswithamannava810@gmail.com | [LinkedIn](#)

Summary

Computer programming intern with hands-on experience in Python automation and Agile development, delivering cost savings by automating repetitive tasks and enhancing code quality. Skilled in back-end development, Git version control, and database management. Proven ability to collaborate within cross-functional teams to improve efficiency and maintain robust, scalable codebases.

EDUCATION

Texas Wesleyan University, College of Engineering - Fort Worth, TX.

bachelor of Science, Computer Science Minor: Math, Business (GPA: 4.0/4.0)

- **Coursework:** Introduction to C++, Advanced Programming C++, Data Structures and Algorithms, Computer Organization, Assembly Language, Numerical Analysis, Object Oriented Programming Language, Software Engineering, Programming Language Concepts, Analysis of Algorithm, Senior Design Project, Operating System, Print Database System, Artificial Intelligence, College Algebra, Precalculus, Calculus I, Calculus II, Discrete Mathematics, Introduction to Probability and Statistics, Calculus III, Linear Algebra, Microeconomics I & II, Macroeconomics I, Strategic Brand Management, Financial Accounting, Introduction to Business, Advanced Business Application

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, C, Java
- **Software Development & Methodologies:** Back-End Web Development, Software Development Lifecycle, Agile Development, Computer Science Concepts
- **Databases:** MySQL, SQL Server, PostgreSQL
- **Version Control:** Git, Bitbucket
- **Cloud Services:** AWS, Azure

WORK EXPERIENCE

Charles Schwab | *Computer programming Intern*

May 2025 - Aug 2025

- Utilized Python and applied core computer science concepts to automate repetitive tasks, saving 8 hours per week and reducing operational costs by \$5,000
- Collaborated with a team of 4 senior developers using Agile development practices within the software development lifecycle, increasing project efficiency and ensuring on-time delivery
- Maintained and improved the back-end codebase on GitHub, reducing bugs by 21% and enhancing code readability through best practices in back-end web development
- Participated in code reviews, ensuring adherence to object-oriented programming principles and coding standards

ACADEMIC PROJECTS

Web application

Jan 2025 - Apr 2025

- Developed and maintained RESTful APIs(Django) using Python, enabling seamless data exchange between frontend and backend systems.
- Integrated relational (MySQL) and NoSQL (Redis) databases to support dynamic data storage and retrieval.
- Secured backend services by implementing OAuth2, JWT authentication, and role-based access control (RBAC).
- Automated CI/CD pipelines with GitHub Actions, accelerating development cycles and improving deployment reliability
- Conducted unit and integration testing using Pytest, achieving over 85% test coverage and ensuring code reliability.

Online Shopping Portal

Jan 2024 - Apr 2024

- Delineated the Entity-Relationship model, considering the necessary database tables using Toad Data Modeler
- Fabricated SQL DDL scripts to generate the database structure and housed the 15 database tables in MySQL
- Performed database functionalities such as user roles/privileges for 5 different kinds of roles for a user, 4 views to display a subset of information, and Table locks to restrict table write operations. Implemented Triggers, stored procedures, and sub-queries

HONORS & ACTIVITIES

Engineering Orientation Peer Advisors

Aug 2024 - Present

- Answer questions and provide support for a group of 25 incoming Computer Science freshmen

Supplemental instructor

Sep 2024 - Present

- Serve as a leader and provide support for Supplemental instructor sessions

Intro DS Tutor | *Volunteer*

Dec 2023 - Present

- Tutored computer science 1:1 for intro students covering basic concepts including recursion and data structures.

Student Mentor | *Volunteer*

May 2023 - Aug 2024

- Make a Difference strives to improve the lives of at-risk children by providing them with better education and a robust support system.
- As a Teaching Mentor, I taught 10 children aged between 7 and 16 English two days a week. Under my guidance, the kids' command of the language increased, they performed consistently well and grew more confident.

Computer Science Club | *Volunteer*

Oct 2024 - Present

- Tutored Founder of Computer science Club at Texas Wesleyan university to encourage exchanges among cs students surrounding new concepts and technical programs. Leeb club members to spend at least 2 hours a week pair programming with other members to share learnings
