

Vamshi Raoulakola

SUMMARY

vamshiraoulakola@gmail.com

Full Stack & Cloud Engineer with 3+ years of experience building **Java/Spring Boot and Node.js** microservices, designing scalable **AWS/GCP** architectures, and implementing **CI/CD** pipelines. AWS Certified Solutions Architect Associate with proven success in event-driven systems, REST API development, observability, and security integration.

EXPERIENCE

Software Engineer / Backend Engineer, Xebia

Sep 2023 - Aug 2024

- **Engineered** Java Spring Boot microservices for a cloud-based pension platform on AWS, **optimizing algorithms & MySQL queries** to improve processing efficiency by 50% and API latency by 80%.
- **Integrated** RabbitMQ & Google Cloud Pub/Sub for event streaming between core systems and external compliance services, enabling **near real-time synchronization**.
- **Led** migration to Java 17 & Hibernate 6 (Jakarta EE), implementing **parallel stream processing** to speed up batch jobs by 60%.
- **Designed & maintained** GitLab/Jenkins CI/CD pipelines with JFrog Artifactory deployments, **cutting build times by 40%** and improving release reliability.

Associate Software Engineer / Full Stack Developer, coMakeIT

Mar 2023 - Aug 2023

- **Implemented** Airbrake error monitoring & New Relic dashboards, **reducing incident triage time by 40%** and accelerating root cause analysis.
- **Deployed** AWS S3 media storage with Secrets Manager, achieving **90% upload success rate** and eliminating hard-coded credentials.
- **Developed** Angular-based UI features and Spring Boot backend services, **reducing API latency by 40%** through SQL optimization.
- **Applied** DevOps best practices and upgraded platform to Java 17, improving application stability & maintainability.

Backend Engineer (Trainee), coMakeIT

Sep 2021 - Feb 2023

- **Built** 6+ Spring Boot micro-services for Flyerr marketplace, using asynchronous Spring WebClient with retry/circuit-breaker logic, **increasing throughput by 25%**.
- **Integrated** OAuth2/OIDC with Keycloak for RBAC authentication and Stripe payment flows, **achieving 98%+ transaction success rate**.
- **Developed** Twilio & SendGrid event-driven notifications with Flag-smith feature flags, **boosting delivery precision by 40%**.
- **Led Liquibase** database migrations & centralized AOP logging, reaching **85% unit test & 82% integration test coverage**, reducing production bugs by 50%.

PROJECTS

WeDAA (Open-Source Remote) - Contributor

- **Built** Kubernetes-ready dynamic database configuration module enabling runtime selection of H2, MySQL, or MongoDB, **reducing environment setup time by 40%**.
- **Integrated** Amazon S3 & Hetzner S3 for image uploads with pre-signed URL generation, **enabling multi-cloud support** and improving upload reliability.
- **Enhanced** backend with LangChain-powered code generation modules and LangGraph agents, **automating boiler-plate code creation** and speeding up contributor onboarding.

EDUCATION

Master of Science, Computer Science

University of Central Missouri

GPA: 4.0

Bachelor of Science, Computer Science and Engineering

Jawaharlal Nehru Technological University

GPA: 8

SKILLS

Programming & Frameworks: Java (8-17), Python, JavaScript/TypeScript, Spring Boot & Spring WebFlux, Hibernate/JPA, RESTful APIs, Node.js, Django, FastAPI

Cloud & DevOps: AWS (EC2, S3, RDS, Secrets Manager), GCP (Pub/Sub, Cloud Functions), Hetzner S3, Docker, Jenkins, GitLab CI/CD, JFrog Artifactory, Terraform, Flagsmith

Databases: MySQL, PostgreSQL, MongoDB, MSSQL, GraphDB, H2

Infrastructure & Monitoring: Docker, CI/CD pipeline design, Observability dashboards, OAuth2/OIDC, Keycloak, New Relic, Airbrake, SonarQube

Messaging & APIs: RabbitMQ, GraphQL, Stripe API, Twilio, SendGrid

Analytics & Tools: Pandas, Power BI, GA4, Matomo

Certifications

AWS Certified Solutions Architect Associate

Dec 2024 - Dec 2027
