## SUMMARY

Software Engineer with 5+ years of experience building and supporting enterprise and product-based applications across healthcare and technology domains. Strong background in C#, .NET Core, RESTful APIs, SQL, and full-stack development using React and JavaScript, with hands-on experience delivering secure, scalable solutions in HIPAA-compliant environments. Proven ability to collaborate within Agile teams, contribute across the SDLC, support production systems under SLAs, and mentor junior developers. Adept at translating complex business requirements into reliable, high-quality software aligned with enterprise standards.

## TECHNICAL SKILLS

|                               |                                                                                                                        |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Languages:</b>             | JavaScript (ES6+), TypeScript, Python, Java, C#, C, C++, SQL                                                           |
| <b>Frontend:</b>              | React.js, Next.js, Angular, Redux, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Web Design                       |
| <b>Backend:</b>               | Node.js, Express.js, Spring Boot, .NET Core, RESTful API Development, Microservices                                    |
| <b>Databases:</b>             | PostgreSQL, MySQL, MongoDB, SQL Server, Redis                                                                          |
| <b>Cloud:</b>                 | AWS (EC2, S3, RDS, Lambda), Microsoft Azure, Docker, Kubernetes                                                        |
| <b>DevOps &amp; CI/CD:</b>    | GitHub Actions, Jenkins, Containerization, Deployment Automation                                                       |
| <b>Testing &amp; Quality:</b> | Jest, Mocha, Chai, Cypress, Unit Testing, Integration Testing                                                          |
| <b>Tools &amp; Platforms:</b> | Git, GitHub, Bitbucket, Postman, Swagger, JIRA, Confluence, VS Code                                                    |
| <b>Architecture:</b>          | Full-Stack Application Development, MVC Architecture, API Design, System Design Fundamentals, Performance Optimization |
| <b>Security:</b>              | JWT Authentication, OAuth 2.0, Role-Based Access Control, Secure Coding Practices, Data Privacy Standards              |
| <b>Methodologies:</b>         | Agile (Scrum), SDLC, Cross-Functional Collaboration, Technical Documentation                                           |
| <b>Certifications:</b>        | Certified Essential Training (JavaScript, React.js, Node.js, C++, C#)                                                  |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                            |
