PROFESSIONAL SUMMARY

Software Engineer with internship experience in full-stack development, proficient in TypeScript, ReactJS, Node.js, Python, SQL and AWS. Skilled at designing and implementing scalable back-end solutions, optimizing performance, and managing cloud services. Proven ability to enhance reliability and reduce bugs through clean, efficient code and cross-functional collaboration.

WORK EXPERIENCE

Yourbazzar | *Software Developer Internship*

Sep 2024 - Feb 2025

- Improved site visibility by 100% through SEO strategies using Lighthouse tool.
- Integrated Google reCAPTCHA and batch management system using back-end web development practices with Node.js and Express, enhancing reliability by 30%.
- Optimized application performance by refactoring components in TypeScript and ReactJS using object-oriented programming principles.
- Collaborated with cross-functional teams in agile development cycles to navigate the software development lifecycle, reducing bug reports by 25% and improving user retention.

EDUCATION

DR. APJ Abdul Kalam Technical University

2021 - 2025

Bachelor of Technology, Computer Science & Engineering (GPA: 7.38)

TECHNICAL SKILLS

- Core:** Data structure and algorithms, OOPs, Computer fundamentals, DBMS, System Design, Computer Science Concepts, Software Development Lifecycle, Agile Development
- Languages:** Java, TypeScript, SQL, Python, JavaScript, HTML, CSS
- Cloud:** AWS
- Development:** ReactJs, Redux, Zustand, SEO, Ant Design, express, Nodejs, Back-End Web Development
- Databases:** MySQL, MongoDB
- Developer Tools:** VS Code, Eclipse, Postman
- Version Control:** Git, GitHub

PROJECTS

Notes extractor with Neurodiversity Feature | [Link](#) | *Cognify*

- Built a notes extractor using Azure AI, Custom Vision, and GPT-4.0 to simplify academic content.
- Developed an ADHD-friendly feature with 92% accuracy, enabling chatbot-based Q&A from extracted notes.
- Achieved full CRUD operations and seamless API integration for real-time note processing.

Academic Workflow Platform | [Link](#) | *StudeskPro Portal*

- Engineered StuDeskPro to support 500+ concurrent users, streamlining academic workflows for 10+ institutions.
- Implemented a robust full-stack architecture with HTML5, CSS3, JavaScript, and jQuery for responsive UI, and Django for backend logic and data management.

Vehicle Number Plate Detection System | [Link](#)

- Achieved 95% detection accuracy using YOLO and OCR.
- Processed images in under 1.5 seconds per frame for real-time recognition.
- Applied edge detection and character segmentation algorithms to improve recognition reliability and reduce false positives.

CERTIFICATIONS

- AWS Certified Cloud Practitioner:
<https://cp.certmetrics.com/amazon/en/public/verify/credential/97615d694cfd49e38456ef870b1d0e1b>
- Salesforce CRM Certification – Capgemini
- Google Cloud Profile – 10+ Skill Badges:
https://www.cloudskillsboost.google/public_profiles/1386f789-dfe3-49a0-b04f-badf7602dabd

HONORS AND AWARDS

- Microsoft Learn Student Ambassador (MLSA)**
- Community Projects Contribution:** Contributed to 3+ community projects, mentoring peers and reaching 200+ students.
- 2nd place at GHC Hyperloop competition in IIT MADRAS**
