SUMMARY

Computer Engineering Graduate with industry experience in Full Stack Development, specializing in building scalable distributed systems using Spring Boot, React, and Microservices architecture. Successfully architected a comprehensive AI-integrated grading platform using Apache Kafka and Docker. Passionate about solving complex architectural challenges and ready to contribute immediately as a Software Engineer.

SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python, C#, C, C++, Haskell, Dart, SQL.
- **Frontend:** React.js, Next.js, Tailwind CSS, Flutter, React Native, Blazor.
- **Desktop:** WPF, PySide6.
- **Backend:** Spring Boot, ASP.NET Core, Nest.js, Microservices.
- **Cloud & DevOps:** Docker, Apache Kafka, GitHub Actions (CI/CD).
- **AI & ML:** OpenCV, YOLOv11, TensorFlow, Unsloth, Hugging Face.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Tools:** Git, Jira, Postman, Unity Engine.
- **Methodologies:** Agile (Scrum).
- **Soft Skills:** Technical Writing, Team Leadership, Critical Thinking, Communication.

EDUCATION

University of Ruhuna

Galle, Sri Lanka

BSc (Hons) in Computer Engineering

Related Coursework: Final Year Project, Software Project, Web Development, High Performance Computing, Design Patterns, Image Processing, Information Security, Functional Programming, Big Data Analysis, Blockchain and Cybersecurity, Software Architecture, Cloud Computing, DevOps Engineering, Mobile Application Development, Machine Learning, Advanced Artificial Intelligence, Computer Architecture, Data Structures and Algorithms, Operating System Programming, GUI Development, Embedded Systems, Object Oriented Programming, Databases.

EXPERIENCE

Eminence Apps

Remote

Software Engineer Intern

Jan 2025 – July 2025

- Frontend Developer for a cloud-based POS system, architecting the UI with **Next.js** and **React** to optimize rendering performance.
- Engineered the entire deployment pipeline using **Docker** and **GitHub Actions**, establishing automated CI/CD workflows.
- Collaborated directly with stakeholders to translate business requirements into technical features for the product.

Lightway IT Pvt. Ltd.

Remote

Software Engineer Intern

July 2024 – Dec 2024

- Built and maintained high-performance web applications using **React.js**, significantly optimizing page load speeds and SEO ranking.
- Assisted in the design and integration of backend RESTful APIs, ensuring robust data handling and frontend stability.
- Contributed to the containerization strategy using **Docker**, ensuring consistent development and testing environments across the team.

TECHNICAL PROJECTS

Automated Assessment & Grading Platform (Final Year Project)

Tech Stack: Spring Boot, Next.js, Kafka, PostgreSQL, Docker, PySide6, OpenCV, YOLOv11

- Architected a distributed grading system using **Spring Boot** and **Next.js**, utilizing **Apache Kafka** to decouple and load-balance resource-intensive code evaluation tasks.
- Developed a companion desktop client using **PySide6** and **OpenCV** for scanning answer sheets and trained comprehensive AI assessment models using **YOLOv11**, **TensorFlow**, **Unsloth**, and **Hugging Face**.
- Containerized the entire microservices environment using **Docker** for scalable deployment.

PoS System (SARIS POS)

Tech Stack: React.js, TypeScript, Tailwind CSS, Docker, GitHub Actions

- Developed a responsive retail management solution featuring comprehensive billing, inventory management, and sales analytics.
- Implemented containerization with **Docker** and established **CI/CD pipelines** via GitHub Actions to automate testing and production deployment.

Microservices ERP System (University of Ruhuna)

Tech Stack: C#, ASP.NET Core, RabbitMQ, Ocelot API Gateway, PostgreSQL

- Contributed as a backend developer for an Admin Portal, implementing services with **.NET Core** and **RabbitMQ** for asynchronous messaging.
- Utilized Ocelot API Gateway to manage microservices routing and security.

OTHER PROJECTS

- **Carpooling App (Ride-Sharing):** Built a mobile application using **Flutter** and **Firebase**, utilizing Google Maps API for real-time routing and matching.
- **Salon Management System:** Designed a database-centric application using **MySQL**, focusing on schema normalization, complex SQL queries, and indexing for performance optimization.
- **Miracle Diary Studio Website:** Developed a professional photography portfolio website using modern web technologies (miraclediaryweddings.com).
- **GPA Calculator:** Created a result tracking tool for students (gpa.sarislabs.com).
- **Yahoo Auction Template:** Auction Builder template generator for Yahoo Japan (anbiplus.cloud).

ACHIEVEMENTS & LEADERSHIP

- **Technical Writer:** Regularly publish technical articles on **Java**, **OOP**, and **Software Architecture** on Medium.
- **Top 10 Finalist:** Innovate with Ballerina Competition 2024 (Organized by WSO2).
- **Top 12 Finalist:** CODE WITH WIE 2025 (Organized by IEEE WIE Sri Lanka).
- **Committee Lead:** Membership & Recruitment Committee, IEEE Student Branch, University of Ruhuna.
- **Organizer:** HaxTreme Coding Competition & RedCypher Hacking Competition (Technical Team).
