SUMMARY

Full-stack .NET developer with 5+ years of experience designing scalable enterprise applications using ASP.NET, C#, SQL, Azure, and React. Proven record of improving performance and delivering business-critical features across supply chain and telecom domains. Recognized for delivery excellence and strong collaboration with cross-functional teams.

PROFESSIONAL EXPERIENCE

EPAM Systems - Software Engineer

Jan 2022 - Feb 2025

Client: HAVI

Hyderabad, India

Awards: Delivery Excellence Badge, Value Champion Award

- Developed end-to-end features for a global supply-chain TMS platform.
- Utilized tools and technologies such as Oracle, SQL Server, Visual Studio Professional 2019, Oracle SQL Developer, .NET Framework, ASP.NET MVC, .NET Core MVC, Entity Framework Core, C#, WCF, SSRS Reports, JavaScript, jQuery, and Ajax.
- Built secure Azure integrations using Functions, Key Vault, and Blob Storage.
- Enhanced SSRS reports, reducing report generation time by 30%.
- Optimized SQL queries and backend logic, improving performance by 40%.
- Improved code quality and reduced defects by 20% through NUnit test coverage.
- Worked closely with product owners to refine requirements and deliver successful releases.
- Active participation in daily stand-up meetings, backlog grooming, and planning sessions for effective project management.
- Applying clean code practices, algorithms, and adherence to industry best practices.

TATA Consultancy Services - Assistant System Engineer

Aug 2020 - Dec 2021

Client: British Telecom

Hyderabad, India

Awards: On-The-Spot Employee Award, Applause for Team Award

- Developed telecom enterprise applications using C#.NET, ASP.NET Web Forms, MVC, HTML, CSS, JavaScript, jQuery, Ajax, ADO.NET and Oracle.
- Engaged in requirement gathering, feasibility checking, testing, and maintenance of applications.
- Designed and created Database Tables, Stored Procedures, Triggers, and other business objects.
- Addressed production issues and enhancements, including performance tuning and code optimization.
- Designed DB structures including tables, stored procedures, and triggers.
- Collaborated with a 12-member team to deliver critical enhancements reliably.

INFOBASE System - Intern

Mar 2019 - Aug 2019

- Worked on the front-end development of web pages using HTML, CSS, Bootstrap and JavaScript.
- Assisted in creating responsive UI components and improving page layouts for better user experience.
- Supported backend development tasks using SQL for data storage, retrieval, and simple CRUD operations.
- Gained hands-on experience with C# for writing basic server-side logic and understanding .NET application structure.
- Collaborated with the development team to fix UI bugs and enhance functionality across modules.
- Participated in testing and debugging activities to ensure code quality and smooth user experience.
- Learned version control practices using Git and contributed to small feature enhancements.
