

Professional Summary

Software Engineer with over 3 years of experience designing, developing, and deploying scalable enterprise applications. Skilled in building event-driven microservices, secure API integrations, and cloud-native solutions using Java, Spring Boot, React.js, and AWS. Adept at delivering end-to-end software solutions involving microservices architecture, database optimization, and CI/CD automation. Proven expertise in security compliance (SOX, HIPAA, PCI DSS), agile collaboration, and high-availability deployments across distributed systems. Strong communicator and team contributor, focused on performance, reliability, and continuous improvement in dynamic, fast-paced environments.

Technical Skills

Programming Languages: Python, Java, C/C++, TypeScript, JavaScript (ES6+), SQL, HTML, CSS
Backend Development: Spring Boot, Spring Cloud, RESTful APIs, Microservices, Kafka, RabbitMQ, GraphQL, API Integration, JWT, RBAC, Data Privacy & Compliance
Frontend Development: React.js (Hooks, Context API), Angular, Redux, Next.js, Tailwind CSS, Material UI, Responsive UI, Performance Optimization
Database Management: MySQL, PostgreSQL, MongoDB, Redis, AWS RDS, Query Optimization, Database Design, Data Modeling, Performance Tuning
Cloud & DevOps: AWS (ECS, EC2, Lambda, S3, RDS, CloudWatch), Azure DevOps, Docker, Kubernetes, Jenkins, Terraform, Travis CI, CI/CD Automation
Testing & Security: JUnit, Mockito, Automated Testing, Code Reviews, Spring Security, OAuth2, Audit Logging, SOX, HIPAA, PCI DSS, FINRA Compliance
Developer Tools: Git, GitHub, Maven, IntelliJ IDEA, Eclipse, VS Code, PyCharm, Postman, JIRA, Confluence
Collaboration & Methodologies: Agile (Scrum), Sprint Planning, Cross-Functional Collaboration, Mentorship, Coaching, Release Cycle Optimization, Continuous Improvement

Professional Experience

Software Engineer Metlife, USA	Jul 2025 - Present
- Engineered event-driven microservices using Spring Boot, Kafka, and REST APIs to support policy updates, claim adjudication, and underwriting workflows, improving processing speed and scalability across distributed systems. - Built secure data integration pipelines between internal policy systems and external banking networks using Spring Cloud, AWS Lambda, and S3, ensuring compliance with SOX and PCI DSS data-handling standards. - Implemented role-based access control (RBAC) and audit logging mechanisms via Spring Security and JWT, strengthening system integrity and supporting audit readiness for regulatory inspections. - Deployed containerized applications on AWS ECS using Docker and Terraform, enabling high-availability infrastructure with zero-downtime deployments during production rollouts. - Collaborated with data analytics teams to expose policy and claims datasets through GraphQL APIs, supporting real-time financial insights and customer retention analysis.	
Software Engineer Persistent System, India	Nov 2020 - Jul 2023
- Designed, developed, and deployed scalable backend microservices using Java, Spring Boot, and RESTful APIs, ensuring seamless data exchange and reliability across multiple business applications. - Created and optimized MySQL database schemas, including indexing, stored procedures, and query optimization, improving data retrieval efficiency by 35% and ensuring high database performance. - Developed and enhanced dynamic, responsive front-end modules using Angular, TypeScript, HTML5, and CSS3, providing an intuitive, user-friendly interface for 500+ daily active users. - Implemented authentication and authorization frameworks using JWT tokens, OAuth2, and Spring Security, enhancing system security, compliance, and access control. - Automated the build, testing, and deployment processes through CI/CD pipelines leveraging Jenkins, Git, and Maven, deploying applications on AWS (EC2, S3, RDS), reducing release cycle time by 40%. - Collaborated with cross-functional Agile teams using JIRA and Confluence for sprint planning, backlog management, and progress tracking, contributing to continuous improvement and on-time project delivery.	

Education

Master of Science (M.S.), Human-Computer Interaction DePaul University Chicago, IL, United States	Aug 2023 - Nov 2025
Bachelors of Technology (B.Tech), Computer Science Engineering Vellore Institute of Technology (VIT) Chennai, TN, India	Jun 2019 - Jun 2023

Projects

AI-Driven Transcript Tool for Universities Technical Project Assistant Dec2024 – Jun 2025	Link
- Designed an AI-powered transcript parser hosted on Azure that automated data validation and transfer-credit mapping. - Reduced manual processing time by 90% while improving data accuracy to 95%. - Integrated RESTful APIs to sync academic records across multiple platforms in real time.	
Automation Script for Course Equivalency (TES + PeopleSoft) Technical Project Assistant Mar 2025 – Apr 2025	Link
- Developed a Selenium automation suite for cross-system data updates and verification, cutting processing time by 80%. - Delivered complete documentation and trained registrar staff on automation workflows, improving adoption across teams.
