gopikrishna3491@gmail.com | 4704400907 | Atlanta, GA, 30041

SUMMARY

Results-driven **Full Stack Java Developer** with **4+ years of experience** in developing secure, scalable, and cloud-native healthcare applications. Strong expertise in **Java, Spring Boot, Microservices, REST/GraphQL APIs, Kafka, and AWS**. Experienced in building HIPAA-compliant applications that enhance patient care, optimize claims processing, and improve healthcare workflows. Proficient in **React.js, Angular, Docker, Kubernetes, CI/CD automation**, and SQL/NoSQL databases. Adept at collaborating in Agile teams to deliver high-performance, reliable systems that support millions of transactions in the healthcare domain.

SKILLS

Languages

Java 8+, Python, JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries

Spring Boot, Spring MVC, Hibernate, Spring Security, React.js, Angular, Redux

APIs & Architecture

RESTful APIs, GraphQL, Microservices, EventDriven Architecture

Messaging & Streaming

Apache Kafka, RabbitMQ, JMS

Databases

PostgreSQL, MySQL, Oracle, MongoDB, Redis

Cloud Platforms

AWS (EC2, S3, RDS, Lambda, VPC, IAM, CloudFormation, CloudWatch)

DevOps & CI/CD

Docker, Kubernetes, Jenkins, Git, Maven, Gradle, SonarQube

Testing Tools

JUnit, Mockito, Selenium, Postman, JMeter

Agile Tools

Jira, Confluence, Bitbucket, GitHub

PROFESSIONAL EXPERIENCE

Senior Full Stack Java Developer

Baylor Scott & White Health

Jan 2024 – Present

- Designed and developed microservices using Spring Boot, Hibernate, and Kafka to support patient care workflows and claims processing.
- Built RESTful and GraphQL APIs for real-time integration with electronic health record (EHR) systems, reducing data retrieval time by 30%.
- Secured sensitive healthcare data with Spring Security (OAuth2/JWT) to ensure HIPAA compliance.
- Deployed cloud-native applications on AWS (ECS, EKS, S3, RDS, Lambda, CloudFormation) improving scalability and availability.
- Implemented CI/CD pipelines using Jenkins and Git, reducing deployment times by 40%.
- Developed React.js front-end components for clinical dashboards, enhancing usability for healthcare providers.

Full Stack Java Developer

Nov 2022 – Dec 2023

CVS Health

- Developed event-driven microservices with Spring Boot & Kafka to streamline pharmacy order processing and prescription management.
- Enhanced patient portal UI with React.js/Redux, improving response times and customer satisfaction scores.
- Migrated legacy systems into AWS cloud (EC2, Lambda, RDS, CloudWatch), ensuring compliance, scalability, and cost optimization.
- Built secure APIs for prescription and insurance claim processing using OAuth2 & JWT.
- Containerized applications with Docker and deployed to Kubernetes clusters, improving scalability during peak usage.

Java Full Stack Developer

Feb 2020 – Jul 2021

HCL Technologies

- Built Spring Boot microservices to process healthcare insurance claims with high reliability and scalability.
- Integrated Kafka and RabbitMQ for asynchronous event-driven communication, reducing processing delays by 25%.
- Modernized monolithic applications into cloud-based microservices on AWS (ECS/EKS).
- Implemented security and compliance features for healthcare data exchange using encryption and secure authentication protocols.
- Collaborated with business analysts to translate HIPAA and healthcare compliance requirements into technical implementations.

EDUCATION

Masters in computer science *Oklahoma
Christian University*

Aug 2021 – Nov 2022

Bachelors in computer science
JNTUH

Aug 2016 – Dec 2020
