

Nirnay Reddy Gaddam

Software Engineer

Irving TX | +1 (603) 451 4488 | nirnayreddy75039@gmail.com

SUMMARY

Software Engineer with 4+ years of experience building and optimizing scalable, enterprise-grade applications using Java, Spring Boot, Microservices, and RESTful APIs across e-commerce and enterprise domains. Strong background in developing high-performance backend services and data-driven APIs, improving response times by 30%+ and supporting high-traffic systems on AWS and Azure. Experienced in full-stack development with React.js, JavaScript, HTML5, CSS3, and Bootstrap, delivering responsive and user-focused interfaces. Proficient in cloud-native and containerized solutions using Docker, Kubernetes, and CI/CD pipelines, reducing deployment cycles and improving release stability. Skilled in relational and NoSQL databases including MySQL, PostgreSQL, Oracle, SQL Server, and MongoDB, with a focus on performance and scalability. Committed to high code quality through automated testing and performance tools such as JUnit, Mockito, Postman, Selenium, and JMeter, and experienced in Agile/Scrum environments using Jira and Confluence to deliver business-aligned solutions.

SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices, Node.js, Express.js, JSF

Front-End Technologies: React.js, Angular, JSP, JSTL, Bootstrap, jQuery, AJAX, Redux

Back-End Technologies: Java EE, Servlets, JDBC, RESTful APIs

Databases: MySQL, PostgreSQL, Oracle, SQL Server, MongoDB

Cloud Platforms: AWS, Azure, GCP

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Git, GitHub, GitLab, Maven, Gradle

Testing Tools: JUnit, Mockito, Postman, Selenium, JMeter

Web Technologies: HTML5, CSS3, JSON, XML

IDE & Tools: IntelliJ IDEA, Eclipse, Visual Studio Code, NetBeans

Project Management: Jira, Confluence, Agile/Scrum, SDLC, Waterfall

EXPERIENCE

Wayfair, USA | Software Engineer

June 2025 - Present

- Designed and enhanced scalable microservices using Java, Spring Boot, Spring MVC, Spring Security, Hibernate, and JPA, supporting high-traffic e-commerce workflows and improving API response time by 32% during peak loads.
- Developed and integrated RESTful APIs consumed by React.js and Redux front-end components, reducing client-side data fetch latency by 28% and improving overall user experience across core shopping flows.
- Built responsive UI modules using React.js, JavaScript, HTML5, CSS3, Bootstrap, and AJAX, increasing page load performance by 35% and reducing UI-related production defects by 40%.
- Implemented containerized deployments using Docker and Kubernetes across AWS and Azure environments, improving deployment consistency and reducing release cycle time from weekly to bi-weekly by 45%.
- Automated CI/CD pipelines using Jenkins, GitHub, Maven, and Gradle to accelerate builds, reduce manual deployment effort, and maintain code quality standards.
- Optimized database interactions across MySQL and PostgreSQL using JDBC and JPA, enhancing query performance and ensuring data consistency across distributed services.
- Conducted comprehensive backend and API testing using JUnit, Mockito, Postman, and JMeter, achieving high test coverage and reducing post-release defects.

Mindtree, India | Software Engineer

Jan 2020 - Jul 2023

- Developed enterprise web applications using Java, Java EE, Servlets, JDBC, Spring MVC, Hibernate, and JPA, delivering modular and maintainable solutions across multiple client projects.
- Designed and consumed RESTful APIs for internal and external integrations using Spring Boot and JSON/XML, enabling seamless data exchange and reducing manual processing efforts by 35%.
- Built dynamic user interfaces using JSP, JSTL, jQuery, JavaScript, HTML5, CSS3, and Bootstrap, improving application usability scores by 30% based on client feedback.
- Implemented secure authentication and authorization using Spring Security, reducing unauthorized access incidents by 45% and aligning applications with enterprise security standards.
- Worked with relational and NoSQL databases including Oracle, SQL Server, MySQL, and MongoDB, optimizing queries and schema designs to support efficient reporting and transaction processing.
- Supported application deployments and builds using Git, GitLab, Maven, and Jenkins, improving version control practices and reducing build failures by 33% across multiple releases.
- Contributed to Agile/Scrum ceremonies using Jira and Confluence, supporting sprint planning, execution, and timely project delivery.

EDUCATION

Master of Science (MS) in Computer Software Engineering

Northeastern University

Dec 2025

Boston, MA

Bachelor of Technology in Computer Science

Presidency University

May 2021

Bangalore, Karnataka
