

SHARMILA S

Java Backend Developer

sharmilashankar4488@gmail.com | +91 9514488724 | linkedin.com/in/sharmila-s-649952237 | github.com/sharmila-sharo

Coimbatore, India | Remote Ready | Immediate Joiner

PROFESSIONAL SUMMARY

Java Backend Developer with 3.3 years of enterprise experience in building and maintaining scalable applications. Proficient in Spring Boot, REST APIs, microservices architecture, and cloud platforms. Proven track record in production defect resolution (50+ monthly tickets), system maintenance for 500+ users, and delivering reliable backend solutions. Strong expertise in QA automation, test-driven development, and CI/CD integration. Skilled in containerization (Docker, Kubernetes) and collaborative Agile development.

TECHNICAL SKILLS

Backend & Frameworks:	Java, Spring Boot, Spring Data JPA, Hibernate, Microservices Architecture, RESTful APIs, J2EE
Programming Languages:	Java, Go (Intermediate), TypeScript (Intermediate), GraphQL (Learning)
Databases & Caching:	PostgreSQL, Redis, H2, SQL Query Optimization
DevOps & Cloud:	Docker, Kubernetes, CI/CD Pipelines, Google Cloud Platform (GCP), AWS (Familiar), Git, GitHub
Testing & Quality:	JUnit, Mockito, Cypress, TestRail, Test Automation, Manual Testing, Defect Analysis
Tools & Platforms:	IntelliJ IDEA, Postman, Jira, Confluence, Axis ETM, GitHub Copilot

PROFESSIONAL EXPERIENCE

Java Application Software Engineer | Sureminds Solutions (Client: Liberty Mutual via Cognizant)

Oct 2024 – Jan 2026 | Coimbatore, India

- Maintained and enhanced mission-critical insurance portals (AppGuardians, BL Links, HotLinks) serving 500+ Business Lines users, ensuring 99.5% system uptime and resolving 50+ production defect tickets monthly with root cause analysis.
- Engineered backend solutions using Java Spring Boot and J2EE frameworks, implementing RESTful APIs and microservices architecture for scalable enterprise applications.
- Debugged and resolved complex production issues in legacy Java codebases, implementing safe fixes while maintaining backward compatibility and conducting comprehensive impact analysis.
- Validated and optimized Axis ETM configurations for insurance data mappings (IAA/ACORD standards), reducing configuration errors by 30% through systematic validation and automated testing.
- Collaborated in Agile/Scrum environment using IntelliJ IDEA, Git, Jira, and Confluence, contributing to sprint planning, code reviews, and maintaining consistent release velocity across development cycles.
- Delivered production-ready enhancements with comprehensive technical documentation, facilitating knowledge transfer and reducing new team member onboarding time by 40%.

Software Engineer – SDET / QA Automation | Reflektive Labs

Apr 2022 – Apr 2024 | Bangalore, India

- Architected and maintained 100+ Cypress end-to-end UI automation test suites using Page Object Model (POM) design pattern, achieving 85% test coverage and reducing regression testing time by 60%.
- Executed comprehensive functional and regression testing for Bridge web applications, identifying and documenting 200+ critical defects across multiple release cycles, improving overall product quality.
- Managed test case repository in TestRail with 500+ test cases, establishing QA best practices and improving test traceability and documentation standards across development teams.
- Integrated automated test suites into CI/CD pipelines, enabling early bug detection 2 weeks ahead in the development cycle and significantly improving release quality metrics.
- Actively participated in release planning and sprint retrospectives, providing actionable QA insights that contributed to a 40% reduction in production incidents.

KEY PROJECTS

Employee Feedback Management System – Spring Boot RESTful API

- Developed comprehensive RESTful API using Java, Spring Boot, Spring Web, Spring Data JPA, and H2 database with full CRUD operations and exception handling.
- Implemented robust unit testing with JUnit and Mockito achieving 90% code coverage, and validated all endpoints using Postman for functional accuracy.
- Authored detailed technical documentation covering architecture decisions, API specifications, deployment instructions, and integration guidelines.

Full-Stack Development Exploration – Go, TypeScript, GraphQL

- Building CRUD applications in Go to understand concurrency patterns, goroutines, and high-performance backend service architecture.
- Experimenting with GraphQL queries and mutations, developing type-safe APIs with TypeScript to expand full-stack development capabilities.
- Exploring containerized deployments with Docker and Kubernetes to master cloud-native application architectures and orchestration.

EDUCATION

MBA – Human Resource Management | Bharathiar University | 2020-2022

B.Com – Computer Applications | PSGR Krishnammal College for Women | 2017-2020

ADDITIONAL INFORMATION

- Core Competencies: Backend API Development, Microservices Architecture, QA Automation, Legacy System Maintenance, Agile/Scrum Methodologies, Technical Documentation, Cross-functional Collaboration
- Languages: English (Fluent), Tamil (Native)
- Notice Period: Immediate Joiner | Open to Remote and Relocation
