

Megha Panicker

Dallas, TX | 682 272 4012 | mxj9096@mavs.uta.edu | [Linkedin](#) | [Github](#) | [Portfolio](#)

SKILLS

Programming Languages: C# (Primary), Python, JavaScript, PowerShell, VisualBasic

.NET & Backend Development: ASP.NET, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, .NET Framework, RESTful API Development, Background Jobs & Scheduling

Identity, Security & Authentication: Identity and Access Management (IAM), Role-Based Access Control (RBAC), Active Directory, Entra ID (Azure AD), Okta, Authentication & Authorization, OAuth 2.0, OpenID Connect (OIDC), SAML, Secure Coding Practices

Databases & Data Management: Microsoft SQL Server, T-SQL, Database Design, Query Optimization, Stored Procedures, Indexing

Web & Frontend Technologies: HTML, CSS, JavaScript, AJAX, Responsive UI Development

DevOps, Cloud & Deployment: Git, GitHub, CI/CD Concepts, Azure (App Services, Azure AD, AWS, Docker, Kubernetes, Application Deployment & Environment Configuration

Protocols & Networking: HTTP/HTTPS, TLS/SSL, REST Standards

Testing & Quality: Unit Testing, Code Reviews, Debugging, Application Monitoring

Tools & Platforms: ServiceNow, Remote Desktop Tools, Visual Studio, VS Code

EDUCATION

MS in Computer Science, University of Texas at Arlington, USA

Jan 2024 - Dec 2025

BS in Computer Science, Guru Gobind Singh Indraprastha University, India

Aug 2017 - July 2021

EXPERIENCE

Tata Consultancy Services

Aug 2021 – Jan 2024

Software Engineer

- Developed and maintained **IAM applications** using **C#, ASP.NET, Web API, and SQL Server**, enabling **role-based access control (RBAC)** for servers and enterprise resources supporting **1,000+ users**.
- Built secure backend services to manage **user provisioning, de-provisioning, and access requests**, reducing manual access errors by **30%**.
- Automated recurring IAM operational tasks using **Python scripting**, including access reviews, account cleanup, and automated **email alerts**, reducing manual effort by **40%**.
- Integrated access workflows with **ServiceNow** for ticket-based approvals and SLA tracking, consistently meeting defined response timelines.
- Worked with **Active Directory and Okta** to support identity lifecycle management and troubleshoot access issues.
- Developed basic internal UI components using **JavaScript, HTML, and CSS** for administrative access dashboards.
- Optimized **SQL Server queries and database objects**, improving performance and reliability of access audit reports.
- Collaborated with security and infrastructure teams using **Remote Desktop tools** to resolve access-related incidents.

Tata Consultancy Services

May 2019 – Jul 2019

Machine Learning Intern

- Fine-tuned BERT, LSTM, and GRU models for emotion classification, improving accuracy by **20%** and reducing false positives by **15%**.
- Improved model precision by **22%** using embeddings (GloVe), attention layers, and optimized preprocessing.
- Reduced training time by **50%** with hyperparameter tuning and efficient batching.
- Built LSTM+GRU hybrid models on 1M+ samples, boosting prediction performance by **30%**.

PROJECTS

Hybrid Information Retrieval with Knowledge Graphs and LLMs

- Designed RAG pipeline with Neo4j, OpenAI, and Python, achieving BERTScore F1 of 0.8691 and 40% higher query relevance.
- Automated KG construction from Wikipedia text using LLM entity/relation extraction and structured vector search.

Tech Used: Python, LangChain, Neo4j, OpenAI API, REST APIs

FlavourFind – Recipe Recommendation App

- Built full-stack web app using React, Django, and third-party Spoonacular API to deliver personalized, filterable recipes.
- Integrated Firebase Auth, grocery list generation, and cloud-hosted backend for secure, real-time interaction.

Distributed Housing Price Prediction using Spark on Cloud

- Implemented Spark-based linear regression for real estate modeling, reducing compute time by 30% via parallelism.
- Deployed scalable predictive workflows on AWS cloud clusters (EC2, S3), enabling efficient processing of high-volume housing data.

Tech Used: Apache Spark, Python, AWS EC2, S3, Jupyter, Linear Regression
