

Bal Raj Kale

Email : balraj kale01@gmail.com

Phone : (678) 888-1470

US Citizen

Summary:

- 7+ years of Java Full stack developer experience in SDLC such as Analysis, Design, Implementation and Testing of Object-Oriented and Web based Enterprise Applications using Java/J2EE.
- Experience in Service Oriented Architecture for **Web Services** using **SOAP/WSDL/Restful services**.
- Expertise in Java / J2EE Technologies **Java, JSP, Servlets, Spring, Spring DAO, Spring MVC, Spring IOC, Hibernate**, Object-Oriented Design (OOD), Design Patterns, J2EE Design Patterns, MVC, Struts multi-tier architectures and distributed architectures. And Experience on open-source frameworks like **SPRING** (core, context, ORM, DAO, web MVC modules), JMS, Angular JS.
- Skilled in **Python, Django**, and Flask with experience in backend development, REST APIs, database integration, and secure web application development.
- Experienced in developing Web UI Applications using **HTML5, CSS3, Boot Strap, Java Script, Type script, Ajax, jQuery, Angular, Node JS and Spring MVC**.
- Proficient in developing Dynamic Single Page Application (SPA) using MEAN.
- Advanced front-end development using **Angular, React.js, JavaScript (ES6+)**, HTML5, CSS3, jQuery, and responsive UI design principles.
- Developed **Microservices** with **Spring Boot**, Spring REST, Spring Cloud, Eureka, API-Gateway etc.
- Hands on experience with **Spring Core**, Spring **JDBC Template**, Spring **MVC**.
- Experience with Application servers like Apache Tomcat, Web-sphere and Weblogic10, JBOSS.
- Expertise in **RDBMS** like **Oracle, MySQL, SQL Server** and experience on **Mongo DB (No SQL)**.
- Experience in working with **Data structure** and **Algorithms** in java
- experience with following test-driven development to create software in **Python** using core language features and the **SciPy stack (pandas, NumPy etc.)**
- Experience in using **Amazon Web Services (AWS)** and **AWS SNS/SQS** for delivering messages.
- Used Eclipse-Spring Tool Suite for **Microservices** with **Spring Boot** & deployed into **AWS lambda**.
- Experience with **CI/CD pipelines** using Jenkins, GitLab, Bitbucket and other tools for automated build, test, and deployment .
- Skilled in containerizing applications using Docker and deploying them on Kubernetes clusters (EKS/ECS) in AWS.
- Experience on SOAP protocol using JAX WS and integrated Apache CXF, AXIS-2 for WS -Security, WS-Remote Messaging, WS- Policy and automated documentation using Swagger and WSDL.
- Experience with **ECS, VPC, AutoScaling, Security Groups, AWS CLI, Cloud watch**.
- Very good experience in using GitHub Enterprise, SVN, CVS for version control systems.
- Utilize programming languages like **Go, Rust**, and C++
- Working with Pivotal cloud foundry to deploy and run the applications through Jenkins.
- Proven experience working with Large Language Models (LLMs).
- Experienced in writing unit test cases using JUnit and used **Test Driven Development (TDD)**.

Work Experience

Dish Networks, Denver, Colorado

Sep 2023 to Present

Sr. Java Full Stack Developer

Responsibilities:

- Involved in requirement gathering, designing and developing the entire system with **Agile-Scrum** methodology and development using Java/J2EE Technologies, Web Services and Hibernate.

- Implemented **Micro Service Architecture** using **Mongo DB, Angular** and **Node JS stack** and developed Single Page Applications (SPA).
- Designed front end and backend of the application utilizing **Python** on **Django** Web Framework.
- Used **Java 8** features in developing the code like Lambda expressions, creating resource classes, fetching documents from database.
- Implemented backend business logic using **Python and Django**
- Expertise in consuming Restful web services using Node JS, AngularJS and jQuery along with JSON parsing to implement AJAX call and render the response data to User Interface.
- Performance tuning, **Refactoring** and Reusability of Java code is addressed in regular basis.
- Converted the code base to use modern **ECMAScript (ES6 / ES7)** used Typescript and Web pack as a module loader and used along with Angular CLI.
- Designed backend logic using **Python with Flask framework**
- Golang and Java were used as a backend REST service while AngularJS used for the user interface.
- Experience in **Amazon Web Services (AWS)** like EC2, S3, Lambda, RDS, Elastic Load Balancing, SQS, SNS, AWS Identity and access management, AWS Cloud Watch, Elastic Beanstalk and Cloud Front, Redshift.
- Worked with **J2EE** design patterns in **MVC architecture** with **spring**.
- Experience in integrating Jenkins with **Docker container** using Cloud bees Docker, **Kubernetes** pipeline plugin and provisioned the EC2 instance using **Amazon EC2** plugin.
- Involved in the integration of frameworks like **spring** and **hibernate**.
- Pair programming using the divide and conquer method of breaking down a chunk of requirements into piecemeal stories and breaking each major release into iteration.
- Implemented application using **Spring Boot** Framework and handled security using Spring Security.
- Used **SOAP UI tool** to test the REST web service operations.
- Used Docker as **CI/CD** tool for integrating different code components.
- Developed presentation layer includes UI components, validations using HTML5, applying styles using CSS, used jQuery to make Ajax calls.
- Used **Python** and **Django** to interface with the jQuery UI .
- Worked on designing single page application using Vue Js components .
- Involved to implement various client-side interfaces on the front end using **React.js** and used various predefined components from NPM and redux library and deployed application to NGINX.
- Involved in design and development of GraphQL and services to interact with data storage layer.
- Enhancement of the existing functionality to persist the messages to Cassandra DB in Kafka.
- Created new REST web service operations and modified the existing web service's WADLs Web Application Description Language
- Responsible for Architecture, developing of application's UI using **Angular, Typescript**.
- Experience in upgrading / migrating various versions of **PostgreSQL** database.
- Development of **DAO** layer using **Hibernate** Template, **JDBC** Template and Mongo Operations.
- Expertise in implementing application using **Multithreading, JSF, Struts, Struts Validations, Log4j, spring, Hibernate Frameworks, Apache Camel**
- Implemented agent-server messaging dialog using **Camel** and **JMS** (Active MQ implementation)
- Designed REST/HTTP APIs, including **JSON** data formats and API versioning strategy.
- Involved in developing and implementation of the web application using Ruby on Rails.
- Used **Apache Kafka** (Message Queues) for reliable and asynchronous exchange of vital information between multiple business applications.
- Worked on Integration and Analytics based on **Kafka** and **NoSQL databases**
- Wrote application-level code to perform client-side validation using **jQuery** and **JavaScript**.
- Configured Docker container service and build pipe line. Handled all the port mapping/binding things that happen with **Dockers** and Containers. Implemented HTTP REST API using Node Js
- Researching JavaScript based frameworks like **React Native**

- Wrote build & deployment scripts using **Ant**, **Maven** on Unix environment.
- Developed unit test cases using Mockito framework for testing accuracy of code and logging is done using SLF4j + Log4j.
- Used **Cucumber** and Selenium for Behavioral and Integration testing respectively.
- Experience with **Version Control Systems** like **Subversion (SVN)**, and **Git**.

Environment: Java1.8, J2EE, JSP, SOAP, REST, Servlet, Spring, Hibernate, WebLogic, Oracle 11g/12g, XML, Java Script, CSS, HTML, Kafka, React.js, Rust, Json, JUnit4, Kotlin, Jenkins, Maven, JIRA, Apache Camel.

Santander Bank , Boston, MA

Jan 2020 – Aug 2023

Sr. Java Full Stack Developer

Responsibilities:

- Used **Agile** Software Development for developing the application.
- **Java 1.8 Stream API** for Bulk Data Operations on Collections using both Streams and Parallel Streams.
- Developed business components by using **Spring Boot**, **Spring IOC**, **Spring AOP**, **Spring Annotations**, **Spring Cloud**) & Persistence layer by using **Hibernate/JPA** along with Web Services (**RESTful**).
- Experience working with a web framework such as Django, Flask, FastAPI.
- Designed **User Interfaces** using **JSP**, **Servlets**, **Angular**, **CSS**, **XML** and **HTML**.
- Design and implement web services using of **REST Web services** by using **Jason**
- Used **Apache camel**, **CXRF web services**, **Service Mix engine**, **Active MQ** etc. to build a custom **ESB**.
- Asynchronous distributed transactions across **Microservices** are implemented using RabbitMQ, AWS SNS, SQS, **Kafka**
- extensive experience with PHP, Modern Frameworks (Symfony, Laravel, etc.), HTML5, jQuery, Vue.
- Secured the API's by implementing OAuth2 token-based authentication/authorization scheme using spring security.
- Develop services and APIs using TypeScript/Node.js and React.
- Ensured application security using Python and Django (CSRF, XSS, SQL Injection)
- Worked with relational databases using Python and Django (PostgreSQL/MySQL)
- Independently integrate multiple APIs and new features using React + GraphQL stack.
- Experience in using Vue JS to create a simple API to loop through an array of bound data and also done two way binding of data using Vue JS.
- Experience with a backend language and framework **Python (Django, FastAPI)**.
- Developed **Maven** scripts and developed builds using Maven, continuous integration servers like **Jenkins**.
- Experienced in Security-System development for Web Applications. Involved and developed all phases of security implementation using spring security system against modes of authentications: LDAP authentication, Database authentication and Pre-Authentication.
- Worked on developing APIs using **Kubernetes** to manage and specify the copies of the containers to run the actual servers in the cloud environment.
- Maintained and monitored frameworks like Django, flask
- Developed Angular services, controllers and created models for two-way data binding.
- Implemented spring **MVC** architectural design pattern.
- Used **Angular** to create views to hook up models to the DOM and synchronize data with server as a Single Page Applications.
- Used **AWS** to build Java applications that work with Amazon S3, Amazon EC2, Amazon Simple-DB.
- Created Jenkins jobs and pipelines and integrated **python** scripts to communicate to AWS.
- Created Mongo DB/NoSQL collections. Developed Server-side automation using **NodeJS** scripting and connecting different types of SQL and NoSQL stores.
- organized result in web pages by writing **AngularJS controller**, **directives**, **services**, and **route providers**. Also used **Angular.js** filter to make the data **searchable** and **sortable**.

- Implementing **Micro services** to base on Restful API utilizing Spring Boot with Spring MVC and Apache Kafka.
- Experienced in build tools like Ant, Maven, Gradle and using them with continuous integration tools like Jenkins to create and publish application artifacts.
- Involved in writing SQL Queries, SQL Scripts and performing Database testing
- Implemented the application using the concrete principles laid down by several **Java/J2EE** Design patterns like **MVC, Singleton, Data Transfer Object (DTO)**.
- Built reporting module for analytic services using custom **AngularJS MVC** framework components
- Developed our application using **Service Oriented Architecture**.
- Used **SOA** framework with **hibernate** to map oracle database.
- Configured and deployed the application in **JBoss**.
- Implemented Web Services (SOAP) for transmission of large blocks of **JSON** data over HTTP.
- Used **Log4J** for logging and tracing messages.
- Collaborate with UI/UX and product teams to understand customer desires and determine feasibility
- Experience with **Docker** images, Containers, push /pull with **Spring Boot**, used Jenkins for CICD.
- Designed and developed the UI using **JSP, HTML, CSS and JavaScript, React-JS**
- Used **JIRA** tool to communicate with other team members in QA and production.
- Tested components using Unit Test mock frameworks during development.
- Used **GIT** for source code version control.

Environment: Java, JSP, python, Maven, Struts, SOAP, REST, Spring, Hibernate, JBoss, Camel, Oracle 10g/11g, Azure, Java Script, CSS, Golang, GIT, Kubernetes, AWS, JUnit

Client: Ford Motors, Dearborn, MI

Apr 2017 – Dec 2019

Role: Java Developer

Responsibilities:

- Worked with the Requirements team, analyzed the Use cases and **followed AGILE/ SCRUM methodology**.
- Developed modules in RAD environment using Spring **MVC, DI, AOP, Hibernate ORM** (for backend data persistency).
- Application development experience using Multithreading, Collection framework and Core Java, Spring, Hibernate, SQL server.
- Developed Web Services for both Client and Service Side using **SOAP** and **RESTful**. Consumed Web services securely using JAX-WS API and tested using SOAPUI.
- Used **Jenkins** continuous integration tool to do the deployments.
- Extensively used Custom **JSP** tags to separate presentation from application logic.
- Responsible for monitoring & resizing Oracle database objects (Table spaces, Tables, Indexes)
- Designed and developed the libraries and applications following **Multithreading concepts**.
- Deployed the code in **WebSphere** Application server.
- Extensively used the **Hibernate Query Language** for data retrieval from the database and process the data in the business methods.
- Having good experience with Ruby on Rails and Python with Django
- Wrote various **Struts** framework Action classes for interfacing with the business logic, form **beans** for presenting the data to **JSPs**.
- Implemented authentication mechanisms like **OAuth, API keys, or JWT** to secure **REST APIs**.
- Developed **JSP** pages as per requirements used **Dojo JavaScript Library** with **AJAX** to add user functionalities, **jQuery UI** for client-side validation.
- Proficiency in creating **ETL (Extract, Transform, Load)** packages using **MS SQL** Server Integration Services.
- Designed and developed various stored procedures, functions and triggers in **PL/SQL** to implement complex business rules. Worked with **MySQL Work Bench**.

- Proficient in **JBoss administration**, including installation, configuration, and maintenance of **JBoss Application Server**
- Developed Scripts for **UNIX** platform deployment.
- Configured **JSF** backing **beans** as spring beans.
- Involved in production code deployment, functional verification, integration testing, bug fixing, **unit test case** preparation and execution, and code merging using **Git**.

Environment: J2EE, JSP, Spring Web services, Hibernate, JPA API JSP, XML, Ajax, Java Script, log4j, JNDI, Maven, SVN, jQuery, Junit, , Multithreading , Oracle, SQL/PLSQL

Education: Bachelors or commerce from Osmania university , 2012 , India
Masters in Computer science from Herzing University, Atlanta, GA , 2016, USA
