Professional Summary

Final-year Computer Science student (CGPA: 8.68 / 10.0) with hands-on experience in full-stack development and enterprise-level automation. Proven ability to build, deploy, and maintain applications using technologies like Python, C#, AWS, and Docker. Professional experience at Ivanti focused on enhancing CI/CD platform stability and resolving complex framework bugs. Eager to apply strong problem-solving and software engineering skills to a challenging SDE intern role.

Technical Skills

Cloud, DevOps & Data	AWS (EC2, S3, CloudFront), Serverless (Vercel), Docker, Jenkins, Azure DevOps , Git, HTML , CSS , CI/CD, SQL, MongoDB, WebSockets
AI/ML & Languages	Python , GenAI (Gemini API), LLM Agents (ReAct), NLP, Machine Learning, C# , JavaScript , C++ , Java
Tools & Frameworks	React, Node.js, Express.js, Flask, Selenium , Postman, Figma, MSTest, GitHub Copilot, .NET

Experience

- Aug 2025 – Present **Software Engineer Intern, Ivanti, Bengaluru, India**
- Owned, maintained and enhanced a 6,000+ UI automation test suite (C#, Selenium, .NET), adding new test cases, raising, reviewing and merging PRs to resolve complex framework and test-level defects.
 - Running, monitoring and debugging YAML-based CI/CD pipelines in **Azure DevOps** and **Jenkins** to significantly improve reliability for daily regression runs.
 - Performed root-cause analysis on build failures, distinguishing automation defects from product bugs to deliver actionable reports that accelerated QA turnaround.
 - Assisted in provisioning and updating of VM environments to support large-scale regression execution and validation.

Projects

- Project **Q24 – Appointment Booking System [Live App] (AWS, React)**
- Architected and deployed a full-stack, scalable application on **AWS (EC2, S3, CloudFront)** in under 60 days. Engineered a real-time booking and alert system using **WebSockets** to handle concurrent user data.
- Project **NexusBrief – AI-Powered Meeting Intelligence [Live App] (GenAI)**
- Architected and single-handedly built a full-stack AI application from concept to a live MVP in a **one-week sprint**. Transforms raw LinkedIn data into strategic intelligence using **Google's Gemini API**.
- Project **Resume Builder [Live App] (JavaScript)**
- Developed and launched a client-side resume builder from scratch in under 15 hours, successfully acquiring **50+ active users within 48 hours** of deployment.

Project **Smart Printing System (Python, Flask, Docker)**

- Designed a cloud-native application to digitize local printing services, containerizing the backend services with **Docker** for portability and scale. Implemented a **Flask-based REST API** and job manager.

Project **AI-Powered E-Commerce Cataloging Pipeline (Developing)**

- *Tech: Python, LLM Agents*
- Designing an autonomous **data pipeline** to solve product cataloging at scale by ingesting images and generating descriptions using the **ReAct framework**.

Education

2022 – 2026 **B.Tech, Computer Science & IT**, REVA University, Bangalore, CGPA: 8.68 / 10.0 (86.81%)

Key Coursework: Machine Learning, **Big Data**, **Distributed Systems**, Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS)

Achievements & Certifications

- **Smart India Hackathon (SIH) Finalist:** Selected as a national finalist, competing against thousands of teams.
- **Applied Generative AI Certification** (Infosys, May 2025): Gained hands-on experience with GenAI models. [\[View Certificate\]](#)
- **Hackathon Experience:** Competed in **Microsoft IdeaThon** (utilizing **Azure OpenAI**) and Vishwarkarma Hackathon.
