

ANOSH FALLAH

anosh7@gmail.com | [LinkedIn](#) | [Website](#) | [Calendly](#)

Senior Software Engineer/Architect skilled in AWS, Node.js, Python, ReactJS, Go, CI/CD, IaC

SUMMARY

Diligent Senior Full-Stack Software Engineer with 15+ years of experience in enterprise software development, specializing in cloud architecture and microservices.

Proven track record of enhancing system performance, achieving a 93% reduction in load times and 35% improvement in query efficiency.

Demonstrated leadership in architecting secure, scalable solutions using AWS, GraphQL, and GenAI, while mentoring teams to uphold high coding standards and compliance.

ACHIEVEMENTS

Intuit	Engineered AI-driven Slack automation to process engineering events in real time, improving incident visibility and producing secure, event-based operational insights.
Medtronic	Built a configurable clinical analytics dashboard for physicians and stakeholders, delivering high-fidelity biometric visualizations that improved clinical decision-making workflows.
ADP	Designed and deployed a production-grade Kafka platform to enable high-throughput, fault-tolerant, decoupled microservice communication across enterprise systems with strong reliability controls.
Disney ABC	Architected a highly available, multi-region AWS collaboration platform for global newsrooms, delivering real-time content and sub-100ms search latency via multi-CDN delivery. Built an ABC app to manage weekly shows, with ESB-driven event notifications and resilient multi-retry handling for congestion and network failures.
Live Nation / Ticketmaster	Built a globally scalable cloud platform that converted physical tickets into secure Apple Wallet passes, enabling mobile venue entry at high volume for millions of fans worldwide.

WORK EXPERIENCE

INTUIT - Senior Full-Stack Engineer / Backend Architect (GenAI, GraphQL, AWS)

10/2024 – Present

- Led full-stack delivery for financial monitoring dashboards (Next.js/TS + Node services).
- Migrated REST APIs to GraphQL; improved data consistency and increased query performance 35%.
- Owned API contracts: versioning, error models, auth, and backward compatibility.
- Built secure event-driven workflows with Slack integrations for real-time operational actions.
- Designed PostgreSQL schemas, indexes, and migrations; optimized query plans for throughput.
- Implemented Redis caching to reduce latency and stabilize UI performance at peak load.
- Standardized Python/FastAPI microservices patterns; improved maintainability and reuse.
- Automated CI/CD with gated releases; reduced pipeline cycle time ~50%.
- Hardened IaC (Terraform/CloudFormation) for compliance controls and least-privilege IAM.
- Improved reliability with SLOs, dashboards, alerts, and runbooks for on-call readiness.
- Led code reviews and mentoring; enforced secure coding and engineering standards.
- Prototyped GenAI PoCs and integrated features with auditability and safe-usage guardrails.

Stack: GenAI, GraphQL, TypeScript, React/Next.js, Node.js/Express, Python/FastAPI, PostgreSQL, Redis, AWS, Docker/Podman, Kubernetes, Terraform, CloudFormation, CI/CD

MEDTRONIC - Lead FullStack Developer (Azure/AWS)

01/2021 – 09/2024

- Led full-stack delivery of patient web apps; standardized React/Next.js + TypeScript patterns.
- Architected patient data platform with distributed caching; reduced application load times by 93%.
- Built HIPAA-aligned APIs with audit trails, encryption, and PHI-safe logging patterns.
- Implemented GraphQL + REST contracts; enforced versioning and client compatibility.
- Developed backend services with Python/FastAPI and Node; designed clean service boundaries.
- Built event-driven ingestion pipelines with Kafka for async processing and decoupling.
- Designed multi-cloud SSO (Azure AD, Cognito, SAML/OAuth) with least-privilege access.
- Built CI/CD on Kubernetes + Terraform; improved delivery speed by 50%+ with quality gates.
- Improved reliability using observability, SLOs, incident response playbooks, and RCAs.
- Tuned performance via profiling, query optimization, caching, and payload discipline.
- Partnered with product/clinical stakeholders to translate workflows into measurable outcomes.
- Mentored engineers and led design reviews; raised bar on security, quality, and documentation.

Stack: TypeScript, React/Next.js, Node.js, Python/FastAPI, GraphQL/REST, PostgreSQL, Redis, Kafka, Azure/AWS, Kubernetes, Terraform, CI/CD, Observability, SSO (SAML/OAuth)

ADP - Lead FullStack Developer/Architect (Kafka/AWS)

12/2017 – 12/2020

- Designed a high-throughput financial data platform using Kafka with 99.999% data consistency and disaster recovery
- Migrated monolithic payroll applications to microservices, reducing API latency by 45% and increasing system throughput
- Led frontend architecture using Next.js, React, and Vite to improve performance and development velocity
- Implemented TypeScript standards and component-based architecture, reducing production defects by 20%+
- Developed and optimized GraphQL APIs with Aurora and DynamoDB for large-scale, performance-critical workloads
- Engineered cloud-native infrastructure on AWS EKS using Terraform, reducing operational costs by 30%
- Mentored junior and mid-level engineers and established architectural and coding best practices
- Improved system reliability using observability tooling, achieving 99.99% uptime and 60% faster incident resolution

Stack: TypeScript, Java, Spring Boot, React, Node.js, Kafka, Spark, AWS (EKS, Lambda, Aurora, DynamoDB, CloudWatch, Secrets Manager), Azure, GraphQL, Oracle, MySQL, MongoDB, Docker, Kubernetes, Terraform, CloudFormation, Databricks, Redis, New Relic, OpenID, SAML

DISNEY ABC - Senior Full-Stack Developer/Architect (AWS, React, Distributed Systems)

07/2016 – 12/2017

- Integrated Python services with ServiceNow for automated L2 ticketing and improved incident response workflows
- Developed high-performance Apple Wallet APIs using Python, FastAPI, and autoscaling to achieve 10x speed improvements
- Designed active-active, multi-region microservices using Node.js and Express with sub-100ms global latency
- Built scalable full-stack applications with Next.js, React, and TypeScript using strict compiler standards
- Improved CI/CD pipelines and frontend build performance using Vite and modern tooling
- Engineered resilient data pipelines with Kafka and Cassandra for distributed event-driven systems
- Implemented enterprise authentication using SAML2, OAuth2, and secure token lifecycle management
- Automated cloud infrastructure using Terraform and CloudFormation across AWS and Azure, reducing costs and provisioning time

Stack: Java, Spring Boot, Python, GoLang, Node.js, React, AWS (ECS/EKS/RDS/S3), Aurora, Cassandra, MongoDB, Docker, Kubernetes, Terraform, ELK, New Relic, JMeter, Bash

LIVE NATION / TICKETMASTER - Senior Full-Stack Developer/Architect (AWS, Python)

09/2014 – 04/2016

- Improved presale and on-sale system performance by 10x, reducing processing time from hours to minutes
- Optimized Java JARs with caching, timeout handling, and detailed application logging
- Designed dockerized EC2 microservices using AWS CloudFormation, ALB, S3, RDS, and centralized logging
- Reverse engineered undocumented applications and libraries, producing clear technical documentation
- Implemented monitoring and alerting using Servlet logging, Sumo Logic, New Relic, and Amazon CloudWatch
- Built Shell and Python automation scripts to simulate and compare API behavior across environments
- Standardized API error handling using proper HTTP status codes and structured JSON responses
- Recognized by senior leadership for fast issue resolution and preventing business disruptions
- Automated infrastructure and deployments using Chef, Puppet, and Knife

Stack: Typescript, ReactJS, Angular, Vue, Javascript, ES6/7/8, Java, Spring Boot, Python, GoLang, RDS, Oracle, Aurora, S3, ECS, EKS, Docker, Kubernetes, Terraform, Cloud-Formation

DISNEY PARKS & RESORTS – Web Developer

01/2010 – 08/2014

SKILLS

AI: GenAI, LangChain, Llama, Vector Databases, MLOps, Prompt Engineering, Agentic Architecture, AWS SageMaker, AWS Bedrock, Cost Optimization, LLM Evaluation, Semantic Caching, RAG, Copilot, Replit, OpenAI/Anthropic API, MCP

Programming: NodeJS, Python, GoLang, Java, Perl, ReactJS, Ruby, Rust, TypeScript, Vite, JavaScript, Angular, PHP, C, C#, C++

Cloud (AWS/Azure/GCP): Apache Airflow, API Gateway, CloudFormation, CloudFront, CloudWatch, Code Build, Code Commit, Code Deploy, Code Pipeline, Docker, eb-extensions, EC2, ECR, ECS, EFS, EKS, Elastic Cache, Fargate, Glacier, IAM, Kinesis, KMS, Kubernetes, Lambda, Load Balancers, Parameter Store, Route53, S3, Secrets Manager, SES, SNS, SQS, Terraform, VPC, X-Ray,

Data/ETL: Athena, Glue, Kafka, Numpy, Pandas, PySpark, RabbitMQ, Redis, Redshift, Shell/Bash, Scripting, Snowflake, API

Database: AuroraDB, Cassandra, DynamoDB, GraphQL, MariaDB, MongoDB, MySQL, Oracle, PostgreSQL, RDS, Redis, MSSQL

Security: AIM, Cognito, JWT, OAuth2, OpenID, SAML2, Penetration Testing, DoS protection, Encryption, Firewalls, SiteMinder, SSL

DevOps: Apache Tomcat, Artifactory, Azure DevOps, Celery, Chaos Monkey, Chef, DataDog, Docker Compose, DockerHub, Elastic Email, Gradle, Grafana, Jenkins, JFrog, Maven, Nagios, NewRelic, Nginx, Ping Monitor, Prometheus, Puppet, Ansible, Azure ARM

Testing: AssertJ, Cobertura Code Coverage, DBMock, JUnit, Mockito, PHPUnit, Powermock, Selenium, TDD, WireMock, WireShark

EDUCATION

Lakehead University • Bachelors Degree (Software Engineering)
